PROFILE SUMMARY

QA Engineer with 4 years of hands-on experience in manual and automation testing, production deployment, and release management. Proven track record in functional, regression, smoke, and UAT testing across financial-domain applications. Skilled in Selenium WebDriver, Java, SQL, and Jira with solid command of SDLC and STLC processes in Agile/Scrum environments. Adept at designing test plans, executing test cases, managing defect life cycles, and collaborating with cross-functional teams to deliver stable, high-quality software releases.

SKILLS

Manual Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, UAT Testing, Retesting, Test Case Design, Test Execution, Defect Life Cycle.

Automation : Selenium WebDriver, Java, TestNG, Maven.

API & Database Testing: API Testing, REST API, Postman, SQL/MySQL, Data Validation.

Tools: Jira, Git, CI/CD, JMeter.

Methodologies: SDLC, STLC, Agile/Scrum.

WORK EXPERIENCE

Quantum Assets Management Company Pvt. Ltd.

Software Engineer — Manual & Automation Testing 2021 – 2026

- Designed, prepared, and executed **test cases, test scenarios, and test scripts** based on business and functional requirements.
- Performed **Functional, Regression, Smoke, Sanity, and UAT testing** to validate application functionality, quality, and stability.
- Developed and maintained **automation test scripts using Selenium WebDriver with Java, TestNG, and Maven** for web application testing.
- Executed automated test suites and analyzed test results to identify functional issues and regression defects.
- Performed **API testing** and validated request/response data to ensure system integration and data accuracy.
- Verified **data integrity using SQL** and identified data-related issues.
- Logged, tracked, and retested defects using **Jira** through the complete defect lifecycle.
- Followed **SDLC/STLC and Agile methodologies** and maintained audit-compliant testing documentation.
- Participated in **requirement analysis, test planning, execution, defect management, and release validation** activities.
- Collaborated with **Development, QA, Business, and Deployment teams** to resolve application and production issues.
- Reviewed **release notes, deployment documents, and technical documentation** before production releases.
