Jasmeet Singh

Software Quality Analyst

jasmeet27052002@gmail.com +91-8448819551 linkedin.com/in/jasmeet-singh-099597275/

SKILLS

Languages: Python , Java

Technologies & Tools: Functional, Regression, Smoke, Sanity, System & End-to-End Testing, Manual & API Testing, Web & Mobile Testing (Android/iOS), Selenium (Java – Basics), Appium (Beginner), REST API Validation, SQL (Basic), HTML, CSS, DOM, JIRA, TestRail, Postman, Swagger, Git, Android Studio, Xcode, MS Excel, STLC, Test Case Design, Defect Life Cycle, Root Cause Analysis, Communication, Analytical Thinking, Problem Solving, Team Collaboration

WORK EXPERIENCE

Cars24 (CarInfo) | Delhi Jul 2024 – Present
Software Quality Analyst

- Transitioned from intern to full-time QA role based on performance and contributions.
- Performed end-to-end **manual testing** (functional, regression, sanity) for web and mobile applications.
- Designed, executed, and maintained detailed test cases and test scenarios
- Conducted **API testing using Postman**, validating request/response, status codes, and data integrity.
- Developed and executed **automation test scripts using Selenium WebDriver (basic level)**.
- Logged, tracked, and managed defects using JIRA, ensuring timely resolution with developers
- Collaborated closely with cross-functional teams to ensure **high-quality and on-time product releases**.

Cars24 (CarInfo) | Delhi Apr 2024 – Jun 2024
Quality Analyst Intern

- Gained hands-on experience in **manual testing** for web and mobile applications.
- Wrote and executed **test cases**, ensuring coverage of functional requirements.
- Identified, documented, and tracked bugs using **JIRA**.
- Assisted in **regression testing cycles** to maintain product stability after releases.
- Worked with QA and development teams to understand workflows and improve testing processes.

Kautelco Pvt Ltd | Delhi Nov 2022 – Feb 2023
NOC Engineer Intern

- Monitored and managed **network operations** from a centralized NOC environment.
- Identified and reported network issues, ensuring minimal downtime.
- Supported troubleshooting and basic network maintenance activities.

PROJECTS

CarInfo App – Mobile Automation Framework 2025

- Built an end-to-end **mobile automation framework** for Android and iOS using Selenium/Appium (basic).
- Automated **RC Detail page validations**, improving data accuracy and reducing manual testing effort.
- Implemented **screenshot capture and logging mechanism (Google Sheets integration)** for better test reporting and analysis.
- Designed reusable test flows to support **regression testing and faster release cycles**.

IOS UI Design (Practice Project) 2023

- Designed and developed **iOS user interfaces** using Xcode Storyboards and Interface Builder.
- Created responsive layouts and integrated **app assets, icons, and UI components**.
- Gained hands-on experience with **iOS design principles and UI/UX best practices**
