PROFESSIONAL SUMMARY

Results-driven **QA Engineer with 4+ years** of experience in Automation, Manual, API, Mobile, Database testing. Skilled in **Playwright with TypeScript, Selenium with Java**, API By using Postman & Swagger with **TestNG** and Cucumber-BDD framework. Passionate about delivering high-quality software and quickly adapting to new technologies.

TECHNICAL SKILLS

- **Testing Types:** Automation, Manual, API, Mobile, Database, Accessibility Testing.
- **Automation Tools:** Playwright (TypeScript), Selenium (Java).
- **Frameworks:** TestNG, Cucumber-BDD, Page Object Model (POM), Maven.
- **Languages:** Java, JavaScript and TypeScript.
- **API Testing:** Postman, Swagger, Rest Assured.
- **Database:** MySQL.
- **Tools:** JIRA, NVDA, JAWS, Git, GitHub, Jenkins.

PROFESSIONAL EXPERIENCE

QA ENGINEER:- ONE BCG JUNE 2023 - Present

- Experienced in writing test scenarios & test cases, preparing test data, Execute test cases, reporting defects in Jira.
- Performed Functional, Smoke, Sanity, Regression, GUI, Mobile, E2E, and UAT testing.
- Worked on agile methodology, collaborated in development team, participated in sprint planning, daily scrum call and retrospective meeting to deliver high quality software within deadlines.
- Developed and executed test script using Selenium with TestNG to enhance testing efficiency.
- Validated API functionality and performance using Postman and Swager ensuring seamless integration and adherence to business requirements.
- Reduced manual testing effort by automating regression suites.
- Wrote and executed SQL queries to validate backend data.
- Performed Android production build verification with positive flows.
- Used XPath Axes for handling Dynamic web elements.

QA ENGINEER:- ProAzure Software March 2022 - May 2023

- Analyzed business requirements, functional specifications, and user stories.
- Conduct comprehensive manual and automated test case executing using selenium to ensure product functionality and reliability.
- Defined test strategy, test plans, and estimation for testing activities.
- Prepared test reports, defect reports, and quality metrics.
- Provided test status updates to stakeholders.
- Conducted Accessibility testing by using NVDA and JAWS tools. Ensured application compliance with WCAG guidelines.
- Inside API testing Validate request parameters, response parameters, header, authentication & authorization, performance parameters and Idempotency.

PROJECT EXPERIENCE

1) Stateserv:- (Domain - Healthcare)

Roles and Responsibilities:

- Develop and implement detailed test plans, test cases and test strategies.
- Actively participate in agile ceremonies like sprint planning, daily stand-ups call and retrospectives.
- Successfully delivered multiple releases with high quality and minimal production defects
- Automate regression test cases using tools Selenium or Playwright for repetitive workflows (e.g. Creation of orders, recurring orders & patients).
- Document test result, issues and final testing outcomes in detail.
- Collaborate with stakeholders to identify critical workflow.
- Perform retesting and regression testing after bug fixes.
- Documented test result and provide final approval for deployment.
- Collaborate with developers to analyze API failures, response mismatch and performance issues.
- Test the application functionality, design and responsiveness on different devices & browsers.
- Identified, logged, and tracked defects using JIRA.
- Created and managed page object model (POM) to store project data and configured project details using Maven.

EDUCATION

Bachelor of Engineering (B.E)
