NEHAL MADAME

QA Automation Engineer | Selenium WebDriver | Java | Playwright | API Testing

Pune, Maharashtra | nehalmadame00@gmail.com | 8408004982 | LinkedIn Profile

Availability: Immediate Joiner

PROFESSIONAL SUMMARY

QA Automation Engineer with **3 years of experience** in Manual and Automation Testing across web and API platforms, specializing in **Selenium WebDriver** with **Java** and **Playwright** with **JavaScript**. Skilled in building automation frameworks using **TestNG** and **Cucumber (BDD)**, with hands-on experience in **Page Object Model**
(POM) design, data-driven testing, and **API testing using Rest Assured**. Automated **50+ critical test scenarios** and achieved **90%+ regression coverage** of critical business flows; partnered with DevOps to integrate automated regression suites into **Jenkins CI/CD pipelines**, reducing post-release defect escape rate by **40%**. Strong foundation in manual testing techniques (ECP, BVA, Decision Table Testing) and **Agile/Scrum** delivery. Recognized with a **Quality Award** for consistently delivering high-quality, defect-free releases. ***Immediate joiner, available to start without notice period.***

CORE COMPETENCIES / TECHNICAL SKILLS

Programming Languages: Core Java, JavaScript

Automation Testing Tools: Selenium WebDriver, Playwright

Automation Frameworks: TestNG, Cucumber (BDD), Page Object Model (POM), Data-Driven Testing Framework

API Testing: Rest Assured

Testing Types: Manual Testing, Automation Testing, Functional Testing, Regression Testing, Smoke Testing, Retesting, Cross-Browser Testing

Manual Testing Techniques: Equivalence Class Partitioning (ECP), Boundary Value Analysis (BVA), Decision Table Testing

Build & Dependency Tools: Maven

CI/CD & Execution: Jenkins, Selenium Grid, Docker, Parallel Execution

Version Control: Git, GitHub

Test Management & Bug Tracking: JIRA

Methodologies: Agile (Scrum), SDLC, STLC

Other Skills: XPath

PROFESSIONAL EXPERIENCE

Indium.tech, Hyderabad — Senior Test Engineer *Dec 2022 – Nov 2025*

Project: Uber Eats Application | Client: US Client | Domain: Transportation & Logistics

- Analyzed user stories and acceptance criteria to design comprehensive test scenarios and test cases for a global ride-hailing and food-delivery platform.

- Performed test case analysis and execution, preparing detailed test summary reports to communicate quality status to stakeholders.
- Automated 50+ critical test scenarios covering booking, payment, driver acceptance, ride tracking, and ratings flows using Selenium WebDriver with Java, integrated within a Cucumber BDD framework.
- Conducted end-to-end testing to validate navigation flows and confirm feature alignment with business requirements & handled various web elements along with date pickers & web tables.
- Developed data-driven automation scripts to validate user entries, restaurant onboarding, menu management, and order history workflows, achieving 90%+ coverage of critical business flows.
- Partnered with the DevOps team to configure Jenkins build pipelines that triggered automated regression suites post-deployment on staging environments, reducing post-release defect escape rate by 40%.
- Executed manual testing using Equivalence Class Partitioning (ECP), Boundary Value Analysis (BVA), and Decision Table Testing techniques to validate functional correctness.
- Performed smoke testing, functional testing, regression testing, retesting, and cross-browser testing, executing positive, negative, and edge-case scenarios to validate application behaviour under varied conditions.
- Contributed approximately 60% of testing effort to test automation (Selenium WebDriver with Java) and 40% to manual and functional testing, balancing speed and depth of quality coverage.

EDUCATION

Bachelor's Degree in Mechanical Engineering 2020

ADDITIONAL INFORMATION

Quality Award — Recognized for delivering high-quality testing and defect-free releases.
