AJAY MOTWANI

QA Engineer | Test Automation| Manual Testing | API Testing |

Pune, Maharashtra | +91 7028228522 | motwaniajay700@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented QA Engineer with 3+ years of experience in Automation, Manual and API Testing. Skilled in designing and executing test cases, validating REST APIs, and building automation scripts with Selenium WebDriver, Java, and TestNG using the Page Object Model (POM). Strong grounding in SDLC, STLC, Agile Scrum, and the full defect lifecycle, with a track record of collaborating across development, product, and support teams to ship high-quality releases.

TECHNICAL SKILLS

Automation Testing: Selenium WebDriver, Playwright, TestNG, Page Object Model (POM), Maven
API Testing: Postman, REST APIs, JSON Validation, CRUD Operations
Programming Languages: Java, JavaScript
Database: SQL, MySQL
Manual Testing: Functional, Regression, Smoke, Sanity, System, Cross-Browser Testing, Test Case Design & Execution, Bug Reporting & Tracking
Tools & Platforms: Jira, Bugzilla, ClickUp, OpenProject, Git, GitHub, Jenkins (CI/CD)
Methodologies: Agile Scrum, SDLC, STLC, Defect Life Cycle
AI Tools: ChatGPT, Claude

PROFESSIONAL EXPERIENCE

QA & Support Engineer — PatSeer *Sep 2024 – Dec 2025*

Project: AI-Powered Intellectual Property (IP) Research Platform | Domain: Intellectual Property

- Designed, developed, and maintained automated test scripts using Selenium WebDriver, Java, TestNG, and Page Object Model (POM) for critical business workflows, improving regression testing efficiency.
- Enhanced and maintained the automation framework by creating reusable methods, page objects, and utility classes to improve script maintainability and scalability.
- Executed automated test suites, analyzed test results, investigated failures, and worked with developers to resolve issues.
- Designed, executed, and maintained 500+ manual test cases for an AI-driven patent research and analytics platform used by global IP professionals.
- Performed Functional, Regression, Smoke, System, and Cross-Browser Testing to ensure application stability across releases.
- Validated advanced search, analytics, patent monitoring, and reporting workflows, including complex search filters, saved searches, exports, and data visualizations across multi-jurisdiction patent datasets.
- Logged and tracked defects in Bugzilla end-to-end, from identification through resolution verification, supporting on-time, high-quality releases.
- Provided production support by analyzing client-reported issues, reproducing defects, and coordinating with development teams to drive faster resolution.
- Collaborated with developers, product owners, business analysts, and support teams in an Agile environment to deliver high-quality releases on schedule.

QA Engineer — LnS Infusion *Dec 2023 – Aug 2024*

Project: Healthcare Product E-Commerce Platform | Domain: Healthcare / E-Commerce

- Performed API testing for CRUD operations using Postman, validating JSON responses, status codes, and business rules.
- Prepared and executed test scenarios and regression suites, tracking defects through to closure.
- Tested the healthcare e-commerce application across multiple web platforms to ensure consistent functionality and user experience.

QA Engineer — Appquarterz Technologies *Apr 2022 – Jul 2023*

Domain: EdTech & Correctional Rehabilitation

- Tested an e-learning platform integrated with multiple third-party learning applications.
- Created and executed 300+ test cases, ensuring high functional coverage across core modules.
- Performed end-to-end testing for learner enrollment, assessments, progress tracking, and certifications.
- Logged and tracked defects using ClickUp, collaborating closely with developers through to resolution.

EDUCATION

Bachelor of Computer Applications (BCA)

Sinhgad College, Pune

Savitribai Phule Pune University
