Professional Summary

Full Stack Developer with **3 years** of experience delivering secure, scalable web applications using **React**, **Node.js**, **MongoDB**, and **Spring Boot**. Proven success in modernizing legacy systems, implementing robust backend architectures, and enhancing frontend performance.

Skills

- **Experienced**: **Java** | **ReactJs**| **NodeJs**| **Springboot**| **Javascript** | **TypeScript** | **ExpressJS** | **MongoDB** | **GenAI** | **Rest API** | **Git**
- **Familiar: AWS | Docker | Python** | **CICD Pipeline** | **Jenkins** | **Agile Methodology** | **Android** | **GSAP** | **Framer-Motion** | **MUI**

Experience

Jr. Software Engineer, Cognizant Technical Solution (Sept 2023-Present)

- Contributed to the redesign of a legacy monolith into a modular, high-performance stack using **React**, **Node.js**, and **MongoDB**, improving load speed by 40% and maintainability across modules.
- Developed secure, scalable **REST APIs** with **Express**, applying layered architecture, request validation, and reusable middleware for clean code separation and security hardening.
- Optimized **MongoDB** queries through thoughtful schema design, indexing strategies, and aggregation pipelines to handle large datasets with low latency.
- Strengthened application security by implementing **JWT authentication**, input sanitization, rate-limiting, and protection against NoSQL injection and XSS attacks.
- Improved data flow consistency and UI responsiveness by integrating **Redux** and implementing intelligent caching strategies on the client side.
- Collaborated closely with QA, DevOps, and product teams; managed **Git-based workflows**, reviewed code, and ensured smooth delivery through **CI/CD pipelines** with GitHub Actions.

Software Engineer Trainee, Cognizant Technical Solution (Sept 2022-Aug 2023)

- Built and Maintained **backend API** with Java SpringBoot.
- Utilized **ReactJs to develop UI,** ensuring the seamless integration with APIs based on Client requirements.
- Conducted **Bug fixes** and enhancements across various modules to provide better user experience.

Projects

Translating Application & Ordering App

- Developed a multilingual app for translating regional languages, integrating audio playback for correct pronunciation and enhancing accessibility for diverse users.
- Built a food and beverage ordering app with cart management, dynamic menu updates, and local storage integration for smooth offline functionality.

Education

- B.Tech computer science | Noida Institute of Engineering and Technology | 2018 – 2022 – 74%
- XII | New Lancers Convent| 2017 – 2018 – 71%
- X | New Lancers Convent | 2015 – 2016 – 9.8CGPA

Certifications

- Certification in Python by E&ICT, Indian Institute of Technology, Kharagpur.
- Certification in Core Java by Udemy.
- Adobe UX certification by Adobe.
