PROFESSIONAL SUMMARY

- Results-oriented Microsoft Dynamics 365 F&O Functional Consultant with 6+ years of professional experience, including extensive experience in Supply Chain Management, business process analysis, functional consulting, D365 implementations, system integrations, and client-facing delivery.
  Currently working as a Functional Consultant – SCM at INTWO, with hands-on ownership of an end-to-end Microsoft Dynamics 365 F&O and Facilio integration project for Binghatti. Experienced in managing requirements directly with clients, preparing Functional Design Documents (FDDs), defining integration requirements, performing functional validation, and working closely with technical teams throughout the development and deployment lifecycle.
  Strong functional expertise across Procurement & Sourcing, Product Information Management, Inventory Management, Warehouse Management, Sales & Marketing, Procure-to-Pay, Order-to-Cash, and Accounts Receivable/Payable.
  Proven ability to bridge the gap between business stakeholders and technical teams, translate business requirements into functional solutions, identify process gaps, support testing and deployment, and deliver solutions aligned with business objectives.

PROFESSIONAL EXPERIENCE

INTWO - Functional Consultant – SCM | Microsoft Dynamics 365 F&O

JANUARY 2026 – PRESENT | BANGALORE

- Working as a D365 SCM Functional Consultant on an end-to-end integration project for Binghatti, working directly with client stakeholders and internal technical teams.
- Managing functional requirements and business process analysis for the integration between Microsoft Dynamics 365 F&O and Facilio.
- Taking functional ownership of multiple integration workstreams, from requirement gathering and process understanding through functional design, development coordination, testing, validation, and deployment support.
- Managing Quotation Integration requirements covering both Inbound and Outbound integrations, including business process analysis, data requirements, field mapping, functional specifications, testing, and issue resolution.
- Working on Cash Payment Integration, ensuring business requirements and transaction flows are clearly defined and correctly implemented across the integrated systems.
- Managing Product Consumption Integration, supporting accurate synchronization and processing of product consumption information between D365 and Facilio.
- Handling Material Request and Product Integration, including requirement analysis, business process mapping, data validation, functional specifications, and coordination with the technical development team.
- Working on Product Stocking / Inventory Integration, ensuring accurate flow and synchronization of product and inventory-related information between systems.
- Preparing detailed Functional Design Documents (FDDs) covering business requirements, process flows, integration scenarios, field mappings, validations, and expected system behavior.
- Acting as a key functional bridge between client stakeholders, business users, functional teams, and technical developers, ensuring clear communication and alignment throughout the project lifecycle.
- Working directly with the technical team to clarify functional requirements, evaluate proposed solutions, resolve functional queries, and validate delivered developments against business expectations.
- Supporting integration testing, functional validation, defect analysis, troubleshooting, and resolution across multiple integration scenarios.
- Conducting requirement analysis and identifying business/process gaps to ensure integration solutions align with the client's operational requirements.
- Coordinating functional activities across requirements, documentation, development, testing, and deployment to support successful project delivery.

Esco Lifesciecnes - Senior Functional Consultant – Microsoft Dynamics 365

DECEMBER 2024 – OCTOBER 2025

- Oversaw the end-to-end implementation of a new legal entity in Microsoft Dynamics 365 F&O, from requirements gathering through go-live.
- Managed and supported key D365 functional areas including Procurement & Sourcing, Product Information Management, Inventory Management, Sales & Marketing, Accounts Receivable, and Accounts Payable.
- Conducted detailed requirement-gathering workshops with business stakeholders to understand existing processes, business requirements, and expected system outcomes.
- Prepared Functional Design Documents (FDDs), Standard Operating Procedures (SOPs), user manuals, and training documentation.
- Performed FIT-GAP analysis in collaboration with Solution Architects to identify business requirements, system capabilities, gaps, and appropriate functional solutions.
- Led CRP, SIT, and UAT activities, coordinating with business users and project stakeholders to validate the implemented solution.
- Conducted comprehensive end-user training and knowledge-transfer sessions to support user adoption and successful implementation.
- Ensured effective integration of business processes within D365 to improve data accuracy, process consistency, and reporting efficiency.
- Delivered the full-cycle implementation within defined project scope and timelines.
- Streamlined business processes across sales, marketing, procurement, inventory, and finance-related functions to improve operational efficiency.

PROFESSIONAL EXPERIENCE

APLICA TECHNOLOGIES (INDIA) PVT. LTD. - Functional Consultant – Microsoft Dynamics 365

OCTOBER 2024 – NOVEMBER 2024 | BANGALORE

- Gathered requirements for the Transfer Order WMS process, unique barcode generation, and cycle counting functionalities.
- Analyzed and rectified faulty customizations impacting the Transfer Order WMS process, ensuring a smooth operational flow.
- Implemented license plate receiving tailored to client-specific warehouse operations.
- Demonstrated the Cycle Counting process to key stakeholders within the Warehouse team, ensuring user understanding and process alignment.
- Designed and implemented Pallet ID barcode customization to enhance quantity control and streamline warehouse activities.
- Handled D365 modules: Warehouse Management, and Inventory Management.
- Contributed to end-to-end process improvement for warehouse operations, aligning with the client's manufacturing and logistics requirements.

ROYALOAK - Functional Consultant – Microsoft Dynamics 365

23 SEPTEMBER 2024 – 27 SEPTEMBER 2024 | BANGALORE

- Joined Royaloak as a Functional Consultant – Microsoft Dynamics 365, aligned to D365 functional consulting and SCM.
- Due to organizational and business circumstances, the planned project allocation did not commence, and the engagement concluded during the initial joining period.

DXC TECHNOLOGY INDIA PVT. LTD. - Associate Professional – Functional Consultant

JULY 2020 – SEPTEMBER 2024 | BANGALORE

- Gathered and analyzed business requirements by engaging with key stakeholders and translating business needs into functional solutions within Microsoft Dynamics 365 F&O.
- Prepared Solution Design Specifications (SDS) based on business requirements and project objectives.
- Reviewed Business Requirement Specifications (BRS), identified functional gaps, and validated proposed solutions in collaboration with clients.
- Mapped diverse business scenarios within Microsoft Dynamics 365 F&O and coordinated with technical teams for required developments and customizations.
- Acted as the functional liaison between development teams and business users, ensuring requirements were clearly understood and solutions remained aligned with business expectations.
- Coordinated and allocated tasks among team members based on project priorities and workload requirements.
- Prepared detailed User Manuals and training documentation for business users.
- Conducted comprehensive end-user training sessions to facilitate effective adoption of D365 solutions.
- Delivered CRP, UAT, and SIT sessions for business users and process owners to validate business processes and support successful deployment.
- Supported functional analysis, issue resolution, stakeholder communication, and project delivery across D365-related business processes.

PROFESSIONAL EXPERIENCE

UNISYS INDIA PVT. LTD. - Technical Support Engineer

SEPTEMBER 2019 – JUNE 2020 | BANGALORE

- Received and analyzed client-reported issues through email and created appropriate support tickets.
- Managed and routed tickets across technology areas including Microsoft Dynamics 365, Power BI, Exchange, and Office 365.
- Collaborated with cross-functional technical teams to ensure timely resolution of client issues.
- Performed troubleshooting and problem analysis to address client concerns effectively.
- Developed strong client communication and stakeholder-management skills through direct interaction with users and internal support teams.
- Gained hands-on exposure to Microsoft Dynamics 365 and Microsoft technologies supporting enterprise client operations.
- Provided technical support for Catholic Health Initiative through Unisys, as a contractor from JoulestoWatts.
