BHAGWAT DORALE

SOFTWARE TEST ENGINEER

7038767059 – Pune, Maharashtra – bhagwatdorale8650@gmail.com

Professional Summary

Software Test Engineer with 4 years of experience supporting Java-based enterprise applications in the Banking and Retail domains. Experienced in **Manual Testing, Functional Testing, Regression Testing, Smoke/Sanity Testing, Integration Testing, API Testing, Database Testing, Test Case Design, Test Execution, Defect Management, Retesting**, and production issue validation.

Hands-on experience in **Automation Testing using Python, Selenium, PyTest**, reusable automation scripts, web element identification, assertions, automated regression testing, and basic end-to-end test automation. Strong knowledge of **SQL, Oracle, MySQL, REST APIs, Postman, Jira, Java, Spring Boot**, and Agile/Scrum.

Skilled in requirement analysis, application workflow validation, defect identification, data validation, automation of repetitive test scenarios, and collaboration with Development and QA teams.

Technical Skills

Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, UAT Support, API Testing, Database Testing, End-to-End Testing, Test Case Design, Test Scenario Preparation, Test Execution, Defect Reporting, Defect Tracking, Retesting, Bug Verification

Automation Testing: Python, Selenium WebDriver, PyTest, Web Automation, Test Script Development, Automated Regression Testing, Functional Test Automation, End-to-End Test Automation, Assertions, Web Element Identification, XPath, CSS Selectors, Reusable Automation Functions, Test Data Handling, Automated Test Execution

Test Management & Tools: Jira, ServiceNow, Postman, Defect Lifecycle, Test Documentation, Requirement Analysis, Test Data Validation, Test Reports

Programming & Database: Java 8/17, Python, SQL, Oracle, MySQL, SQL Server, Joins, Subqueries, Data Validation

API & Web Technologies: REST APIs, JSON, XML, Microservices, Spring Boot, Spring, Hibernate, JPA

Operating Systems: Linux, UNIX, Shell Scripting, PuTTY, PowerShell

DevOps / CI-CD: Jenkins, Docker, Kubernetes, Git, Bitbucket, Maven, CI/CD Pipelines

Monitoring: Splunk, Grafana, Kibana, Prometheus, AppDynamics, ELK Stack, AWS CloudWatch

Cloud & Application Servers: AWS (EC2, S3, RDS, Lambda, IAM, VPC, CloudWatch), Oracle WebLogic

Methodologies: Agile, Scrum, SDLC, STLC, Defect Life Cycle, ITIL

Professional Experience

Software Test Engineer **Oct'22 – Present**
Webicsoft India Pvt. Ltd., Pune

Project 1: Enterprise Banking Application Support
Client: ICICI Lombard **Domain:** Banking & Financial Services
Role: Software Test Engineer
Environment: Java, Spring Boot, REST APIs, Oracle, MySQL, Linux, AWS, Jenkins, Docker, Kubernetes, WebLogic, ServiceNow, Jira, Splunk, Grafana, Git, Maven

- Analyzed application requirements and business workflows and prepared test scenarios and test cases for functional validation.
- Performed **Functional, Smoke, Sanity, Regression, Integration, System, End-to-End, API, and Database Testing** for Java-based enterprise applications.
- Executed test cases across application workflows and validated expected results against business requirements and acceptance criteria.
- Automated repetitive web test scenarios using **Python, Selenium WebDriver, and PyTest** to reduce manual testing effort.
- Developed reusable automation functions for browser launch, web element interaction, data entry, validation, and test execution.
- Used assertions and automated validation to verify expected versus actual application behavior.
- Executed automated regression test scenarios and supported faster and more consistent regression validation.
- Validated REST API requests and responses using **Postman** and performed JSON/XML response verification for integration testing.
- Executed SQL queries on **Oracle and MySQL** for database testing, backend data validation, reconciliation, and defect investigation.
- Identified, documented, and tracked defects in **Jira/ServiceNow** with reproduction steps, expected versus actual

results, severity, and supporting evidence.
- Performed defect retesting and regression validation after fixes and coordinated with Development and QA teams for closure.
- Investigated application failures using WebLogic, application, Linux, and database logs and supported Root Cause Analysis (RCA).
- Validated application deployments, releases, rollback activities, and performed post-deployment smoke testing using Jenkins CI/CD pipelines.
- Worked with Development, QA, Infrastructure, Database, and Business teams to resolve defects and ensure timely delivery.

Project 2: Retail Supply Chain Management Platform
Client: Target Corporation **Domain:** Retail & Supply Chain
Role: Software Test Engineer

- Supported testing and validation of inventory management, order processing, warehouse operations, supplier integration, and logistics workflows.
- Performed **Functional, Regression, Integration, Data Validation, and End-to-End Testing** for business-critical application workflows.
- Executed SQL queries for test data validation, reconciliation, troubleshooting, and verification of backend transactions.
- Validated application releases, deployment changes, rollback activities, and post-production functionality.
- Investigated defects and production issues using application logs and monitoring tools and coordinated with Development and QA teams.
- Performed retesting after fixes and validated that changes did not impact existing functionality.

Education

Bachelor of Engineering
Babasaheb Naik College of Engineering (University of Amravati), Pusad, Maharashtra
2018 – 2021 **85.86%**

Core Strengths

Requirement Analysis — **Test Case Design** — **Test Execution** — **Defect Management**
API Validation — **SQL/Data Validation** — **Regression Testing** — **Root Cause Analysis**
Automation Testing — **Selenium WebDriver** — **Python** — **PyTest**
Automated Regression Testing
