CHETANA ASHISH CHAUDHARI

Contact: +91-9833058821 | Email: chetanac85@gmail.com

Software Engineer – QA (Manual & Automation) | API Testing | Banking & Payments

SYNOPSIS

- Brings **6 years 5 months** of solid experience in Manual & Automation Testing across high-impact **Banking and Payment Gateway** systems, ensuring accuracy, security, and seamless transactional performance.
- Demonstrates deep expertise in **API testing** (REST/SOAP), integration testing, card lifecycle validation, and multi-channel transaction simulation using industry tools like **Postman, SOAP UI, MasterCard & Visa simulators**.
- Known for designing comprehensive **test strategies**, building high-coverage test cases, and detecting critical defects early, resulting in fewer production issues and stronger application stability.
- Skilled in developing and maintaining **automation frameworks** using Selenium WebDriver and TestNG, improving test coverage and accelerating release cycles.
- Excels in cross-functional collaboration, working closely with developers, BA teams, and UAT stakeholders to ensure business logic, compliance standards, and system behaviour align accurately.
- Recognised for strong documentation, traceability, and audit readiness, while mentoring junior team members to uplift overall QA capability and productivity.

CORE COMPETENCIES

- Manual & Automation Testing
- API Testing (REST/SOAP)
- Functional, Integration & System Testing
- Debit Card Lifecycle & Payment Gateway Testing
- Test Case Design & Execution
- Test Planning & Strategy
- Regression & Smoke Testing
- User Acceptance Testing (UAT)
- Defect Reporting & Tracking (JIRA, Bugzilla)
- Test Documentation & Traceability
- Selenium WebDriver & TestNG Framework
- Postman & SOAP UI
- Card Transaction Simulation (MasterCard, Visa, Finsim)
- Performance & Load Validation
- Cross-functional Collaboration
- Problem-solving & Root Cause Analysis
- Quality Assurance in the Banking Domain
- Data Validation & Backend Verification

PROFESSIONAL EXPERIENCE

Software Engineer | Euronet Services India Pvt. Ltd., Thane
Sep 2020 – Present
Domain: Payment Gateway / Banking
Project: Debit Card Management System (DCMS)

Key Contributions:

- Executed end-to-end testing for Debit Card issuance, authorisation, settlement, limit management, and card lifecycle operations, ensuring correctness across all transaction flows.
- Performed extensive API testing (REST & SOAP) for key operations such as IssueNewCard, Card Status Change, PIN Create/Validate, Card Replacement, INSTA Issuance, Pin Mailer, and more.
- Utilised **Postman, SOAP UI** to create, automate, and validate API requests, including payload checks (JSON/XML), header validations, and response code verification.
- Conducted integration testing with backend systems, ensuring accurate data synchronisation across banking modules and transaction platforms.
- Leveraged **MasterCard, Visa, and Finsim simulators** to mimic multi-channel debit card transactions and validate system behaviour.
- Executed performance and load checks using Postman / JMeter to monitor API latency and system stability under peak volumes.
- Designed comprehensive test scenarios covering positive, negative, edge, and boundary cases, significantly improving defect detection in early cycles.
- Prepared high-quality test data for SIT/UAT environments and ensured compliance with business logic and regulatory requirements.
- Participated in UAT cycles with business teams, demonstrated API flows, resolved queries, and aligned system behaviour with business expectations.
- Authored and maintained detailed test cases, execution logs, and traceability documentation to meet audit-readiness and compliance standards.
- Logged defects in **JIRA**, collaborated closely with developers and BA teams for swift resolution, improving overall QA throughput.

Software Trainee Engineer | Shivyogkrupa Solutions Pvt. Ltd.
Jun 2019 – Aug 2020
Domain: E-commerce
Project: Dwarka Sai Wholesaler Retail Application

Key Contributions:

- Conducted functional and integration testing for modules, including Customer Information, Product Catalogue, Inventory Management, Billing, and Reporting.
- Prepared test data, wrote test cases, and ensured traceability across all functional scenarios.
- Managed defect reporting and lifecycle through **JIRA**, ensuring timely fixes and validation.
- Performed manual and automation testing using **Selenium WebDriver** and **TestNG**, contributing to improved test coverage.
- Validated workflows for manufacturers, distributors, sales, purchase, credit/debit notes, and inventory operations.

ACHIEVEMENTS

- Cleared UPSC Prelims and Mains during civil services preparation (2017–2021).
- Awarded "Pratibha Award" by the State Government of AP for securing 2nd rank in State E-CET.
- ISTQB Foundation Level Certification.

TECHNICAL SKILLS

Testing Skills:

- Test Case Design & Execution
- Functional, Integration & System Testing
- Regression, Smoke & UAT
- API Testing (REST/SOAP)
- Performance & Load Validation
- Defect Reporting & Tracking
- Test Documentation & Reporting

Tools & Technologies:

- Postman, SOAP UI
- JIRA, Bugzilla
- Selenium WebDriver
- TestNG Framework
- JMeter (basic)
- Android Studio (Flutter – App Development Basics)

EDUCATION | CERTIFICATIONS

Master of Computer Applications (MCA)

Certification
Manual & Automation Testing Certification
Squad Infotech, Thane – Completed August 2019

PERSONAL DETAILS

- **Date of Birth**: 03Sep1985
- **Languages**: Languages: English, Hindi, Marathi
- **Address**: Mumbai | Remote / Hybrid
