Ashvini Bais

QA Automation Engineer

baisashvini1503@gmail.com | +91 7499578534 | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Result-oriented Automation Test Engineer with over 4 years of experience in Manual, UI Automation, and API Testing across Banking and AdTech domains. Experienced in building and maintaining automation frameworks using Selenium WebDriver and Playwright. Proficient in Java, TestNG, REST Assured, Postman, SQL, and CI/CD integration with Jenkins. Strong understanding of SDLC, STLC, Agile Scrum, regression automation, defect lifecycle management, and cross-browser testing.

TECHNICAL SKILLS

Programing Language	Java, JavaScript
Automation Tools	Selenium WebDriver, Playwright
Testing Frameworks	TestNG, Page Object Model (POM), Data Driven Framework
API Testing	Postman, Rest Assured
CI/CD & Build	Jenkins, Maven
Version Control	GitHub
Defect Tracking	Jira, Azure DevOps
Database	SQL
Methodology	Agile Scrum, SDLC, STLC
Testing	Functional, Regression, Smoke, Integration, Ad-hoc
Browser	Internet Explorer, Firefox, Google Chrome

PROFESSIONAL EXPERIENCE

Software Testing Engineer | **Capco Technologies pvt. Ltd.**
April 2022 – Present • Pune

Easy Loan Processing System (Banking Domain)

Web-based loan management application handling loan lifecycle including application, verification, approval and disbursement. Contributed to automation framework development and regression suite implementation.

Media Campaign Engine (AdTech Domain)

Advertising campaign management platform for creating, monitoring and optimizing digital campaigns. Automated UI workflows and validated API endpoints for campaign analytics.

Roles and Responsibilities:

- Automated 70%+ regression test cases using Selenium WebDriver with Java and Playwright, significantly reducing manual testing effort and improving execution efficiency.
- Developed and maintained end-to-end UI automation scripts using Playwright for modern web applications, improving test reliability and execution speed.
- Designed and enhanced scalable automation frameworks using Selenium, Playwright, Page Object Model (POM), and Data-Driven framework for better scalability and maintainability.
- Performed API Automation Testing using REST Assured and Postman to validate backend services and improve API test coverage.
- Developed and maintained reusable automation components to improve test script maintainability and reduce duplication.
- Performed API automation and validation using REST Assured and Postman to improve backend service test coverage.
- Executed manual test cases and documented test results throughout the software testing lifecycle.
- Executed Functional, Regression, Smoke, Integration, System, and Ad-hoc testing throughout the software development lifecycle.
- Applied test design techniques such as Boundary Value Analysis (BVA) and Equivalence Partitioning (EP) to maximize test coverage.
- Performed SQL queries for backend database validation and data integrity verification.
- Integrated automated test suites with Jenkins as part of the CI/CD pipeline for continuous testing.
- Reported, tracked, and managed defects using Jira and Azure DevOps while collaborating with development teams for timely resolution.
- Participated actively in Agile Scrum ceremonies including Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives.
- Performed cross-browser automation and validation across Chrome, Firefox, Edge, and Internet Explorer using Selenium and Playwright.
- Collaborated closely with developers, business analysts, and product owners to understand business requirements and ensure high-quality software delivery.

Technologies: Java, Selenium, TestNG, SQL, AWS, React, Docker, GitHub Actions, Jenkins

EDUCATION

B.S.C with 7.9 CGPA
Dr. P. D. University, Akola, Maharashtra.
