ASHWINI KARMANKAR

Software Development Engineer in Test | QA Automation Engineer | SDET

Pune, India | 8055143139 | ashwinikarmankar16@gmail.com | LinkedIn: https://www.linkedin.com/ak

Professional Summary

QA Automation Engineer / SDET with **3 years of experience** in manual testing, automation testing, API testing, regression testing, and defect management for web and mobile applications. Skilled in building and executing test cases, automating critical UI workflows with **Selenium WebDriver, Java, TestNG, Maven, Cucumber BDD, and Page Object Model**, and validating APIs using **REST Assured and Postman**. Experienced in **Agile Scrum** delivery, JIRA defect tracking, Git-based collaboration, Jenkins-based build validation, release readiness, and QA documentation across SDLC and STLC.

Core Skills

Automation: Selenium WebDriver, Java, TestNG, Maven, Cucumber BDD, Page Object Model, UI Automation, Regression Automation
Programming / Database: Core Java, OOP Concepts, Collections, Exception Handling, SQL
API Testing: REST Assured, Postman, REST API Testing, Request/Response Validation, Status Code Validation
Manual Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Usability Testing, Retesting
Test Design: Test Planning, Test Scenarios, Test Cases, Test Data Preparation, Test Execution, Test Evidence
Defect Management: JIRA, Defect Reporting, Defect Tracking, Bug Verification, Defect Lifecycle
Tools / Platforms: Jenkins, Git, JIRA, Windows, Linux
Methodologies: Agile Scrum, SDLC, STLC, Cross-functional Collaboration
Domains / Applications: Web Application Testing, Mobile Application Testing, E-commerce Application Testing

Professional Experience

Addvic Technology Pvt. Ltd. - Software Automation Engineer

Pune, India | July 2023 - Present

- Designed and maintained test plans, test scenarios, test cases, and test scripts for web and mobile application features based on requirements and acceptance criteria.
- Performed functional, regression, smoke, sanity, usability, and retesting activities to validate application stability before production releases.
- Automated priority UI workflows using **Selenium WebDriver, Java, TestNG, Maven, Cucumber BDD, and Page Object Model**, improving regression coverage and reducing repetitive manual effort.
- Executed **API testing** using **REST Assured and Postman** to validate request payloads, response data, status codes, headers, and business rules.
- Logged, tracked, and retested defects in **JIRA** with clear reproduction steps, screenshots, severity, priority, and expected versus actual results.
- Supported build validation and regression execution through **Jenkins** and maintained test artifacts with **Git** for version control support.
- Collaborated with developers, business analysts, and **Agile Scrum** teams during requirement discussions, defect triage, sprint ceremonies, and release sign-off.
- Maintained QA documentation, test execution status, defect reports, and test evidence to support project reporting and release readiness.

Key Achievements

- Improved regression testing efficiency by automating frequently used and business-critical application workflows.
- Strengthened defect quality by providing detailed evidence, reproduction steps, severity, priority, and retesting results in JIRA.
- Contributed to stable releases through combined functional, regression, API, build validation, and cross-platform testing activities.

Projects

ElectroShop - E-commerce Website

Role: QA Automation Engineer | **Application Type:** Web-based E-commerce Application | **Domain:** Online Retail / E-commerce

Tools and Technologies: Selenium WebDriver, Java, TestNG, Maven, Cucumber BDD, Page Object Model, REST Assured, Postman, Jenkins, Git, JIRA, SQL

Project Overview: ElectroShop is an e-commerce application for electronic product shopping, covering customer workflows such as registration, login, product browsing, cart, checkout, payment status, order placement, and order tracking, along with admin workflows for products, inventory, discounts, and order management.

Modules Tested: Registration, Login, Product Catalogue, Product Search, Product Details, Cart, Wishlist, Checkout, Payment Status, Order Confirmation, Order History, Coupons, Inventory, Admin Product Management, and Order Management.

- Analyzed user stories and functional requirements to identify e-commerce test scenarios, validation rules, customer journeys, and business-critical workflows.
- Designed and executed test cases for registration, login, product search, filtering, cart updates, checkout, order placement, and order tracking.
- Validated positive and negative scenarios for form validations, mandatory fields, invalid login attempts, incorrect coupon codes, unavailable products, and payment status handling.
- Performed end-to-end testing of the purchase journey from product selection to order confirmation, including price calculation, discount application, quantity updates, and order summary validation.
- Verified admin-side workflows such as product creation, product updates, inventory changes, order status updates, and product availability on the customer-facing site.
- Automated high-priority regression scenarios using **Selenium WebDriver, Java, TestNG, Maven, Cucumber BDD, and Page Object Model** to improve consistency across release cycles.
- Performed **API testing** with **Postman and REST Assured** to validate product details, order data, user information, response status, and business flow behavior.
- Reported and tracked defects in **JIRA**, collaborated with developers for fixes, performed retesting, and supported release readiness with test execution status.

Education

Bachelor of Technology - Electronics and Telecommunication Engineering | 72.87%

Polytechnic - Electronics and Telecommunication Engineering | 72.06%

SSC | 68.20%

Certifications

Certified Software Tester Course - The Kiran Academy

Certified AWS Course - The Kiran Academy
