ABRAR

Dynamics 365 CRM Developer

abrar.d365@gmail.com | +91 7022202088

PROFESSIONAL SUMMARY

Dynamics 365 CRM professional with 7+ years of experience across Sales, Customer Service, and Field Service modules, spanning development and support engagements. Strong grounding in core CRM functionality, plug-ins, and out-of-the-box (OOB) features, with hands-on proficiency in JavaScript, SSIS, and C#. Proven track record in full-stack CRM development — from C# plug-ins and Azure integrations to enterprise-grade Power Pages portals. Experienced in modernizing legacy CRM systems using AI-driven Copilot features and Azure cloud services.

KEY SKILLS

- **CRM Platforms:** Microsoft Dynamics CRM (Sales, Customer Service, Field Service), Power Apps, Power Automate, Microsoft Copilot, Copilot Studio
- **Programming:** C#, JavaScript, Type Script, HTML, CSS, SQL Server 2014
- **D365 / Power Platform:** Power Pages, Model-Driven & Canvas Apps, Dataverse, Copilot Studio, PCF Controls
- **Azure & Integration:** Azure Functions, Logic Apps, SSIS, REST / Web APIs
- **Tools:** Control-M, SSIS, Unified Service Desk, Zapier, Ribbon Workbench
- **PCF Development:** Developed and customized PCF controls using Type Script, JavaScript, HTML/CSS, and React to enhance Dynamics 365 CE and Power Apps user experiences; configured control properties through the Control Manifest. Input .xml file and deployed via Power Platform solutions; troubleshot and optimized controls for performance, usability, and cross-environment deployment.

CERTIFICATIONS

- Microsoft Certified: Power Platform Developer Associate (PL-400)
- Microsoft Certified: Power Platform Functional Consultant (PL-200)

PROFESSIONAL EXPERIENCE

MICROGATE TECHNOLOGIES Pvt. Ltd | **Dynamics CRM Developer** | **Oct 2025 – Sep 2026**
Infosys BPM LIMITED | **D365 Technical Developer** | **Mar 2024 – Sep 2025**

PROJECTS

Accenture | **Dynamics CRM Developer** | **Oct 2025 – Sep 2026**

Project	Hospital Master
Role	Dynamics CRM Specialist
Module(s)	Customer Service
Tools	Workflows, Business Rules, Power Automate, Power Apps, CRM 2016, .NET Framework 4.5, SQL Server 2012, JavaScript

Description

Hospital Master serves as a reference implementation of a Customer Service Management solution built on the Microsoft Dynamics 365 Customer Service platform. Channel partners raise complaints via a missed call to the organization's registered toll-free number; these calls are handled by call center agents. Complaints were previously tracked outside the system in Excel and communicated to the relevant sales users by email or phone through the service managers at the call center.

Responsibilities

- Analyzed and mapped customer business requirements into Microsoft Dynamics 365 CRM solutions.
- Developed and implemented plug-ins and workflows to automate business processes and enhance system functionality.
- Configured workflows, business rules, and process automation within Dynamics 365 CRM.
- Built JavaScript web resources for client-side validations and form customizations.
- Debugged and troubleshot Dynamics CRM plug-ins, resolving technical issues.
- Performed solution export and import across Development, QA, and Production environments.
- Worked extensively with Teams, Access Teams, Security Roles, and field-level security configurations.
- Customized sitemap navigation to align with business requirements and user access needs.
- Used Ribbon Workbench for ribbon customization with Enable Rules and Display Rules.

Infosys BPM | Dynamics CRM Developer | Mar 2024 – Sep 2025

Project application	Microsoft – ETS PMO
Role	D365 Technical Developer
Module(s)	Sales, Customer Service
Tools	Workflows, Business Rules, Power Automate, Power Apps, Microsoft Copilot

Description

The ETS PMO is a centralized platform for tracking project finances, milestones, and risks, using Power Automate and custom workflows to streamline resource management and approvals. It integrates Canvas Apps within a Model-Driven framework to deliver a dynamic user experience secured by role-based access and client-side data validation.

Responsibilities

- Embedded Canvas Apps within Model-Driven Apps and managed components in the form designer.
- Developed plug-ins, workflows, custom workflow assemblies, and Business Process Flows for complex use cases.
- Implemented client-side validations and extensions using JavaScript and Business Rules.
- Created ribbon buttons via Ribbon Workbench and customized entities and sitemap navigation.
- Managed role-based security models and Power Automate flows.
- Analyzed client requirements and defined attributes, relationships, and views accordingly.
- Used Microsoft Copilot within Power Apps to accelerate low-code development and automate natural-language query processing for project data.
- Conducted feasibility and impact analysis of requirements and prepared Technical Design Documents (TDDs).
- Architected the PMO portal on Power Pages using Liquid templates for dynamic data rendering and Web API for Dataverse CRUD operations.
- Leveraged Microsoft Copilot and Copilot Studio to automate project summaries and natural-language queries.

Capgemini India Pvt Ltd | D365 Associate Software Developer | Apr 2022 – Feb 2024

Project	PDA (Personal Digital Assistance)
Role	D365 Associate Software Developer
Module(s)	Sales, Customer Service — CRM 2015, .NET Framework 4.5, SQL Server 2012, REST API
Tools	Workflows, Business Rules, Power Automate, Power Apps, Microsoft Copilot

Description

Delivered configuration, customization, and support for a Sales and Customer Service implementation, working across Agile and Waterfall delivery models with full documentation of configurations and workflows.

Responsibilities

- Participated in daily sync-up calls with the team.
- Configured entities, forms, views, workflows, business rules, and Business Process Flows.
- Defined and implemented security roles, business units, and access controls.
- Analyzed client requirements and defined attributes, relationships, and views.
- Created forms, entity lists, web pages, page templates, web templates, web roles, entity permissions, and localized content.
- Worked in Agile and Waterfall environments, participating in sprint planning and reviews.
- Documented all configurations, customizations, and workflows.

Capgemini India Pvt Ltd | D365 Junior Software Developer | Oct 2019 – Mar 2022

Project	Bio-Technology
Role	D365 Junior Software Developer
Module(s)	Sales, Customer Service — CRM 2015, .NET Framework 4.5, SQL Server 2012, REST API
Tools	Workflows, Business Rules, Power Automate, Power Apps

Description

Engagement for a British-based business selling elite genetics and bio-engineered products to cattle and pig farmers. Implemented and customized Microsoft Dynamics 365 to streamline sales and customer service processes.

Responsibilities

- Customized entities, forms, views, attributes, and entity relationships.
- Documented performance factors and overall solution design.
- Worked on Microsoft Flows, Business Rules, and Business Process Flows.
- Maintained data integrity through reduplication and cleansing strategies.
- Developed custom reports and dashboards using Power BI, SSRS, and Dynamics 365 reporting tools.
- Configured and customized holiday and service scheduling.
- Created, administered, and customized entities across the solution.
- Wrote CRM APIs and troubleshot the application, including Power Apps.
- Customized entities, forms, fields, views, and dashboards to improve user experience.

- Developed custom workflows in Microsoft Dynamics CRM.
- Deployed solutions from development to staging and higher environments.
- Implemented client-side customizations using JavaScript.
- Worked on workflows, Power Automate, and plug-ins.

First Meridian Global Services Pvt Ltd | D365 Junior Software Developer | Nov 2018 – Sep 2019

Project	CME Application (Airtel Payment Bank)
Role	D365 Junior Software Developer
Module(s)	Sales, Customer Service
Tools	Workflows, Business Rules, Power Automate, Power Apps, CRM 2016, .NET Framework 4.5, SQL Server 2012, JavaScript

Description

Architected an end-to-end Customer Management Experience (CME) platform for global banking, covering technical design through implementation and support using staged sprints. Integrated CRM 2016 with .NET Core and Web APIs to support scalable global sales development and lead conversion.

Responsibilities

- Created Teams and Access Teams; worked across Marketing and Sales modules.
- Customized entities and relationships based on the object data model.
- Developed custom entities, tabs, and 1:N / N:1 / N:N relationships with sub-grids and lookups.
- Authored system workflows to automate repetitive notes and custom workflow activities for bulk authorization.
- Conducted feasibility and impact analysis; prepared Technical Design Documents (TDDs).
- Developed a provider collaboration portal using Power Pages and client-side APIs to unify legacy patient data.

EDUCATIONAL QUALIFICATION

- B.Sc. Computers Science — National Degree College of Science, Gulbarga University.
