PROFESSIONAL SUMMARY

Technical Consultant with 4+ years of experience in Microsoft Dynamics 365 Finance and Operations (F&O) technical development. Skilled in X++ programming, Visual Studio, and customizing forms and reports. Experienced in form customization using extensions, and modifying tables, classes, and Enums. Proficient in implementing extensions and event handlers to enhance system functionality without over layering. Hands-on experience with SSRS report development, batch jobs, and basic debugging. Familiar with Lifecycle Services (LCS) for environment management and deployments. Strong technical knowledge of finance and supply chain modules.

KEY COMPETENCIES

- Visual Studio X++ Form Customization (via Extensions)
- Extension & Event Handlers
- Tables, Class & Enum Modifications
- SSRS Report Development
- Worked on modules AP (Accounts Payable) , AR (Accounts Receivable), Cash and Bank Management

PROFESSIONAL EXPERIENCE

Microsoft D365 F&O Developer

WIPRO TECHNOLOGIES LIMITED | MARCH 2023 – PRESENT

- Knowledge of coding in X++ language.
- Designed and developed a Q&A platform using Microsoft Dynamics 365 Finance & Operations.
- Implemented custom forms, workflows, and data entities to support question-and-answer functionality.
- Enhanced user experience with tailored UI elements and seamless navigation. Worked on Extensions, SSRS reports, Batch Jobs and Entities.
- Bug Fixing
- RSAT

X++ DEVELOPER

GREAT LEARNING PLATFORM | JANUARY 2022 - FEBRUARY 2023

- Hands-on experience in X++ development, customizing business logic and workflows.
- Skilled in form customization, creating and modifying UI elements using extensions
- Proficient in table, class, and Enum modifications for custom business requirements
- Experienced in developing SSRS reports and building batch jobs for background processing
- Knowledge of security objects, including roles, duties, privileges, and worked on modules AP (Accounts Payable) , AR(Accounts Receivable), Cash and Bank Management.

IMICROSOFT DYNAMICS 365 TECHNICAL TRAINEE | DECEMBER 2020 - DECEMBER 2021

- Assisted in development and customization of forms, tables, classes, and reports in Microsoft Dynamics 365 F&O using X++ and Visual Studio.
- Supported implementation activities including data migration, testing, debugging, and resolving technical issues under senior developer guidance.

PROJECTS

DOCONNECT (Q&A PLATFORM)

- Developed and supported a modular Q&A platform in D365 F&O using X++ and Visual Studio, ensuring stability and maintainability.
- Customized Forms, Tables, Menu Items, Enums, Classes, Extensions, and Event Handlers to support user interaction and business workflows.
- Designed and implemented SSRS reports for monitoring user activity and platform performance.
- Created and managed batch jobs to automate tasks like daily summaries and activity notifications.
- Deployed and maintained the solution via Lifecycle Services (LCS), achieving high uptime and performance.
- Resolved user-reported issues and functional bugs in a timely manner, reducing downtime and improving user satisfaction.
- Monitored batch jobs, system logs, and user activity to proactively identify and address potential problems.
- Collaborated with functional teams to analyze issues, test fixes, and validate enhancements in UAT environments.
- Maintained technical documentation and knowledge base articles to streamline future troubleshooting.
- Participated in production support activities, including incident analysis, root cause identification, and implementation of corrective actions.

ONLINE CLINIC SYSTEM

- Developed an Online Clinic System using X++ and Visual Studio, enabling patient interaction and clinical workflow automation.
- Customized Forms, Tables, Classes, Enums, and Menus to manage patient records, consultations, and scheduling functionalities.
- Implemented batch jobs for daily appointment summaries and automated notifications.
- Performed unit testing, resolved development issues, and maintained technical documentation.
- Worked on Security Objects to ensure proper role-based access control and data protection.
- Followed best practices to deliver clean, maintainable, and scalable code.
- Provided L2/L3 support, resolving user-reported issues and ensuring minimal system downtime.
- Monitored batch jobs and logs to proactively identify and address performance or functional issues.
- Collaborated with cross-functional teams to analyze root causes, apply fixes, and validate in UAT.
- Handled configuration changes, minor enhancements, and production deployments.
- Maintained support documentation to enable quicker resolution and knowledge sharing across teams.
