PROFESSIONAL EXPERIENCE

PROJECT 1 — NEXT STORY GROUP | Functional Consultant

Project: Hospitality business focused on hotels and blended lifestyle spaces.

- Implemented core Finance and SCM modules including AP, AR, GL, Fixed Assets, Tax and Procurement & Sourcing.
- Mapped end-to-end financial workflows and supply chain configurations in D365 F&O; against Functional Requirement Documents (FRDs).
- Configured inventory parameters, item groups, procurement categories and vendor setup.
- Coordinated with technical teams on customizations, data entities and system integration points.
- Conducted functional testing, bug tracking, SIT and UAT.
- Provided day-to-day functional support, managed user escalations and supported post-go-live operational stabilization.

PROJECT 2 — VISTA HOSPITALITY GROUP | Functional Consultant

Project: Australasian hospitality management company.

- Handled delivery and end-to-end implementation of Microsoft Dynamics 365 Finance & SCM solutions following Microsoft Sure Step Methodology.
- Conducted comprehensive Fit-Gap analysis across finance and procurement/supply chain business processes.
- Configured purchase orders, inventory valuation models and vendor payment automation.
- Streamlined client supply chain and financial operations within D365 F&O.;
- Prepared Configuration Manuals, Software Design Documents (SDD), UAT test scenarios and end-user operational manuals.

PROJECT 3 — ACCENTURE | Functional Consultant

Project: Enterprise application support and functional enhancement delivery for large-scale D365 Finance and SCM deployments.

- Handled incident tickets, user service requests and application support within agreed SLA timelines.
- Configured and supported D365 SCM modules including Warehouse Management basics, Inventory Management, Logistics and Procurement & Sourcing.
- Managed master data setups for Main Accounts, Customer Masters, Vendor Masters, Bank Accounts, Fixed Assets and Released Products.
- Analyzed recurring functional issues in supply chain workflows and performed Root Cause Analysis (RCA).
- Developed FDDs for Change Requests involving product configuration and logistics tracking.
- Authored SOPs and comprehensive end-user operational documentation.

PROFESSIONAL EXPERIENCE — CONTINUED

PROJECT 4 — ROYAL OAK | Functional Consultant D365

Project: Furniture and home decor retailer with retail, logistics, warehousing and distribution operations.

- Provided ongoing functional application support for D365 Finance and Supply Chain Management.
- Analyzed and resolved production incidents across AP, AR, Cash & Bank, Logistics & Transportation, Warehouse Management (Basics) and Procurement & Sourcing.
- Conducted business process analysis to identify optimization areas in supply chain fulfillment, warehouse operations and inventory reordering.
- Collaborated with technical and cross-functional teams to resolve interface, data posting and workflow errors.
- Prepared FDDs for business process improvements and Change Requests.
- Assisted with functional training and knowledge transfer for client end users.

PROJECT 5 — INFOSYS | Sr Functional Consultant

Project: Enterprise-scale D365 Finance & Operations and SCM end-to-end implementation for global client operations.

- Led the end-to-end implementation lifecycle of Microsoft Dynamics 365 Finance & Supply Chain Management.
- Conducted business requirement workshops, scoping and Fit-Gap analysis to align procurement, warehousing and finance processes with standard D365 functionality.
- Prepared FRDs, FDDs and business process maps.
- Configured core Finance modules (GL, AP, AR, Cash & Bank, FA) and SCM modules (Procurement & Sourcing, Inventory Management, Warehouse Management basics, Product Information Management).
- Managed master data migration, data entity mapping, data cleansing and reconciliation for items, vendors, customers and opening balances.
- Executed SIT and Regression Testing and guided UAT sessions.
- Delivered end-user training, developed user manuals/SOPs and provided post-go-live hypercare support.
