Summary

Results-driven Microsoft Dynamics 365 CRM Developer with 3+ years of experience delivering end-to-end digital transformation projects across the banking and financial sectors. Specialized in designing, customizing, and integrating customer-focused CRM solutions that enhance engagement, improve efficiency, and drive business growth. Proficient in system integration, solution design, and data migration, leveraging Dynamics 365, C#, SQL Server, SSIS, SSRS, and IBM MQ to build scalable, secure, and high-performance systems aligned with organizational goals.

Education

Ain Shams University — Cairo, Egypt

Bachelor of Engineering, Computer Engineering and Software Systems — 01/2017 - 01/2022

- GPA: 3.38, Excellent with Honor

Certificates

PL-600: Microsoft Power Platform Solution Architect
PL-200: Microsoft Power Platform Functional Consultant
PL-400: Microsoft Power Platform Developer Associate
PL-900: Microsoft Power Platform Fundamentals
AZ-104: Azure Administrator Associate
AZ-900: Microsoft Azure Fundamentals

Experience

Al Rajhi Bank (Employer: EJADA) — Riyadh, Saudi Arabia

Senior Dynamics 365 CRM / CE Developer — 08/2025 - Present

- **System Performance & Optimization:** Collaborated with Microsoft Cloud Solution Architects (CSAs) and DBAs to improve CRM performance, reliability, and scalability. Served as the primary escalation point for performance issues, leading proactive monitoring and ensuring system stability. Performed diagnostics across front-end/back-end servers, SQL Server, and IIS using CRM Diagnostics Tool, SQL Profiler, OrgDBOrgSettings, D365 Job Editor, and Event Viewer. Utilized Full-Text Search (FTS), optimized load balancers, registry settings, and maintenance jobs, and implemented archiving for large CRM tables to boost efficiency.
- **Team Leadership & Delivery:** Led a five-member team on CX Demand projects, working with business stakeholders, project managers, and solution architects to define scope, analyze requirements, and estimate timelines. Facilitated issue resolution, ensuring alignment and timely delivery, and achieved multiple successful go-lives within scope and deadlines.

Al Rajhi Bank (Employer: EJADA) — Riyadh, Saudi Arabia

Dynamics 365 CRM / CE Developer — 03/2023 - 07/2025

- **CRM Development & System Integration:** Developed and deployed a new Microsoft Dynamics 365 CRM system for Al Rajhi Capital, including dashboards, advanced customizations, and real-time integrations using Windows Services and IBM MQ for customer creation and updates. Published CRM websites on IIS, configuring application pools and identities for optimal performance and security. Designed and implemented an automated fraud detection and recovery system through custom CRM processes, plugins, and WCF SOAP services, enhancing customer transparency and operational efficiency. Managed data import/export for over 60,000 leads, improving CRM data accuracy and lead management processes.
- **Data Integration & Optimization:** Engineered and optimized ETL pipelines to migrate 300M+ records across 30+ tables, ensuring near real-time synchronization. Automated role management and access control, cutting license costs by 60%. Developed and maintained 30+ SSIS packages to support large-scale data integration. Designed and maintained 40+ SQL database tables, optimizing queries to enhance performance and efficiency. Built automated scripts for database setup, indexing, and logging, and managed user access and privileges to ensure secure, compliant operations.

EJADA Systems — Cairo, Egypt

Dynamics 365 CRM / CE Developer — 08/2022 - 02/2023

- **CRM Solution Design & Deployment:** Contributed to the end-to-end design and deployment of Microsoft Dynamics 365 CRM solutions across development, testing, and UAT environments. Prepared detailed deployment guides to ensure smooth and error-free transitions to production. Implemented customizations and UI enhancements using JavaScript, HTML, and CSS, improving usability and overall user experience.
- **Reporting, Security & Process Optimization:** Modified and developed SSRS reports and dashboards to align with evolving business requirements. Configured and managed security roles and access controls to ensure data integrity and compliance. Enhanced CRM workflows and business processes, improving system efficiency and supporting localized user experiences through customized translations.
