Full Stack Developer and C-DAC PGCP-AC graduate with hands-on experience building scalable web applications using React, Node.js, Spring Boot, ASP.NET Core, and MySQL. Skilled in REST API development, JWT/OAuth 2.0 authentication, microservices architecture, CI/CD pipelines, and Docker-based deployment. Familiar with Generative AI integration, with a strong foundation in OOP, SOLID Principles, Agile/Scrum practices, and modern full-stack software development.

Technical Skills

Languages: Java, Python, C, C++, C#, SQL

Frontend: React, Vite, JavaScript, TypeScript, Redux, Bootstrap 5, Axios, HTML5, CSS3

Backend: Node.js, Express.js, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, ASP.NET Core, JDBC

Database: MySQL, MongoDB

Cloud & DevOps: Docker, Docker Compose, GitHub Actions, CI/CD Pipelines, Linux

Tools: Git, GitHub, Postman, Swagger, VS Code, Spring Tool Suite, Eclipse, GitHub Copilot

Core Concepts: Object-Oriented Programming (OOP), SOLID Principles, Data Structures & Algorithms, System Design

Other: REST APIs, JWT, OAuth 2.0, Generative AI, API Gateway, Entity Framework Core, Microservices Architecture, Agile, Scrum

Academic Projects

Web-Based Recruitment System (TalentBridge)

[React, Node.js, Spring Boot, ASP.NET Core, MySQL]

- Built a full-stack recruitment platform with Admin, HR, and Candidate modules as part of a 4-member team, supporting end-to-end hiring workflows including vacancy management, application tracking, interview scheduling, and candidate evaluation.
- Implemented secure REST APIs with role-based access control using Spring Boot, Spring Security, JWT, OAuth 2.0, Spring Data JPA, Hibernate, and MySQL, covering 50+ API endpoints across 3 user roles.
- Enabled candidates to register, upload resumes, apply for jobs, track application status, and download generated PDF offer letters; built corresponding React frontend with Axios-based API integration.
- Designed a Node.js API Gateway, Python-based Generative AI microservice for AI-assisted offer-letter drafting, and ASP.NET Core notification/PDF service; deployed the full multi-container stack using Docker and Docker Compose following Agile sprint-based development.
- Tested and validated all REST API endpoints using Postman; documented API contracts using Swagger/OpenAPI, ensuring consistent integration across all microservices.

Employee Leave Management System (LeaveEase)

[React, Spring Boot, Spring Data JPA, Hibernate, MySQL]

- Built a full-stack employee leave management application with Employee and Manager modules, supporting leave submission, approval, rejection, cancellation, and status tracking workflows.
- Developed 10+ REST APIs using Spring Boot, Spring MVC, and Spring Data JPA; implemented server-side leave-date validation, overlapping leave detection, structured exception handling, and validated endpoints using Postman and JUnit-based unit testing.
- Designed normalized MySQL entity relationships and integrated the React frontend with the Spring Boot backend using Axios, ensuring seamless data flow and responsive UI across both modules.

Hand Gesture Control of Home Automation Using Flex Sensor

[Arduino UNO, Embedded Systems, RF Communication]

- Designed and developed an embedded hand gesture-controlled home automation system using Flex Sensors, Arduino UNO, RF communication modules, and relay circuits — controlling lights, fans, and door locks without physical contact.
- Processed and transmitted gesture data wirelessly to a receiver unit for appliance control, enhancing convenience and independence for elderly and physically challenged individuals.

Education

Post Graduate Certificate Programme in Advance Computing — Feb 2026 – Aug 2026
Centre for Development of Advanced Computing (C-DAC), Pune — *76.56%*

B.Tech in Electronics & Telecommunication — 2019 – 2023
JSPM's Rajarshi Shahu College of Engineering, Pune (SPPU) — *CGPA: 8.48/10*
