Career Objective

Experienced professional with over 6 years of hands-on experience, aiming to apply proven skills and best practices to solve complex business challenges, drive operational efficiency, and add measurable value to the organization.

Professional Summary

- 6 years of experience in **Microsoft Dynamics 365 CE and Power Platform**, including customization and configuration
- Involved across the full **application development life cycle** – analysis, development, deployment, support, and maintenance
- Strong experience in **customizing entities, fields, forms, views, relationships**, and solution components
- Hands-on experience with **data imports and CRM data management**
- Good working knowledge of **JavaScript** for client-side customizations
- Experience in developing and using **plug-ins** to extend Dynamics 365 functionality Hands-on experience with **workflows, business rules, and business process flows**
- Good understanding of **security roles and access management**
- Experience with **Ribbon Workbench** for command bar customizations
- Functional and technical experience in **Dynamics 365 Sales and Customer Service modules**
- Hands-on experience with **Canvas Apps, Model-Driven Apps, and Power Automate**
- Strong **troubleshooting and debugging skills**, with involvement in **two end-to-end implementations**
- Good communication, analytical, interpersonal, and presentation skills
- Strong team player with the ability to coordinate effectively
- Self-motivated and eager to learn new technologies and take on challenging tasks

Professional Achievements

- Delivered 3+ enterprise D365 implementations reducing manual processing time by **30–40%**
- Automated multiple business workflows using Power Automate, reducing data entry errors by **25%**
- Integrated D365 with external APIs improving system interoperability and user satisfaction.

Experience:

Swift Solution | Microsoft Dynamics CRM Developer

September 2020 – Present | Bangalore, India
Skills & Abilities:

MS Dynamics CRM Platform	Workflow, Plugins, Views, entity model, Security, Business rules, power automate, Power Apps, Microsoft Flows
Integrations	Web API, CRM Integration, Dataverse, SSIS, Kingsway Soft, Azure Logic Apps
Programming Languages	JavaScript, plugins, html, C#
Technologies	SQL, Power BI
Other Tools	XRM Toolbox, Ribbon Workbench

Project 4:

Project Name: Digital Customer Onboarding & Loan Management

Client: Bank of America

Technologies: Microsoft Dynamics 365 CE, Power Apps (Canvas & Model-Driven), Power Automate, C#, JavaScript, Plugins, SQL Server, Web API

Description:
Implemented a Dynamics 365–based digital onboarding and loan management solution for Bank of America to streamline customer acquisition, KYC processing, loan application tracking, approvals, and servicing. The solution improved operational efficiency, reduced manual processing, and ensured compliance with banking security standards.

Roles & Responsibilities:

- Customized entities, fields, forms, views, and relationships for customers, accounts, loans, and KYC data
- Designed and implemented **Business Process Flows** for loan lifecycle management
- Developed **plugins** for eligibility checks, validations, and core business logic
- Used **JavaScript and Business Rules** for client-side validations
- Built **Power Automate flows** for approvals, notifications, and document processing
- Embedded **Canvas Apps within Model-Driven Apps** for customer data capture
- Configured **security roles, field-level security, and access teams**
- Managed data imports, cleansing, and CRM data maintenance
- Created custom ribbon buttons using **Ribbon Workbench**
- Participated in end-to-end implementation, UAT support, and production deployment

Project 3:

Project Name: Customer Service & Case Management System

Client: Wells Fargo

Technologies: Microsoft Dynamics 365 CE, Power Automate, JavaScript, Plugins, Web API

Description:
Worked on a Dynamics 365 Customer Service implementation for Wells Fargo to manage customer inquiries, complaints, disputes, and service requests. The system enabled centralized case handling, SLA tracking, and improved customer response times.

Roles & Responsibilities:

- Configured **Customer Service module**, case types, queues, and SLA policies
- Developed **workflows and Power Automate flows** for case routing and escalations
- Implemented **plugins** for SLA calculations and automated case updates
- Customized forms, views, dashboards, and reports for service agents and managers
- Used **JavaScript and Business Rules** for validations and UI enhancements
- Integrated external banking systems with Dynamics 365 using **Web APIs**
- Managed **users, teams, security roles, and access controls**
- Supported Agile ceremonies including sprint planning, reviews, and retrospectives
- Provided production support, issue resolution, and continuous improvements

Project 2:

Project Name: Hotel Reservation & Guest Experience Management

Client: Atlantis, The Palm – Dubai

Technologies: Microsoft Dynamics 365 CE, Power Apps (Canvas & Model-Driven), Power Automate, JavaScript, Plugins, Web API

Description:

Implemented a Dynamics 365–based hotel management solution for Atlantis, The Palm to manage guest profiles, reservations, check-in/check-out processes, service requests, and loyalty programs. The solution improved guest experience, optimized front-desk operations, and automated internal workflows across departments.

Roles & Responsibilities:

- Customized entities for **Guests, Reservations, Rooms, , Packages, and Loyalty Programs** • Designed and implemented **Business Process Flows** for guest lifecycle and reservation management
- Embedded **Canvas Apps within Model-Driven Apps** for front-desk and concierge operations
- Developed **plugins and JavaScript** for room availability checks, pricing rules, and validations
- Automated reservation confirmations, reminders, and service requests using **Power Automate**
- Configured **role-based security**, field-level security, and access teams for hotel staff
- Created custom ribbon buttons using **Ribbon Workbench**
- Managed data imports, data cleansing, and CRM data maintenance
- Integrated external hotel systems using **Web APIs**
- Provided end-to-end implementation support, UAT, and post-go-live enhancements

Project 1:

Project: Healthcare Customer & Service Management Platform

Client: Philips Healthcare

Technologies: Microsoft Dynamics 365 CE (Customer Service & Sales), Power Apps (Canvas & Model-Driven), Power Automate, JavaScript, Plugins, C#, SQL Server, Web API

Description:

Worked on a Microsoft Dynamics 365–based customer and service management solution for Philips Healthcare to support sales operations, service request management, equipment maintenance, and customer engagement. The solution enabled centralized tracking of customers, service tickets, medical equipment, and service contracts, improving operational efficiency and response times.

Roles & Responsibilities:

- Customized entities, forms, views, and relationships for **customers, medical devices, service contracts, and service cases**
- Implemented **Customer Service module** including case management, queues, and SLA tracking
- Developed **Business Process Flows** for service lifecycle and escalation handling
- Created **plugins and JavaScript** for validations, automation, and complex business logic
- Built **Power Automate flows** for case notifications, approvals, and service reminders
- Embedded **Canvas Apps** for field service and service engineers to capture service details
- Integrated Dynamics 365 with external systems using **Web APIs**
- Configured **security roles, teams, and field-level security**
- Managed data imports, data quality checks, and CRM data maintenance
- Participated in end-to-end implementation, UAT support, and production support

Education:

B.Sc (Computer Science) — Gulbarga University
