SAURABH GAIKWAD

QA Analyst |QA Automation Engineer (SDET) | Functional, API & AI/LLM Testing
Pune, India | saurabhgaikwad899@gmail.com | +91-9139503716

PROFESSIONAL SUMMARY

Results-driven QA Automation Engineer with **4+ years** of experience in **manual** and **automation** testing across enterprise **SaaS**, **CRM**, and **AI/ML** platforms. Skilled in **designing**, **developing**, and **maintaining** end-to-end automation frameworks using **Selenium**, **Playwright**, **Cypress**, and **PyTest** for UI, API, and database testing. Strong experience in **functional**, **regression**, **smoke**, **sanity**, and **API** testing, with expertise in **test case design**, defect lifecycle management using **Azure DevOps**, and Data validation through SQL. Proficient in **REST API** testing using **Postman**, **CI/CD** integration with **Azure DevOps**, and working within **Agile/Scrum** environments with a solid understanding of **SDLC** and **STLC**. Hands-on exposure to **AI/LLM** testing, including **prompt evaluation**, **model output validation**, and **data drift** analysis, supporting the **quality assurance** of intelligent applications

CORE TECHNICAL SKILLS

Automation Frameworks: Selenium, Cypress, Playwright, Pytest, Robot Framework

Languages & Scripting: Python, JavaScript/TypeScript, C#, SQL.

API Testing: Postman, REST Assured, REST API Testing, Schema Validation

Testing Practices: Manual & Functional Testing, Test Case Design, Defect Lifecycle Management, Page Object Model, E2E, Regression, Sanity, Edge-case, Keyword-Driven Testing

CI/CD & DevOps: Jenkins, Azure DevOps, Git, Docker

Databases & Data Validation: PostgreSQL, MySQL, SQL Querying, Data Integrity Checks

AI/ML & GenAI Testing: Prompt Evaluation, LangSmith, Model Output Validation, Data Drift Detection

QA & Project Management: Azure DevOps Boards, Agile/Scrum, SDLC/STLC, Test Strategy Definition

PROFESSIONAL EXPERIENCE

Software Engineer in Test | UST — Xpresso.ai

Apr 2024 – Present

AI/ML SaaS Platform — Test Automation & Data Quality Engineering

- Contributed to the development and maintenance of **scalable UI and API automation** frameworks using Python, **Playwright**, **Robot Framework**, and **Cypress** for AI/ML SaaS applications.
- Contributed to **migrating** automation test suites from **Robot Framework** to **Playwright**, improving framework maintainability, execution efficiency, and long-term scalability.
- **Designed** and **developed** a **Cypress-based** automation framework from **scratch** for the Model Monitoring business module, implementing **reusable** components, **Page Object Model (POM)**, and reporting utilities to support scalable test automation.
- Designed and executed automated **REST API** test suites using **Postman**, validating request/response payloads, authentication, schema validation, error handling, and response consistency across ML inference services.
- Worked **SQL-based** backend validation processes to verify data integrity, consistency, and model output accuracy across PostgreSQL databases and AI data pipelines.
- Developed reusable keyword-driven and data-driven automation libraries using Robot Framework and Python, achieving **85%+ automation coverage** across critical application modules.
- Integrated automation suites with Jenkins and Azure DevOps CI/CD pipelines, enabling continuous test execution and reducing regression cycle time by **40%**.
- Worked closely with ML workflows by creating and deploying **machine learning models** using Kaggle datasets and Python ML libraries, validating **model training**, **prediction accuracy**, **inference** behavior, and cross-platform data consistency.
- Performed **AI/LLM** testing using **LangSmith** for prompt evaluation, response validation, hallucination detection, behavioral consistency verification, and model output quality assessment
- Worked with Kubernetes-based model deployments to validate deployment workflows, monitor experiment execution
- Collaborated with ML engineers, developers, DevOps engineers, product managers, and QA teams to define automation strategies, improve release quality, identify risk areas, and support Agile software delivery.

Test Automation Engineer | UST — Eureka Forbes Ltd.

Enterprise ERP/CRM Platform — Microsoft Dynamics 365

- Designed, developed, and maintained **200+ Selenium** WebDriver automated test scripts using **C# and NUnit** for Microsoft Dynamics 365 Sales, Service, and Marketing modules, increasing regression automation coverage and reducing manual testing effort.
- Contributed to the **maintenance** and **enhancement** of the existing Selenium automation framework by developing reusable test scripts, page objects, and **utility** methods for enterprise CRM applications.
- Automated end-to-end business workflows covering functional, regression, smoke, sanity, and cross-browser testing, supporting sprint and release validation activities.
- **Designed**, reviewed, and executed **300+ manual** and **automated** test scenarios and test cases based on business requirements, user stories, and acceptance criteria to ensure comprehensive **functional** coverage.
- Performed backend **database validation** by writing **SQL** queries to verify data integrity, business rules, and transactional consistency across Microsoft Dynamics 365 modules.
- Collaborated with developers, business analysts, and product owners during **Agile** sprints to analyze requirements, reproduce defects, validate fixes, and improve overall product quality.
- Logged, tracked, prioritized, and verified **software defects** using **Azure DevOps**, ensuring accurate defect lifecycle management and timely resolution across multiple release cycles.
- Supported **CI/CD-**driven release testing by executing automated regression suites and participating in production readiness, UAT support, and release verification activities.
- Participated in **Agile ceremonies** including sprint planning, backlog refinement, daily stand-ups, sprint reviews, and retrospectives while contributing to continuous process improvement.

EDUCATION

Master of Computer Applications (MCA) — Dr. D. Y. Patil Institute of Computer Application and Management, Pune *2020 – 2022*

Bachelor of Science, Computer Science — Dr. D. Y. Patil College of Science and Computer Science, Pune *2017 – 2020*

CERTIFICATIONS & TRAINING

- Playwright JS/TS Automation Testing from Scratch & Framework — Udemy
- RDBMS PostgreSQL — IIT Bombay | SQL querying, data validation, and database testing
- Java Programming — IIT Bombay | Object-oriented programming and software development fundamentals
- Introduction to Computer Science — IIT Bombay
