Chaitali Mirase

QA Automation Engineer

Pune, Maharashtra, India | 7720987997 | chaitalimirase29@gmail.com | www.linkedin.com/in/chaitalimirase-53462a202

SUMMARY

QA Automation Engineer with 3.9+ years of experience in Manual and Automation Testing of web and API applications, building and scaling end-to-end test automation frameworks across the SDLC and STLC. Specializes in Playwright and JavaScript, with strong hands-on expertise in Selenium WebDriver, Java, TestNG, and Behavior-Driven Development (BDD). Skilled in Functional, Regression, Smoke, Integration, System, and End-to-End Testing, Test Case Design, and Defect Tracking using JIRA and X-Ray within Agile/Scrum methodology. Experienced in API Testing using Postman and Swagger, integrating automated tests into CI/CD pipelines (Jenkins), and validating REST APIs. Collaborates closely with developers, product managers, and DevOps to shift testing left and improve release quality and speed.

TECHNICAL SKILLS

Automation Tools: Playwright, Selenium

Languages: JavaScript, Java

Testing Practices: Behavior-Driven Development (BDD), Regression Testing, API Testing, Page Object Model, STLC, Agile/Scrum

API & Tools: REST API Testing, Postman, JIRA, Git

CI/CD: Jenkins, TestNG

Collaboration: Slack, Cross-functional Agile Teams

PROFESSIONAL EXPERIENCE

Functionize Software, Noida, India

Project 1: Selenium & Playwright Test Automation| Oct 2023 - Jan 2026

- Developed and maintained automated test scripts using Selenium and Playwright for web and API applications.
- Led design, development, and execution of regression and runtime test suites validating product stability across environments and platforms.
- Built CI/CD pipelines in Jenkins, and designed test plans and regression suites for full coverage and early defect detection.
- Performed API testing, performance testing, and end-to-end automation, collaborating with product and DevOps teams on seamless releases.
- Analyzed regression results, identified critical defects, and partnered with developers on timely resolution and release readiness.
- Mentored junior QA engineers and reviewed automation scripts as part of cross-team quality initiatives.
- Reported and tracked defects using JIRA.

Project 2: UI Scripting / Codeless Automation (Functionize Platform) | Apr 2022 - Sep 2023

- Created and maintained UI automation tests using Functionize (no-code), designing end-to-end test scenarios with reusable components.
- Managed test cases in X-Ray, ensuring requirement traceability and test coverage.
- Executed regression and smoke test suites as per release cycles.
- Built test flows and captured actions, variables, and data reflected in the frontend UI for validation.
- Executed tests in headless, live, and debug modes with cross-browser validation.
- Logged and tracked defects in JIRA, collaborating with cross-functional teams in an Agile environment.

EDUCATION

Bachelor of Engineering, Sant Gadge Baba Amaravati University

CERTIFICATION

- Automation + Manual Testing Course - Q-Spider, Pune
