Kajal Shete

Automation Test Engineer

Pune | 91 8605553164 | E-mail | LinkedIn

PROFESSIONAL SUMMARY

Automation Test Engineer with 3 years of experience **in** Web and Windows Desktop automation testing**, with additional expertise in** manual testing and test Automation Framework Development**. Skilled in** Java, Selenium, TestNG, Maven, C#, NUnit, FlaUI, Appium WinAppDriver, POM, and BDD Cucumber**. Proven experience in** designing and developing automation frameworks from scratch for enterprise applications and automating complex web and desktop workflows**. Strong understanding of** test design, regression testing, defect lifecycle management, and Agile methodologies**.** Actively involved in executing automation and regression test suites for each release cycle to ensure application stability and quality.

TECHNICAL SKILLSs

Languages:	Java, C#
Automation Tools:	Selenium, FlaUI, Appium WinAppDriver, Coded UI, Cucumber.
Test Frameworks:	TestNG, NUnit, MSTest, Maven
Framework Design:	Page Object Model (POM), Data-Driven Testing, Hybrid Framework.
Automation Types:	Web Automation, Desktop Automation, BDD Automation
API & Database:	Postman, SQL (Basic)
Tools & IDEs:	GitHub, Visual Studio, Eclipse IDE, VS Code
Type Of Testing:	API Testing, Regression, Automation Testing, Manual Testing, QA Testing, Cross Browser Testing, Functional Testing.
Defect Management:	JIRA, Team Foundation Server (Azure DevOps).

PROFESSIONAL EXPERIENCE

Automation Test Engineer

Symtrax Software Private Limited
Sept 2023 -Present

- Automated **web and Windows desktop applications** using **Java, Selenium WebDriver, TestNG, Maven, C#, NUnit, FlaUI, and Appium WinAppDriver**.
- Worked on enterprise platforms including **Compleo Invoice Platform (CIP), WebSign, and Remote Agent**, automating critical business workflows.
- Designed and implemented **automation frameworks using Page Object Model (POM)** with reusable components to improve maintainability and scalability.
- Converted **1500+ manual test cases into automated scripts**, improving **regression coverage and execution efficiency by ~60%**.

- Executed **automation regression suites across 7+ projects** during release cycles and performed **Functional, Regression, Smoke, and Sanity testing**.
- Identified and tracked **150+ defects through automation using TFS / Azure DevOps**, ensuring proper defect lifecycle management and faster resolution.
- Created **robust XPath and locator strategies** and resolved issues related to **frames, popups, dynamic elements, and synchronization** to stabilize automation scripts.
- **Automated SAP GUI** processes using C# and Selenium/desktop automation tools, including document printing workflows through configured printers.
- Collaborated with **developers, and product teams in an Agile/Scrum environment** to ensure high-quality releases

---

Software Tester Intern

PHN Technology Pvt. Ltd.
May 2023 - June 2023

- Designed and executed **800+ manual test cases** covering Functional, UI, and End-to-End testing based on business requirements, improving **test coverage by ~60%** across multiple application scenarios.
- **Identified and tracked 50+ defects** through the complete defect lifecycle and collaborated with developers and QA teams during requirement analysis, test reviews, and regression testing to ensure stable and high-quality releases.

Data Annotator / Team Reviewer

Ideas To Impacts Digital
Nov 2021 – Aug 2022

Executed **image, video, and data annotation** using third-party tools and performed **dataset review and validation** to ensure high annotation accuracy, consistency, and overall data quality for machine learning models.

PROJECTS

CIP – Compleo Invoice Platform / Sync

Type: Web + Windows Desktop
Tools & Technologies: C#, Selenium WebDriver, FlaUI, NUnit, TFS, Page Object Model, Data-Driven Testing, Visual Studio IDE.

Description:
Compleo Invoice Platform (CIP) is an enterprise invoice processing and document automation system used to manage invoice generation, validation, integration, and synchronization across multiple business systems.

- Automated **web and Windows desktop modules** of CIP using **Selenium WebDriver, FlaUI, C#, and NUnit**, reducing manual testing effort by **~70%**.
- Designed and developed a **hybrid automation framework from scratch** using **Page Object Model (POM)** with reusable components and Utilities for scalable and maintainable automation.

- Implemented **data-driven automation testing using Excel and JSON** to validate dynamic scenarios and improve test coverage across multiple datasets.
- Integrated **Extent Reports with automatic screenshot capture** and executed **cross-browser testing** to improve test reporting and failure analysis.
- Automated **end-to-end functional and regression test suites** during release cycles, improving regression testing efficiency by **~60%** and stabilizing automation scripts.

Compleo WebSign

Type: Web Application
Tools & Technologies: Java, Selenium WebDriver, TestNG, Maven, Page Object Model (POM), Data-Driven Testing, Eclipse IDE, TFS.

Description:
Compleo WebSign is a digital document signing platform that enables users to upload documents, assign signers, place digital signatures or initials, and manage document approval workflows securely.

- Developed a **Selenium automation framework from scratch** using **Java, TestNG, and Maven**, implementing **Page Object Model (POM)** for scalable and maintainable automation.
- Designed **reusable framework components** for WebDriver management, browser configuration, and common element actions to improve framework stability and reusability.
- Automated **end-to-end WebSign workflows** including document upload, signer assignment, signature placement, document review, and document validation, reducing manual testing effort by **~60%**.
- Implemented **data-driven testing using TestNG DataProviders** and executed **cross-browser testing** to validate multiple scenarios efficiently.
- Maintained **functional and regression automation suites**, resolving issues related to **dynamic locators, synchronization, and UI changes** to improve script stability and reliability.

CERTIFICATIONS

- SDET - Software Development Engineer in Test – Plus Certificate
- Software Tester (Internship) Certificate
