PROFESSIONAL SUMMARY

Software Tester *September 2022 – July 2026*

Results-driven Software Tester and QA Engineer with **3+ years of experience** (3 Years 10 Months) in manual, automation, API, mobile, and performance testing across web and mobile applications. Adept at designing comprehensive test cases, managing defect lifecycles, and delivering quality products within Agile and SDLC/STLC frameworks. Proven track record of driving testing excellence across simultaneous projects in banking, brokerage, and gamification domains. Proficient in **Selenium with Java** automation testing.

SKILLS

- **Testing Types:** Manual Testing, Functional Testing, Regression Testing, Smoke Testing, API Testing, Automation Testing, Mobile Testing, Database Testing, Performance Testing, UI Testing
- **Automation & Performance Tools:** Selenium with Java.
- **Bug Tracking & Project Tools:** Redmine, JIRA

  Web Technologies: HTML, CSS, Bootstrap, REST API
- **Programming Languages:** C, C++, Java, JavaScript
- **Databases:** MySQL, MS SQL
- **Methodologies:** SDLC, STLC, Agile

WORK EXPERIENCE

Software Tester: *September 2022 – July 2026*

Paramatrix Technologies Ltd

- Executed end-to-end manual and functional testing across 4 concurrent production applications, maintaining high defect detection rates throughout the STLC.
- Designed, documented, and executed **200+ test cases** covering functional, regression, smoke, API, and mobile testing scenarios aligned with SDLC best practices.
- Developed and maintained automated test suites using **Selenium with Java**, reducing manual regression effort by improving test repeatability and coverage.
- Conducted **API testing** using REST API principles to validate data integrity, response accuracy, and error handling across backend services.
- Tracked, reported, and followed up on **150+ defects** using **Redmine** and **JIRA**, ensuring timely resolution and clear communication with development teams.
- Collaborated in **Agile** sprints, participated in requirement reviews, and coordinated task allocation across cross-functional teams of 4–7 members.
- Delivered quality assurance across mobile and web platforms, covering both Android and browser-based environments.

PROJECTS

Playmity — *Software Tester* | *Team Size: 12*
• Gamification-based sales performance system using game design elements to motivate bank sales representatives.
• Validated gamification logic and sales incentive workflows through comprehensive functional, smoke, and UI testing.
• Designed test scenarios covering edge cases in reward calculations, leaderboards, and user engagement flows.
Logged and tracked defects in Redmine, coordinating resolution to meet sprint delivery goals

Bulwark — *Software Tester* | *Team Size: 5*
Cloud Security Posture Assessment Platform
• SaaS-based platform to evaluate and improve cloud infrastructure security
• Enabled organizations to identify security gaps and compliance issues
• Performed functional and validation testing for security assessment features
• Ensured platform reliability for enterprise-level cloud environments

MSS- Massage Sending System — *Software Tester* | *Team Size: 3*
• MSS is an application to inform the client of HSL about their pending order via SMS and email.

EPPM – Enterprise Program and Project Management — *Software Tester* | *Team Size: 15*
• Enterprise application for centralized management of project and program operations
• Designed and executed test cases aligned with business requirements
• Ensured quality through defect tracking and regression testing

EDUCATION

B.Tech – Computer Engineering *2019 – 2022*
DBATU University **CGPA: 9.14 / 10**

Diploma – Computer Engineering *2016 – 2019*
MSBTE Board **71.56 %**

CERTIFICATIONS

• ISTQB Certified Tester Foundation Level.
• PMI ACP Exam PREP 28 PDUS/ Contact Hours Course 2025 Updated - Udemy
• Core Java – Full Course - Udemy
• Selenium With Java. – Udemy

ACHIEVEMENTS

- Awarded **"Para Super Star"** of the organization (2024) — recognized for exceptional cross-team collaboration and testing leadership.
- Awarded **"Para Star"** of the organization (2023) — recognized for outstanding individual performance in QA delivery.
- Recognized for sustained testing excellence across multiple high-priority simultaneous projects.
