Kalyani Manesh Khaire

QA Engineer
kalyanimshende@gmail.com | +91 7066328484 | India

PROFESSIONAL SUMMARY

Results-driven QA Engineer with 3+ years of hands-on experience in Manual and Automation Testing across Healthcare and Retail Banking domains. Proficient in Selenium WebDriver, TestNG, and Playwright with a strong foundation in Agile/SCRUM methodologies, SDLC, and STLC. Adept at identifying defects early, driving quality across releases, and collaborating with cross-functional teams.

CORE COMPETENCIES

- ✔ Manual & Automation Testing
- ✔ Selenium WebDriver & TestNG
- ✔ API Testing (Postman)
- ✔ Performance Testing (JMeter)
- ✔ JIRA Bug Tracking
- ✔ Page Object Model
- ✔ Agile / SCRUM
- ✔ SQL & Database Testing
- ✔ CI/CD – Jenkins & Git

TECHNICAL SKILLS

Operating System	Windows Family
Testing Types	Functional, Non-Functional, Regression, Retesting, Integration, Sanity, Security, Performance
Automation Tools	Selenium WebDriver, TestNG, Playwright (Basic)
Performance Testing	Apache JMeter (Thread Groups, Samplers, Assertions, Listeners, Timers)
API Testing	Postman
Bug Tracking	JIRA, ClickUp
Languages	Core Java (OOP), HTML, JavaScript
Database	MS SQL Server
DevOps / SCM	Git, GitHub, Jenkins CI/CD
Frameworks	Page Object Model (POM), Hybrid Framework, Maven
Testing Concepts	SDLC, STLC, BLC, Test Management

AUTOMATION TESTING EXPERTISE

- In-depth knowledge of Core Java (OOP) for test script development.
- Developed Maven-based projects using the Page Object Model (POM) framework.
- Created and maintained Selenium WebDriver scripts for regression and functional testing using Hybrid Framework.
- Hands-on experience with TestNG for test execution and report generation.
- Utilized Element Locators (XPath, ID, CSS Selectors) for robust object identification.
- Managed properties files for environment configuration and dynamic data handling.
- Basic proficiency in Playwright: application launch, page navigation, form validation, login automation.
- Familiar with Playwright locators (getByRole, getByText, CSS selectors), auto-wait mechanism, and cross-browser testing (Chromium, Firefox).
- Basic exposure to Playwright Test Runner and execution reports.
- Experienced in Non-Functional Testing: Performance, Load, Stress, and Scalability using JMeter.

MANUAL TESTING EXPERTISE

- Authored, reviewed, and executed comprehensive test cases using JIRA.
- Performed Sanity, Regression, Functional, Integration, System, and Game Testing.
- Raised and tracked defect tickets using JIRA.
- Executed API testing using Postman for REST endpoints.
- Strong knowledge of SQL Server for database validation and backend testing.

WORK EXPERIENCE

QA Engineer | NextGenVision Technology. | *April 2023 – Present*

Project I – Healthcare Management System

Project Title	Hospital Management System
Testing Methodology	Functional Testing, Regression Testing
Technology Used	Java, MS SQL Server, Selenium WebDriver
Bug Tracking Tool	JIRA, ClickUp

Description:

A comprehensive Hospital Management System developed for multi-specialty hospitals covering administration, patient management, and clinical processes. Designed to serve small clinics through large hospital networks.

Key Responsibilities:

- Participated in preliminary project discussions with the core team to understand requirements.
- Designed and maintained Selenium WebDriver automation scripts for regression and functional testing using Hybrid Framework.
- Developed test code in Core Java using Eclipse IDE and TestNG framework.
- Created test cases using Element Locators and Selenium WebDriver methods.
- Identified, reported, and tracked defects using JIRA.
- Executed browser compatibility and regression tests for every new build release.

Project II – Internet Banking (Core Banking System)

Project Title	Core Banking System (CBS)
Domain	BFSI (Banking, Financial Services & Insurance)
Testing Methodology	Functional Testing, Database Testing, Performance Testing
Technology Used	MS SQL Server, Selenium WebDriver
Bug Tracking Tool	JIRA

Description:

A unified Core Banking platform enabling financial institutions to manage accounts, transactions, loan processing, and customer data with a focus on scalability, security, and operational efficiency.

Key Responsibilities:

- Studied and analysed business requirements for the banking application.
- Developed manual and automated test cases covering account creation, transactions, loan approvals, and authentication.
- Automated test cases using Selenium WebDriver with the Page Object Model (POM) framework.
- Executed test cases, recorded results, and reported defects via JIRA.
- Conducted Functional, Regression, Security, and Performance Testing.
- Generated detailed test execution reports using TestNG.
- Participated in regular client meetings for requirement gathering, status updates, and reviews.

PERSONAL DETAILS

Full Name	Kalyani Manesh Khaire
Languages Known	English, Hindi, Marathi
