Professional Summary

QA Engineer with 4 years experience in manual and automation testing. Quality and excellence in software development through comprehensive testing and continuous improvement. Selenium WebDriver (Java) API Testing (Postman) Database Testing (SQL, Oracle) Functional, Regression, Smoke, and End-to-End Testing with good knowledge of Defect Management and Release Validation.

Proactive team player with good analytical, problem solving & communication skills, well versed in Agile Scrum environment. Works closely with stakeholders and cross functional teams to deliver reliable, stable & user centric applications with high standard of quality and within project timelines.

Technical Skills

Testing Skills:
Manual Testing, Functional Testing, Regression Testing, Automation Testing, API Testing, Database Testing

Automation & Frameworks:
Selenium WebDriver, TestNG, Maven

Programming & Database:
Java, SQL, Python, Neo4j

API & Integration:
API Validation, REST APIs, Data Validation

DevOps & Version Control:
Git, GitHub, Jenkins, CI/CD

Tools & Test Management:
Jira, Test Case Design, Defect Tracking, Test Planning

Other Tools:
Kafka, FileZilla

Professional Experience

Senior System Engineer | Infosys Limited **June 2022 – Present**

- Performed manual and automation testing using Selenium WebDriver with Java for web-based enterprise applications, improving overall testing efficiency by 30%.
- Designed, reviewed, and executed functional, regression, smoke, sanity, integration, and end-to-end test cases, enhancing release stability by 20%.
- Conducted API testing using Postman and validated backend data using SQL and Oracle database testing, reducing production defect leakage by 25%.
- Developed and maintained reusable automation test scripts using Selenium WebDriver, TestNG, and Maven, increasing test coverage by 40% and reducing manual effort.
- Identified, logged, tracked, and validated defects using Jira while collaborating with developers, business analysts, and QA teams, improving defect turnaround time by 35%.

Project Details

SRIMS(SingleResource Inventory Management System) **Oct 2022 - Present**

This project helps telecom companies keep all network details in one place. It tracks available and used resources, supports new customer connections, and ensures services are delivered correctly. The system reduces manual effort, avoids mistakes, and helps teams provide faster, reliable services to customers.

Roles and Responsibilities

- Performedmanualand automation testing using Selenium WebDriver with Java for web-based enterprise applications, improving overall testing efficiency by 30%.
- Designed, reviewed, and executed functional, regression, smoke, sanity, integration, and end-to-end test cases, enhancing release stability by 20%.
- Conducted API testing using Postman and validated backend data using SQL and Oracle database testing, reducing production defect leakage by 25%.
- Developed and maintained reusable automation test scripts using Selenium WebDriver, TestNG, and Maven, increasing test coverage by 40% and reducing manual effort.
- Identified, logged, tracked, and validated defects using Jira while collaborating with developers, business analysts, and QA teams, improving defect turnaround time by 35%.

CERTIFICATIONS

- Selenium WebDriver with Python—Infosys (Lex Course)
- SQL and Oracle Database—Infosys (Lex Course)
- Database Testing—Infosys (Lex Course)
- API Testing using Postman—Infosys (Lex Course)
- Neo4j Certification – Infosys (Lex Course)
- Infosys certified python associate (Lex Course)
- PL/SQL Foundation Course (Lex Course)

Education

Bachelor of Engineering (B.E.) *2016–2021*

Shivnagar Vidya Prasarak Mandal's College of Engineering, Baramati
