PROFESSIONAL SUMMARY

QA Automation/SDET Engineer with 3.7 years of experience in automation and manual testing across Healthcare and Shared Mobility domains. Skilled in automation framework design, UI/API testing, and CI/CD-driven quality assurance for web, mobile, and backend systems. Proficient in Selenium, Rest Assured, Postman, SQL, and Azure DevOps. Proven track record of reducing regression cycles by 60% and increasing automation coverage to 70%, ensuring high-quality and compliant applications.

TECHNICAL SKILLS

Programming Languages: Java

API Testing Tools: Postman, Rest Assured

Project Management Tools: Atlassian JIRA, Confluence

Test Case Management: TestRail

Automation Tools: Selenium, TestNG, Maven

Databases: MySQL, MongoDB

CI/CD & DevOps: Jenkins, GitHub, Azure DevOps

Core Skills: Automation Testing, Manual Testing, Functional Testing, Regression Testing, Smoke & Sanity Testing, End-to-End Testing, API Testing, Database Testing, Mobile Testing, Cross-Browser Testing, CI/CD, Agile Scrum.

CAREER SUMMARY

QA Automation Engineer

Hero MotoCorp Pvt. Ltd. Nov 2023 - Present

Project: Freedo Rentals, an initiative by Hero MotoCorp, is a two-wheeler rental platform offering flexible subscription and rental services. The platform includes customer-facing mobile and web applications (B2C), an admin web portal (B2B), and a Champion app for field executives to manage operations and services.

- Automated 1000+ UI, API, and web test scenarios, increasing automation coverage to 70% and reducing regression cycle time by 50-60%.
- Designed, developed, and maintained scalable automation frameworks using Selenium WebDriver (Java), TestNG with POM and hybrid approaches.
- Created and maintained test cases and test scenarios based on user stories and business requirements.
- Performed REST API testing using Rest Assured and Postman, covering positive and negative scenarios, and validating authentication, headers, payloads, and response schemas.
- Executed manual testing (functional, regression, end-to-end) across web and mobile applications to ensure application stability.
- Conducted backend database testing using complex SQL queries to validate data integrity across UI, API, and backend systems.
- Integrated automation tests into Jenkins and Azure DevOps CI/CD pipelines using Maven for faster releases.
- Logged, tracked, and managed 2000+ defects using JIRA/Azure DevOps; conducted test case and code reviews, and collaborated with cross-functional teams to ensure quality deliverables.
- Documented release features and enhancements to support smooth deployments.

Software Test Engineer

Cognizant Technology Solutions Pvt. Ltd, Pune May 2022 - Mar 2023

Project: CVS Health is a leading healthcare organization providing pharmacy services, health insurance (Aetna), and retail healthcare solutions. The project focused on validating healthcare and pharmacy applications to ensure quality, compliance, and seamless user experience while improving accessibility and reducing costs.

- Analyzed business requirements, user stories, and functional specifications to design test scenarios and test cases.
- Performed manual testing including functional, regression, sanity, and end-to-end testing.
- Executed test cases and logged, tracked, and retested defects using JIRA, ensuring proper defect lifecycle management.
- Prepared and maintained test data and ensured requirement traceability using RTM.
- Validated healthcare workflows and business rules using testing techniques like Equivalence Partitioning and Boundary Value Analysis.
- Participated in Agile Scrum ceremonies including sprint planning, daily stand-ups, and retrospectives.

EDUCATION

Bachelor of Engineering Nov 2020

Sant Gadge Baba Amravati University
