Career Objective

Innovative and results-driven Python Full Stack Developer with 1.6 years of experience in building scalable web applications, integrating AI/ML workflows, and data engineering. Skilled in developing responsive frontends, secure backends, and seamless API integrations, while working with modern frameworks like React, Django, and FastAPI. Experienced in end-to-end machine learning workflows, from data preprocessing to model deployment, with hands-on expertise in GenAI tools such as OpenAI API and Hugging Face. Passionate about creating intelligent, high-performance systems that combine web development with AI-powered solutions.

Education

DY Patil International University — Akurdi, Pune, India
B.Tech in Computer Science; CGPA: 7.9/10 — *2019 – 2024*

Balaji Junior College — Nagpur, India
Class XII (Maharashtra Board); 65.9% — *2018 – 2020*

St. Anne's Public School — Chandrapur, India
Class X (CBSE Board); 60% — *2017 – 2018*

Experience

Python Full Stack Developer — April 2025 – September 2025
Geta AI Labs Pvt. Ltd.

- Designed and implemented full-stack AI-driven web applications integrating Python (Django/Flask) backends with modern frontends (HTML, CSS, JavaScript) for AI-driven platforms.
- Engineered and optimized data pipelines for complex time-series and multimodal datasets, ensuring seamless integration into AI workflows.
- Developed and deployed APIs to support large-scale AI research platforms, integrating GPT-based models for intelligent automation. Built an AI-powered WhatsApp Template Generator with Variations, enabling dynamic template creation, content personalization, and automated distribution.
- Created an AI Translator tool capable of accurately translating multilingual text with contextual understanding, improving accessibility for global users.
- Implemented robust authentication, secure API communication, and error handling for high-reliability production systems.
- Integrated LLM-based features (chatbots, translators, summarizers) using OpenAI API into production-ready applications.
- Collaborated with ML teams to streamline end-to-end ML workflows from data ingestion to model evaluation.

AI Intern — Jan 2025 – March 2025
Nikqik Technologies

- Integrated AI Models & Agents: Developed and deployed AI models and algorithms with AI agents to enhance automation and intelligent decision-making.
- Optimized Machine Learning Pipelines: Designed and fine-tuned AI-driven solutions, ensuring high accuracy and performance in real-world applications.
- Implemented API Integrations with python: Developed and integrated REST APIs to facilitate seamless data exchange between AI models and web-based platforms.
- Enhanced AI System Efficiency: Debugged and optimized AI applications, ensuring robustness and scalability for deployment.

Research Associate — June 2024 – Dec 2024
Megamind's IT Services

- Produced High-Quality, Data-Driven Research: Developegitd and delivered data-driven research content for various platforms, ensuring accuracy and alignment with organizational goals, while leveraging advanced analytical tools like Python along with Machine learning and networking domain.
- Collaborated with Technical Experts: Partnered with subject matter experts in machine learning and networking to gather technical input and feedback, leading to refined and impactful research outcomes.
- Edited and Optimized Content: Edited and proofread technical documents for clarity, coherence, and SEO optimization, improving visibility and engagement with the target audience.
- Managed Projects and Version Control: Utilized strong project management skills and tools like Git/GitHub for version control, ensuring seamless collaboration, version tracking, and successful project delivery.

PROJECTS

ServiceNow RAG Q&A| *Python, RAG, LLM, Qdrant, REST* Sep 2025

- Built a RAG backend to answer natural-language questions over ServiceNow tickets using embeddings + vector search, with grounded answers and citations to exact tickets.
- Implemented keyword + structured filters (severity, status, assignee, location, category) and returned rich context (ID, title, priority, status, assignee, CI, site, remediation notes).
- Exposed /ask and /retrieve REST endpoints with bearer-token auth for Streamlit; designed clean request/response schemas and robust error/empty states.
- Delivered a Streamlit web UI (chat/search) with filter chips, sample prompts, copy-answer, and deep links to ServiceNow tickets.
- Built scheduled incremental ingestion from ServiceNow (read-only), with token-scoped access for Support users and logs/observability to track retrieval/answer quality.

PDF Q&A Assistant | Python, *LLM, RAG, LangChain* Aug 2025

- RAG & LLM Operations: LangChain orchestration, OpenAI GPT integration, prompt/parameter tuning (temperature, top-p).
- Vector Search & Embeddings: FAISS similarity search, OpenAI embeddings, retriever configuration and relevance tuning.
- Web App Development: Streamlit UI/UX, session state management, real-time conversational interfaces
- Voice Interfaces: Speech recognition (SpeechRecognition/PyAudio) and text-to-speech (gTTS) with in-app audio playback.
- Privacy & Security: PII detection/redaction (regex guardrails), safe input/output handling, error resilience.

Air Quality Prediction System | *XGBoost, LSTM, Streamlit, OpenAI* July 2024

- Developed a web-based attendance monitoring system using Python, Django, and MySQL to manage student and teacher attendance.
- Implemented role-based authentication allowing teachers to approve/reject leave applications and generate attendance reports.
- Designed a user-friendly interface using HTML, CSS, JavaScript, and Bootstrap for smooth navigation.
- Integrated leave management and attendance tracking system to automate record management and improve efficiency.

AI-Powered Attendance Monitoring System | *Python, Django, MySQL* Feb 2024

- Developed a web-based attendance monitoring system using Python, Django, and MySQL to manage student and teacher attendance.
- Implemented role-based authentication allowing teachers to approve/reject leave applications and generate attendance reports.
- Designed a user-friendly interface using HTML, CSS, JavaScript, and Bootstrap for smooth navigation
- Integrated leave management and attendance tracking system to automate record management and improve efficiency.

Automated Skin Lesion Classification | *CNN, DenseNet, Python* May 2023

- Developed and compared CNN and DenseNet models for skin lesion classification using deep learning techniques in Python.
- Achieved over 92% accuracy on the HAM10000 dataset.
- Applied comprehensive model evaluation and optimization strategies for machine learning model development.

TECHNICAL SKILLS

Languages: Python, HTML, CSS, SQL, MySQL
Data Analysis and Visualization: Power BI, Excel, Pandas, Matplotlib, Seaborn.
Data Management: Data Preprocessing, Data Cleaning, Transformation, Quality Control
Frameworks: Django, Flask, FastAPI, Bootstrap
Libraries: NumPy, Pandas, Scikit-learn, Keras, TensorFlow, PyTorch, OpenCV, MediaPipe, AutoPy, Seaborn, Matplotlib, Plotly, Scrapy, LangChain
RAG & LLM: RAG architecture, Prompt engineering, Embeddings (OpenAI/Claude), LangChain/LlamaIndex
APIs & Web Technologies: RESTful APIs, OpenAI API, Web Services, Microservices, Web Scraping, Data

Visualization
Databases: MySQL, SQL, NoSQL
Cloud & DevOps: AWS, Azure, Docker, Containerization, Git, GitHub, Version Control
Development Tools: Jupyter Notebook, Anaconda, VS Code, PyCharm, Postman, Power BI, Spreadsheets.
Development Practices: Agile Development, Object-Oriented Programming, Test-Driven Development, Code Reviews, Data Pipelines
Soft Skills: Problem-Solving, Team Collaboration, Technical Proficiency, Time Management, Critical Thinking, Troubleshooting, Excellent Communication and Presentation Skills.

CERTIFICATES & TRAINING

Generative AI Mastermind — Outskill
Hands-on training in LLMs, AI Agents, MCP, and real-world Generative AI Application

Python Training — Java By Kiran
Completed an in-depth training program on Python

Cloud Computing Certification — NPTEL
Certified in cloud architectures, deployment models, and security best practices

Python Certification — Kaggle
Earned certification by completing hands-on ML and data analysis projects

PERSONAL DETAILS

Name: Prajwal Thawari
Date of Birth: 24-04-200
Gender: Female
Nationality: Indian
Languages: English, Hindi, Marathi

DECLARATION

I hereby declare that the information provided above is accurate and true to the best of my knowledge.
