https://www.linkedin.com/in/sanket-nangare-97b6311ab Portfolio: Sanket Nangare Portfolio

Computer Science Engineering graduate specializing in Cloud tech, React TS, NoSQL, and project management. Skilled in communication, innovation, and driving tech projects forward.

Experience

1] Full Stack Developer (Web Dev Full Stack with Cloud)
Organization: Worqhat by Winlysis Pvt. Ltd. **Duration:** 07/2023 – Present
Responsibilities:

- Developed and implemented market & business stakeholder's requirements for the organization's main product based on business objectives, No Code Workspace. This includes designing Artificial Intelligence (AI) APIs, creating the software architecture, and building core Large Language Models (LLM)-based scalable end to end solutions. Notable innovation, research and include AI Interview Assist, an LLM Chrome Extension, and an AI-LLM Powered No Code Space featuring AI-generated tables, documents.
- Working on Google Cloud platform for technical solution delivery and Kubernetes, storage, pipeline and firebase as a database for real-time data synchronization and efficient data management.
- Successfully travelled to Bangalore for a client visit, engaged in discussions, and finalized the business deal.
- Involved in client consulting and interaction for LLM AI applications and its financial planning and Business strategy.
- Developed forecasting ML models and performed data analysis, contributing to accurate predictions and informed decision-making.
- Contributed to various projects utilizing MERN Stack, Typescript/JavaScript Tailwind CSS, Bootstrap, Tailwind, ShadeCN, Preline, kitemaker and Jet Brains for issue ticket management. Created multiple POC'S on WorqHat's GenAI model around 20+.
- Client meeting, explain about the product and its features along with cost efficient, also understand their requirements for customization and cloud deployment on Prem or cloud.

2] Full Stack Developer Intern (Web Dev Full Stack with Cloud)
Organization: Worqhat by Winlysis Pvt. Ltd. **Duration:** 05/2022 – 06/2023
Responsibilities:

- Developed high-performance applications using EJS/HTML, JavaScript, & Node.js, ensuring code was testable, reusable.
- Implemented effective security protocols & data protection measures, integrating Firebase for backend and API development.
- Conducted diagnostic tests, promptly identifying, and repairing defects to maintain application integrity and performance.
- Documented Node.js processes comprehensively, including database, technical reports, ensuring transparency in documentation.
- Implemented process improvements and technology enhancements, optimizing development workflows and application scalability.
- Stayed abreast of Node.js advancements, continuously learning and integrating innovative technologies to enhance project capabilities and efficiency.

Qualifications

Education	Institute	Stream	CGPA	Year
MBA	Dr. D.Y. Patil Vidyapeeth, Pune	PM	9	2023 - 2025
Bachelor of Technology (B. Tech)	MIT Academy of Engineering, Pune	CS	8.55	2021 - 2023

Certifications

- AWS Certified Cloud Practitioner
- Oracle foundation associate certification
- Microsoft Certified: Azure AI Fundamentals
- Essential Google Cloud Infrastructure Core Services

Key Skills

- Programming Languages: Python.
- Production grade LLM Software development with Full-Stack: MERN, Python.
- SQL/NoSQL Databases: MongoDB, MySQL, Firebase/Firestore, Cloud Databases, Redis.
- Cloud Services & DevOps: AWS, GCP, Azure.
- CI/CD: Git & GitHub.
- Agile Software Engineering and Scrum Framework
- Frontend: HTML, CSS, JS, React JS& TS, Next JS
- Backend: Node JS, TS, And other hands on.
- Experienced with Lucid charts, InVision, JIRA.
- Salesforce dev (L)
- REST API's
- Infrastructure as Code (IAC): Terraform, Cloud Formation for automation.
- Cloud-native architecture: Micro services, server less, containerization (Docker/Kubernetes).
- Problem solving and collaboration.

Achievements

- SIH internal hackathon judge at MMCOE.
- Company sponsored hackathon judge.
- Cracked company's business deal with cost effective methods.
- Created multiple POC's according to customer's requirements.
- External examiner at MITAOE multiple times.
- Guest lectures delivered at MIT AOE, VIT, PICT and many more colleges.

Projects

1] UIN Sports Sponsorship Project (Full Stack Development/AWS/Docker)

- UInSports aims to establish a comprehensive global sports ecosystem where athletes, coaches, schools, universities, clubs, and agencies can create and manage their sports profiles, fostering career development opportunities within the sports industry. The platform also seeks to promote sports culture and adoption, addressing current societal gaps in sports participation.
- UInSports plans to develop both a desktop portal and a mobile application using cutting-edge technologies such as React.js and Next.js for frontend development, Node.js for backend services, MongoDB for scalable NoSQL database, and integrating blockchain technology for secure data handling and transactional integrity. These technologies will ensure robust performance, scalability, and security across the platform, supporting its mission to revolutionize the sports industry ecosystem globally.

2] Medicare Scheduler: Streamlining Doctor Appointments (Full Stack Development/AWS)

- A web-based system built using PHP, MySQL, and Bootstrap for managing doctor appointments.
- HTML5/CSS3, JavaScript for dynamic content, Bootstrap for responsive design, XAMPP web server, PHP for backend logic, MySQL for database management, and TCPDF for PDF generation.

Personal Information

- **Interests:** Travel, Media Editing, Research, new learning.
- **Language Known:** English, Hindi, Marathi
