Mohammed Nazim Shaikh

Pune, India | +91 9673714987 | nazim.shaikh.0926@gmail.com | linkedin.com/in/nazimshaikh21

Summary

Automation Engineer experienced building Playwright automation frameworks Javascript, covering UI and REST/JSON API test coverage. Skilled in Page Object Model (POM) architecture, reusable fixtures, parametrized and data-driven testing using Excel/CSV/JSON test data, service mocking/stubbing, and environment-specific configuration management. Integrates automated suites into CI/CD pipelines (Jenkins, GitHub Actions) with Git and Docker in Agile Scrum teams.

Experience

Software Test Engineer Sep. 2023 – Jul. 2026

Ksolves India Limited *Pune, India*

- Designed and built Playwright automation frameworks in Javascript/Typescript using Page Object Model (POM), reusable fixtures, parametrization, and centralized configuration management for multi-environment execution.
- Automated end-to-end (E2E), UI, and regression test suites across Chromium, Firefox, and WebKit, reducing manual regression effort by approximately 30%.
- Built data-driven test suites by loading and parametrizing test data from Excel, CSV, and JSON sources, enabling scalable coverage across multiple input scenarios without duplicating test logic.
- Validated REST APIs and backend integrations directly from Playwright tests (request/response assertions, JSON schema checks), using Postman, request interception, and service mocking/stubbing to isolate environment dependencies.
- Integrated automated test suites with Jenkins and GitHub Actions, enabling parallel execution, retries, environment-specific configs, and CI/CD workflows with Git-based version control and Docker.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, SQL

Test Automation: Playwright (TypeScript), Selenium WebDriver, Appium, Pytest, Page Object Model (POM), Fixtures & Parametrization

API & Data-Driven Testing: REST/JSON API validation, Postman, Swagger, REST Assured, Excel/CSV/JSON data-driven testing, Locust

Environment & Mocking: Service mocking/stubbing, request interception, environment-specific configuration, dotenv

CI/CD & Tools: Jenkins, GitHub Actions, Git, Docker, BrowserStack, Allure Reports, JIRA, MySQL

Testing Practices: E2E, UI, Regression, Functional, Smoke, Sanity, Cross-Browser, Integration, UAT, Agile Scrum

Projects

Smart Hotel PMS & IoT Integration | *Playwright, TypeScript, Node.js, API Automation*

- Automated end-to-end web workflows using Playwright and validated Node.js microservice REST APIs and Tuya IoT integrations using mocked service responses, reducing manual regression effort by 30%.

Property Management Mobile Application | *Appium, Playwright, BrowserStack*

- Automated Android and iOS regression testing using Appium and BrowserStack, reducing regression cycle time by 40%.

Odoo E-Commerce Application | *Javascript, Playwright, Locust, Docker, Load Testing*

- Authored automated test scripts using Selenium WebDriver with Java, driven by externalized CSV/JSON test data, to improve regression test coverage.
- Identified performance bottlenecks through Locust load testing and supported optimizations that improved application response times by 20%.

Education

Sunbeam Institute of Information Technology (CDAC) Pune, India

Post Graduate Diploma in Advanced Computing (PG-DAC) *2022 – 2023*

Don Bosco College of Engineering Goa, India

Bachelor of Engineering *2014 – 2018*
