CAREER PROGRESSION

Schmersal Global Competence Centre, Pune | Nov 2021 - Present

D365 Functional Consultant (Promoted To: Project Manager)

- **System Configuration & Customization :** Design D365 CRM factors like Forms, Views, Dashboard, Charts, Fields (Columns), Entities (Tables), Complex Advanced Search Criteria Queries, Personal System settings options.
- **System Security** : Design & build Access as well as Security concepts such as User Profiles, Business Units, Teams, Access Teams, Security Roles, Field Security Profiles to maintain and adhere to System Security Protocols.
- **Business Logic Items :** Understand and Analyse Business Requirements, associated processes to translate them into possible and feasible D365 CRM solutions via Background / Real-Time Workflows, Business Rules, Business Process Flows.
- **Functional Support :** Serve as a First Point of Contact to users / customers for process functional issues and queries experienced whilst using D365 CRM Modules like Contact Center, Sales, Customer Service, Marketing, Field Service. Provide stand-by assistance post Go-Live during Hypercare phase.
- **Data Migration & System Integration :** Closely work with Developers & Solution Architects by providing inputs to maintain Data integrity & quality during Migration processes & Integration processes.
- **Testing :** Lead onsite User Acceptance Test (UAT) activity by liaising with users. Play a crucial role in System Testing (QA) by designing Test Cases and their Outcome. Documenting Functional bugs post replication step and reporting the same to Development team.
- **Training & Documentation :** Document & maintain Training materials for End-Users. Provide hands-on User Manuals for Business Processes to users. Drive virtual and offline Application Demo session presentations.

PROJECTS

1.Integration between MS D365 CE CRM & SAP ECC
2.Integration between MS D365 CE CRM & SAP S4/HANA

- **Requirement Gathering & Analysis :** Lead Client meetings to understand current Business processes and requirements to check, analyze how they can be incorporated into D365 CRM Solutions.
- **Scoping & Planning :** Define the Scope of the Project by determining the objectives, available resources, end goal which need to be achieved.
- **Phases using MS Project & Gantt Chart :** Design Project Plan and spread it across phases (Planning, Design, Implementation, Testing, UAT, Go-Live, Hypercare Support) by using tools such as MS Project, Gantt Chart.
- **Tracking & Monitoring :** Monitor the progress of each stage of the project adhering to project methodologies, quality benchmarks, and internal processes.
- **Reporting :** Provide regular project status updates to all the members & stakeholders. Gathering feedback from them positively.
- **Documentation :** Maintain in-detail project activities report with regards to each step and document the same for future references.
