SUMMARY

Automation Test Engineer with 4+ years of experience in Selenium automation testing for web, API, mobile, OTT, TV, and device-based applications within large telecom digital transformation programs. Strong hands-on expertise in Selenium WebDriver, Selenium Grid, Java, TestNG, JUnit, Maven, Git, and CI/CD pipelines using Jenkins, REST API testing using Postman, Rest Assured, and Swagger, cross-browser compatibility testing, SQL-based backend data validation, and mobile testing using Appium. Proven contributor in Agile/Scrum environments with strong exposure to defect lifecycle management using JIRA, Confluence, Zephyr, along with onsite client coordination and Business UAT, BRT leadership. Domain exposure to large transactional systems including CRM, Billing, Order Management, and SAP-SO testing in telecom domain BSS and OSS.

EXPERIENCE

Test Automation Engineer

Tech Mahindra Ltd

08/2021 - Present Pune, India

Leading telecom and technology services provider

- Worked on a high-profile telecom domain project, **developing and executing automated test scripts** to ensure the functionality and reliability of critical customer-facing applications
- Enabled **80% faster issue resolution with sprint cycle automation**, boosting product stability and early defect detection
- Developed and maintained automation scripts using Selenium WebDriver with Java for web application testing, **resulting in a 70% reduction in manual testing efforts**
- **Improved backend defect detection by 40% using Rest Assured API automation** with backend database validation using Postman API
- Executed cross-browser compatibility testing across Chrome, Firefox, and Edge to ensure release confidence and system reliability for telecom project
- Successfully integrated Appium for mobile automation testing expanding the test coverage to include both web and mobile applications
- Configured CI/CD pipelines using Jenkins and GitHub Actions for UI/API automation, accelerating release validation
- Led a team of 5 testers to complete regression and **test designs 25% faster and increase defect detection by 20%.**

QA Engineer

Tech Mahindra Ltd

08/2021 - Present Pune, India

Leading telecom and technology services provider

- Executed manual testing for web and mobile apps across SIT, UAT, and BRT phases, validating scenarios and reporting 100 defects over three releases to support timely fixes for all kinds of telecom systems
- Collaborated with developers, product owners, solution owners, and business stakeholders to design and execute 200-300 test cases per release
- Executed full-cycle regression testing during releases, validating critical business flows and helping reduce production defect

KEY ACHIEVEMENTS

♥ Key Contributions to Telecom Digital Transformation

Successfully contributed to the modernization of critical telecom applications leading to enhanced product stability and user experience

SKILLS

Automation & API Testing Framework

Selenium WebDriver, Selenium Grid, TestNG, JUnit, Maven, Cucumber, REST API Testing, Postman, Rest Assured

Programming & Design Patterns

Java, SQL, C, Page Object Model

CI/CD & Version Control

Jenkins, Git, GitHub

Test Management & Mobile Testing

JIRA, Confluence, Zephyr, Appium (Android & iOS), OTT, TV, Device, Broadband, Payment Testing

Testing Types

SIT, UAT, Regression, Telecom CRM, Billing, Order Management, SAP Sales Order Testing, BSS, OSS

LANGUAGES

English

Proficient

Hindi

Proficient

Bengali

Native

EDUCATION

Bachelor of Technology (B.Tech)

University of Engineering & Management

08/2016 - 04/2020 Kolkata

GPA **8.01 / 10**

PROJECTS

Telecom Digital Transformation Program

leakage by 60%
- Actively participated in daily stand-up calls collaborating with product and development teams to refine user stories, acceptance criteria, and testing scope
- Assisted in the creation and maintenance of test documentation, including test plans and test scripts
- Tested telecom systems including CRM, Billing, Order Management, Provisioning, and SAP Sales Order (SO) workflows

ONSITE EXPERIENCE AS SUBJECT MATTER EXPERT (SME)

Role: Automation Testing SME — International Client Engagement

- Served as Automation Testing SME for an international client, guiding UAT test planning and execution of automation strategies.
- Collaborated with client in UAT phase, executing test cases, preparing test data, and publishing daily reports to track progress and defects.
- Provided hands-on training and mentoring on automation tools and practices, increasing team productivity and adoption.
- Served as the key liaison between client and offshore teams, maintaining transparency and alignment on testing.
- Supported product deployment with early bug detection and fast escalation, cutting production defects by 30%.

Role: Onsite QA Lead — Mission-Critical Telecom Digital Transformation Program

- Selected as part of a core onsite QA team for a mission-critical telecom digital transformation program.
- Acted as the primary QA liaison, working directly with business stakeholders, product owners, and development teams.
- Led Business UAT activities including test walkthroughs, execution coordination, defect triage, and UAT sign-off.
- Coordinated end-to-end system integration testing across CRM, billing, order management, and provisioning platforms.

Testing for a large-scale telecom digital transformation project

- Contributed to end-to-end testing of a large-scale telecom modernization initiative covering CRM, Billing, Order Management, Service Provisioning, Mobile, Broadband, Device, and OTT platforms
- Designed and executed automation, functional, integration, regression, SIT, and UAT test scenarios across web, mobile, and backend systems
- Supported production go live testing and SAP SO testing
- Validated REST API integrations across multiple platforms supporting enterprise workflows
- Conducted release-wise regression testing to ensure application stability and business continuity
