PROFESSIONAL SUMMARY

Detail-oriented and results-driven QA Engineer with 4+ years of hands-on experience in end-to-end software testing, specializing in Learning Management Systems (LMS) and e-commerce platforms. Proficient across the full Software Testing Life Cycle (STLC) — from requirement analysis, test planning, and test case design through to execution, defect management, and test closure. Skilled in manual testing, REST API testing, test automation (Katalon Studio), performance testing (JMeter), and security testing (Burp Suite). Proven track record of improving product quality, reducing defect leakage, and accelerating release cycles in Agile/Scrum environments.

CORE COMPETENCIES & TECHNICAL SKILLS

Testing Tools	JIRA, Postman, Selenium WebDriver, Katalon Studio, JMeter, Burp Suite, GitHub, Service Desk
Testing Types	Functional, Regression, Smoke, Sanity, Exploratory, UAT, API/Web Services, Security & Vulnerability, Performance/Load, Mobile (iOS & Android), Cross-Browser, End-to-End (E2E)
STLC Expertise	Requirement Analysis, Test Planning & Strategy, Test Case Design, Test Execution, Defect Tracking & RCA, Test Closure & Reporting, Traceability Matrix
Automation	Katalon Studio (test scripting, regression suites), GitHub Actions
API Testing	REST API validation, OAuth 2.0, Payload/Schema validation, Status code & Error handling (Postman)
Methodologies	Agile/Scrum, Waterfall, SDLC, STLC
Programming	Java (Basic), SQL
Defect Mgmt.	JIRA, GitHub, Service Desk — severity/priority tagging, RCA, full defect lifecycle management

KEY ACHIEVEMENTS

- ✓ Reduced regression testing time by 35-40% by designing and implementing Katalon Studio automation frameworks, improving overall sprint velocity.
- ✓ Achieved 95% test coverage through risk-based, optimized test case design and structured test suites across all LMS modules.
- ✓ Reduced end-user complaints by 40% by detecting critical LMS plugin bugs prior to each deployment cycle.
- ✓ Identified and resolved critical defects before production release, significantly reducing post-release hotfixes and improving product stability.
- ✓ Strengthened application security posture by identifying and reporting high-severity vulnerabilities (XSS, SQL injection, authentication flaws) via Burp Suite.
- ✓ Ensured zero data loss across multiple client LMS migration projects through rigorous data integrity and validation testing.

WORK EXPERIENCE

QA Engineer
Paradiso Software Pvt. Ltd., Pune

Feb 2022 – April 2026
Pune, India

Key Responsibilities:

- Analyzed Business Requirement Documents (BRDs) and functional specifications to identify testable requirements, define scope, and prepare test plans and test strategies.
- Designed, reviewed, and executed detailed test cases and test suites for LMS modules — course creation, quiz systems, gradebooks, SCORM packages, user roles, and client custom features.
- Performed end-to-end functional, regression, smoke, sanity, and exploratory testing across multiple LMS versions and sprint releases.
- Conducted REST API testing using Postman — validated OAuth 2.0/token-based authentication, request/response payload schemas, status codes, and error handling.
- Developed and maintained automated test scripts using Katalon Studio and smoke test suites.
- Performed load and performance testing using JMeter to assess system behavior under peak and concurrent user traffic; reported and tracked performance bottlenecks to the development team.
- Conducted security and vulnerability testing using Burp Suite — identified injection risks, authentication flaws, insecure session management, and XSS vulnerabilities.
- Executed cross-browser testing (Chrome, Firefox, Safari, Edge) and mobile testing on iOS and Android devices and emulators to validate responsive behavior and consistency.
- Logged, tracked, and managed defects in JIRA and GitHub with clear reproduction steps, severity/priority tagging, screenshots, and environment details.
- Conducted root cause analysis (RCA) on critical defects and collaborated with developers to implement preventive measures and process improvements.
- Prepared and maintained QA documentation — test plans, test summary reports, traceability matrices, and functional documentation.
- Collaborated with product managers, developers, and QA teams in Agile/Scrum sprints — daily standups, sprint planning, backlog grooming, and retrospectives.
- Validated end-to-end e-commerce workflows including product search, cart management, checkout, payment processing, and order placement.
- Participated in multiple client LMS data migration projects — validated data integrity, user records, course content fidelity, and enrollment data post-migration.
- Performed UAT (User Acceptance Testing) coordination and supported clients during go-live validation phases.

PROJECTS

Corporate LMS Platform Testing

- Validated end-to-end LMS workflows and data exchange with third-party integrations.
- Identified and resolved critical plugin bugs, reducing end-user complaints by 40%.
- Validated role-based access controls (RBAC) and data accuracy across Admin, Manager, Teacher, and Student environments.
- Automated post-upgrade regression test cases for plugin functionality using Katalon Studio.

Mobile App QA (iOS & Android LMS)

- Performed functional, UI and regression testing on native iOS and Android LMS applications.
- Verified responsiveness and UX consistency across multiple device types, screen sizes, and OS versions.
- Reported device-specific defects with detailed logs, screen recordings, and environment metadata.

E-Commerce Platform Testing

- Tested product catalog, cart operations, checkout flows, payment gateway integration, and order management.
- Identified and reported critical checkout and payment processing bugs, preventing revenue-impacting production issues.
- Performed end-to-end UI and usability testing across browsers and devices.

API Testing & Test Automation

- Designed and executed comprehensive API test cases using Postman for LMS REST APIs.

Client LMS Data Migration Projects

- Participated in multiple LMS client migration projects ensuring data integrity and stability post-migration.
- Validated user records, course content, enrollment data, and completion history for accuracy.
- Raised and tracked migration-specific defects ensuring zero data loss at go-live.

EDUCATION

M.Sc. Computer Science
Savitribai Phule Pune University
2019 – 2021
Pune, India

B.Sc. Computer Science
Shivaji University, Kolhapur
2016 – 2019
Kolhapur, India

CERTIFICATIONS

- Certified Professional Software Tester (CPST) — SQUAD Infotech Pvt. Ltd., Pune (2022)
- ISTQB Foundation Level Certification (In Progress)

PROFESSIONAL STRENGTHS

Analytical Thinking | Attention to Detail | Leadership | Problem Solving | Team Collaboration | Quick Learner | Integrity & Dedication
