Pranoti Parwe

Software Test Engineer

Email: pranotiparwe2017@gmail.com
Call: +91- 7387102789

Experience and Profile Summary

- ISTQB-certified QA Analyst / Automation Test Engineer with 4+ years of experience in manual and automation testing of web and mobile applications.
- Proficient in Playwright with JavaScript and TypeScript, with strong expertise in Selenium, TestNG, Page Object Model (POM), Data-Driven, and Behavior-Driven Development (BDD) frameworks.
- Skilled in designing and executing test plans, scenarios, and cases based on Business Requirement Documents (BRDs), covering both positive and negative workflows.
- Experienced in API testing using Postman, and adept with JIRA and Azure DevOps for defect tracking, test management, and project collaboration.
- Strong background in functional, regression, unit, smoke, and cross-browser testing, ensuring high-quality deliverables and extensive test coverage.
- Effective communicator with experience preparing and presenting daily status reports to enhance transparency and team collaboration.
- Proven ability to work across Agile/Scrum environments, ensuring efficient and timely release cycles.
- Analytical and detail-oriented, with a focus on evaluating and adopting new tools and practices to improve QA efficiency and automation coverage.
- Recognized for being self-motivated, quality-focused, and committed to continuous learning and process improvement.

Technical Skills

Programming Languages	Java
Database	Oracle SQL
Version Controller	Git, GitHub
IDE / Tools	Eclipse, Intelli j, Visual Studio Code
Operating System	Windows, Linux
Other	Jenkins, Agile, Jira, Office365, Microsoft Azure

Experience

1) Bajaj Finserv

Project	BPES
Tech Stack	Java Script, Type Script, Playwright, Java, Selenium, BDD, Cucumber, Microsoft Azure
Team Size	50
Duration	July 2022 – Present

Project

Tittle - BPES (Business Partner Enrollment System)

Short Summary:
BPES is a digital platform designed to scale and enhance Bajaj Finserv's business network. It offers an automated, streamlined, and integrated onboarding process with enhanced security and compliance.

Roles and Responsibilities:

- Ensure and perform end to end Regression suite
- Designed and executed test scenarios for web and mobile applications using functional requirements.
- Automated regression test cases using Selenium WebDriver and Cucumber.
- Performed smoke, sanity, and regression testing during sprints.
- Worked with Agile teams, participated in daily scrums and sprint planning.
- Identified and reported bugs using AZURE and tracked them until closure.
- Executed manual test cases for web applications and logged defects.
- Wrote test cases based on user stories and business requirements.
- Conducted cross-browser testing and UI validations.
- Collaborated with developers and BA teams for requirement understanding.

Key Achievements

- Awarded by the Star performance of the month and Super star of the quater

Certifications

- ISTQB Foundation Level Certified (Certificate number:110317)
- Completed diploma in Software Testing in 2019

Education

Masters in computer science
RTM Nagpur University, Maharashtra
Year: 2013
