Phone : 8140837095

Email : bhagatnikita369@gmail.com

Place : Mumbai

Professional Summary

Experienced and detail-oriented **Software Test Engineer with 3.5 years** of experience in the **Banking/BFSI domain**, specializing in **core banking** solutions and enterprise-level applications. Strong expertise in **manual and automation testing using Selenium WebDriver**, **Java, TestNG, and hybrid-driven frameworks**, with hands-on experience in **API testing** (**Postman**) and database validation using **MySQL** and **Oracle**. Proficient in requirement analysis, test planning, **RTM management, defect lifecycle management** through **JIRA**, and **CI/CD integration using Jenkins** and **GitLab CI within Agile-Scrum environments**. Demonstrated ability to ensure data integrity, regulatory compliance, and high-quality releases across retail **banking**, **lending**, and **government scheme** modules. **Currently seeking a challenging** testing role to leverage **automation, API, and database testing** expertise to drive quality and process efficiency.

Skills

- **Manual Testing**
- **Automation Testing**
- **Database Testing**
- **API Testing**
- **Writing Test Cases**
- **Defect Reporting**

Technical Skills

- Languages : Java, SQL, HTML
- Test Automation Tools : Selenium WebDriver
- Test Frameworks : JUnit, TestNG, hybrid driven framework
- API Testing Tools : Postman
- Build Tool : Maven
- Version Control : GIT
- CI/CD : Jenkins, GitLab CI
- Bug Tracking Tools : JIRA, TMT
- Methodologies : Agile - Scrum
- Databases : MySQL, Oracle
- Web Services : REST
- Operating Systems : Windows (7, 8, 10, 11), Linux

Professional Experience

C-EDGE Technologies (TCS-SBI Enterprise-Mumbai) — Software Test Engineer — Feb 2023- Present

Roles and Responsibilities

- Analyzed **business requirements** and **user stories** to design comprehensive **test scenarios, ensuring complete coverage** of retail, lending, government schemes, and back-office modules.
- Executed manual testing across core banking modules including **Savings/Current Accounts, Term Deposits, Agricultural Loans, Gold Loans**, **Housing Loans**, and **DBT integration**, identifying critical functional and regression defects.
- Developed and maintained automated **test scripts using Selenium WebDriver** and **Java**, validating end**-to-end banking workflows** and ensuring high accuracy in transaction processing and batch operations.
- Designed and implemented a **Hybrid Driven Automation Framework** using **Selenium WebDriver and TestNG**, combining data-driven and keyword-driven approaches to enhance test reusability, maintainability, and scalable regression execution.
- Conducted **API testing using Postman** to verify integration with **national payment gateways** (**UPI, IMPS**), **DBT schemes**, and insurance portals, ensuring seamless data exchange and compliance with RBI guidelines.
- Performed database testing using **MySQL and SQL to validate data integrity**, **interest calculations**, and NPA classifications across multiple banking modules.
- Conducted comprehensive **regression testing, system testing, smoke testing, Sanity Testing, Cross Browser Testing, integration testing, and functional testing** to ensure software quality.
- Created and maintained **Requirement Traceability Matrices (RTM)** to ensure complete coverage of business requirements, user stories, and **test cases**, enabling efficient **validation and tracking** of all functional and non-functional scenarios.
- **Designed, executed, and documented detailed test cases** and **test plans**, ensuring traceability to requirements and efficient coverage of functional and non-functional scenarios.
- Reported, tracked, and managed defects using **JIRA**, **collaborating** with developers and business analysts to ensure timely resolution and maintain system quality.
- Participated in **Agile ceremonies** including **sprint planning, daily stand-ups, and retrospectives**, contributing to continuous improvement of testing processes and on-time project delivery.

Lesics Engineers Pvt Ltd — Product Developer-Electrical Engineer — Sept 2021 - Oct 2022

Roles and Responsibilities

- **Designed and simulated innovative engineering** products using **SolidWorks 3D** and motion simulation, translating complex physics concepts into practical, user-friendly solutions.
- Managed patent documentation and **product development processes**, ensuring compliance, protecting intellectual property, and streamlining engineering workflows.

RK light — Quality Engineer, IQC — Sept 2020 to Aug 2021

Roles and Responsibilities

- Monitored process quality to ensure **strict compliance with customer requirements**, identifying deviations and implementing corrective actions to maintain standards.
- Prepared ballast **PDI reports and conducted electrical parameter** testing, ensuring accurate data capture and reliable product performance.

Education

Bachelor of Engineering (Electrical Engineering) Sardar Vallabhbhai Patel Institute of Technology, Vadodara, Gujarat CGPA- 9.0

Diploma (Electrical Engineering) Govt. Polytechnic, Daman (Ut) CGPA -9.2

Achievements

Star of Quarter award - Q1 from Cedge technologies.
