IRANNA PUJARI

AUTOMATION TEST ENGINEER | QA AUTOMATION ENGINEER

Pune, Maharashtra | +91-9359414812 | testwithiranna25@gmail.com

PROFESSIONAL SUMMARY

Automation Test Engineer with 3.8+ years of experience in **Test Automation, Quality Assurance, Web, Mobile, and API Testing**. Strong expertise in **Java, Selenium WebDriver, TestNG, Cucumber BDD, RestAssured, Playwright, Appium, and API Testing**. Experienced in designing and maintaining **Page Object Model (POM), Hybrid, Data-Driven, and BDD Automation Frameworks**. Hands-on experience with **CI/CD, Jenkins, Maven, Git, Docker, AWS, SQL, JMeter, Jira, and Xray**. Skilled in **Functional, Regression, Smoke, Sanity, Integration, End-to-End, Performance, Load, and Database Testing**. Strong understanding of **SDLC, STLC, Agile/Scrum, Shift-Left Testing, Defect Life Cycle, and Continuous Integration**.

TECHNICAL SKILLS

- **Automation:** Selenium WebDriver, TestNG, Cucumber BDD, RestAssured, Playwright, Appium
- **Frameworks:** POM, Hybrid, Data-Driven, BDD, Keyword-Driven
- **Programming:** Java, JavaScript, SQL, OOPs, Collections, Streams
- **API Testing:** REST, SOAP, Postman, RestAssured, Swagger, JSON, XML, OAuth 2.0
- **CI/CD & DevOps:** Jenkins, Maven, Git.
- **Performance:** JMeter, Load Testing, Stress Testing, API Performance Testing
- **Database:** MySQL, PostgreSQL, Oracle, MongoDB, SQL, Joins, Stored Procedures
- **Testing:** Functional, Regression, Smoke, Sanity, Integration, UAT, E2E, Mobile, Cross-Browser
- **Tools & Reporting:** Jira, Xray, TestRail, Extent Reports, Allure, Log4j
- **Methodologies:** Agile/Scrum, SDLC, STLC, BDD, TDD, Shift-Left Testing

PROFESSIONAL EXPERIENCE

SDK INFOTECH PVT. LTD. | Dec 2022 – Present

Automation Test Engineer

- Architected and maintained **Java, Selenium WebDriver, TestNG, POM, and Hybrid Automation Frameworks**, reducing regression execution time by **85%**.
- Developed **BDD Automation** using **Cucumber and Gherkin** for business-critical workflows within Agile/Scrum teams.
- Automated **REST API Testing** using **RestAssured and Postman**, validating JSON/XML responses, HTTP status codes, authentication, and microservice integrations.
- Integrated **Jenkins, Maven, Git, and CI/CD pipelines** for scheduled automation execution, regression testing, and reporting.
- Implemented **Extent Reports, Allure, and Log4j** for detailed test reporting, logging, debugging, and failure analysis.
- Performed **Performance, Load, and Stress Testing** using **Apache JMeter** to identify response-time and database bottlenecks.
- Managed the complete **Defect Life Cycle** using **Jira and Xray**, including defect reporting, triage, retesting, and release validation.
- Performed **Mobile Automation Testing** for iOS and Android applications using **Appium, BrowserStack, and Sauce Labs**.
- Performed **Database Testing** using SQL, Joins, Aggregations, and Stored Procedures to validate backend data integrity.
- Collaborated with developers, business analysts, and QA teams throughout **SDLC/STLC**, sprint planning, test execution, defect resolution, and release cycles.

PROJECTS

PROJECT NAME – FINTECH DIGITAL BANKING & PAYMENT GATEWAY PLATFORM

Role: Automation Test Engineer
Technologies: Java, Selenium WebDriver, RestAssured, TestNG, Maven, Jenkins, Extent Reports, Oracle DB, Git

- Developed end-to-end **UI and API Automation** for authentication, account management, fund transfers, account statements, and payment gateway workflows.
- Designed and executed **450+ automated test cases**, reducing manual testing effort by **70%** per release cycle.
- Developed **RestAssured API Automation** for OAuth 2.0 authentication, payment processing, and third-party webhook validation.
- Implemented **parallel test execution using TestNG** across Chrome, Firefox, Edge, and Safari.
- Reduced regression execution time from approximately **6 hours to 45 minutes** through automation and parallel execution.
- Performed **SQL/Oracle database validation** to verify transaction and account data between application and backend systems.
- Integrated automation suites with **Jenkins CI/CD** for scheduled regression execution and test reporting.

PROJECT NAME – E-COMMERCE CLOUD & SUPPLY CHAIN MANAGEMENT SYSTEM
Role: Automation Test Engineer
Technologies: Java, Cucumber BDD, Playwright, Appium, JMeter, Docker, AWS S3, PostgreSQL, Jenkins, Jira/Xray

- Developed **Page Object model** using **Java, Cucumber, Gherkin, and selenium** for critical e-commerce user journeys.
- Automated product search, customer login, cart, checkout, order management, inventory, and fulfillment workflows.
- Performed **Mobile Automation Testing** using Appium across Android and iOS application workflows.
- Conducted **Performance and Load Testing** using Apache JMeter with simulated peak traffic of **10,000+ concurrent users**.
- Containerized automation environments using **Docker** and executed regression suites through **Jenkins CI/CD**.
- Performed **PostgreSQL database validation** using SQL queries to verify customer, order, inventory, and transaction data.
- Managed test cases, defects, regression cycles, and release validation using **Jira and Xray**.

EDUCATION

MASTER OF BUSINESS ADMINISTRATION (MBA) |2020 – 2022
Punyashlok Ahilyadevi Holkar Solapur University, Solapur
