PROFESSIONAL EXPERIENCE

Automation Test Engineer — Accenture

Sept 2022 – Present

Payroll: Visionquest Solution Pvt. Ltd | Domain: Healthcare & Investment Banking

- Designed and developed a scalable automation framework using Playwright with JavaScript, implementing Page Object Model, reusable components, and fixtures
- Automated **200+** functional and regression test cases, significantly improving test coverage and reducing manual effort by 60%
- Integrated automation suite with Jenkins CI/CD pipeline, enabling scheduled and on-demand test execution
- Implemented parallel test execution, improving execution time and accelerating feedback cycles
- Developed and maintained Selenium WebDriver (Java + TestNG) scripts for legacy applications
- Performed cross-browser testing ensuring application stability across Chrome, Firefox, and Edge environments
- Conducted API testing using Postman, validating request/response payloads, authentication, and chaining workflows
- Executed database validation using SQL, ensuring data integrity across UI and backend systems
- Implemented retry mechanisms and tagging strategies to handle flaky tests and improve suite stability
- Generated detailed Allure and Playwright HTML reports for stakeholders with actionable quality insights
- Used Trace Viewer, logs, and screenshots for root cause analysis and defect debugging
- Collaborated in Agile ceremonies: sprint planning, daily stand-ups, and retrospectives
- Managed defects using JIRA, ensuring proper prioritization and complete lifecycle tracking

KEY PROJECT

OHUM SKY — Healthcare Platform **Accenture | 2022 – Present**

Tech Stack: Playwright (JS), Selenium (Java), Postman, SQL, Jenkins

- Built automation framework from scratch using Playwright with POM architecture
- Automated critical healthcare workflows including patient management and data processing
- Achieved **60% reduction** in regression effort through automation
- Integrated automation into CI/CD pipeline, enabling nightly regression runs
- Designed reusable utilities and fixtures for scalable and maintainable test scripts
- Supported legacy automation using Selenium WebDriver with TestNG
- Delivered test execution reports and quality insights to stakeholders

KEY ACHIEVEMENTS

- Reduced regression testing effort by **60%** through Playwright automation, freeing team bandwidth for exploratory testing
- Built and scaled end-to-end automation framework from scratch for a live healthcare platform with zero legacy dependency
- Automated **200+** end-to-end test scenarios across critical workflows, improving overall test coverage significantly
- Enabled CI/CD-based automated regression runs via Jenkins, accelerating release cycles and improving deployment confidence
- Improved early defect detection within sprint cycles, reducing production incidents and emergency hotfix releases
