Professional Summary

Automation Test Engineer with **3+ years of experience** in Functional, Regression, UAT, and Automation Testing for Web and Mobile applications in the **Banking & Finance (NBFC)** domain. Proficient in **Selenium WebDriver with Java**, **Playwright with TypeScript**, **BDD Cucumber**, and **REST API Testing**. Proven ability to build robust automation frameworks, reduce regression cycle time, and collaborate effectively in Agile/Scrum environments.

Technical Skills

Automation Frameworks: Selenium WebDriver (Java), Playwright (TypeScript), BDD Cucumber, Hybrid Framework, TestNG, Maven
Testing Types: Functional, Regression, UAT, End-to-End, Web Testing, Mobile Testing (Android & iOS) using Appium
API Testing: Postman, Rest Assured
Programming: Core Java (OOPs, Collections, Exception Handling), TypeScript
Tools & Platforms: Azure DevOps, Eclipse, IntelliJ IDEA, Git, GitHub
Database: SQL (Basic Queries, Data Validation)
Domain: Banking & Finance (NBFC) – Housing Loans, Business Loans, Consumer Loans
Methodologies: Agile/Scrum, SDLC, STLC, Defect Life Cycle

Professional Experience

Software Test Engineer Jan 2023 – Present
Bajaj Finserv (via TeamLease → InnovSource → Direct Payroll) *Pune, India*

- Executed **Functional, Regression, UAT, and End-to-End testing** for web and mobile (Android & iOS) banking applications covering loan workflows, KYC, repayments, and payments modules.
- Designed and maintained automation test suites using **Selenium WebDriver with Java** and **Playwright with TypeScript** under Hybrid and BDD Cucumber frameworks, reducing manual regression effort.
- Developed reusable, modular automation scripts leveraging **Core Java OOPs concepts**, Collections, and Exception Handling to improve framework maintainability.
- Performed **API testing** using Postman and Rest Assured – validated request/response flows, status codes, and backend service integrations.
- Managed end-to-end defect lifecycle in **Azure DevOps**: created, tracked, and resolved defects while maintaining full requirement traceability and test coverage metrics.
- Conducted **mobile application testing (Using Appium)** on real devices and simulators across Android and iOS platforms for the 3-in-1 Bajaj Finserv super app.
- Validated backend data integrity using **SQL queries** against application outputs and API responses.
- Collaborated with BAs, Developers, and Scrum Masters in Agile ceremonies – sprint planning, daily stand-ups, retrospectives – and prepared test reports and defect metrics for stakeholders.

Key Project

3-in-1 App | *Bajaj Finserv – Banking & Finance (NBFC)* Jan 2023 – Present

- End-to-end quality assurance for Bajaj Finserv's unified digital platform offering loans, payments, investments, and insurance across **Android, iOS, and Web**.
- Tested critical banking workflows including loan origination, KYC verification, repayments, and third-party backend integrations ensuring zero critical defect escapes to production.
- Built and maintained a **BDD Cucumber + Selenium regression suite** to automate high-priority user journeys, enabling faster sprint release cycles.
- Collaborated in a cross-functional Agile team with 10+ stakeholders to align test coverage with business requirements and user acceptance criteria.

Education

Dr. Babasaheb Ambedkar Marathwada University (BAMU) June 2016 – October 2019
Bachelor of Engineering – Electrical, Electronics & Power *Aurangabad, Maharashtra, India*
