Shubham Agarwal

QA Engineer

(+91) 9588640953 | Pune, Maharashtra | shubhama2619@gmail.com | linkedin.com/in/shubham-agarwal-33667328b

Summary

QA Automation Engineer with 4.5 years of experience specialising in end-to-end test automation for healthcare web applications. Maintained and improved Playwright (TypeScript) and Selenium (Java/TestNG) automation frameworks, creating reusable utilities and stable test scripts that helped reduce manual testing effort and increase regression coverage.Experienced in API, database, and performance testing, with hands-on CI/CD integration using Jenkins. Adapt at collaborating in Agile/Scrum teams across the full SDLC to deliver high-quality releases.

Skills

Languages	Java, TypeScript, JavaScript, SQL
Tools And Platforms	Postman, Jenkins, Git, Gitlab, Maven, Jira, VS Code, Eclipse, Raptor Mini AI Agent
Automation Frameworks	Playwright, Selenium WebDriver
Testing Types	Functional, Regression, Smoke, Sanity, Integration, Exploratory, UI, API, Performance/Load

Experience

QA Automation Engineer **Feb 2025 — May 2026**
Bloomwise Infotech *Mohali, Punjab*
Project: Referapatient — Hospital Referral Management System

- **Automated 80+ critical regression** scenarios using **Playwright (TypeScript)**, reducing manual **regression effort** by ~**60%** for **referral management workflows**.
- **Validated** 15+ **REST endpoints** via **API testing** and **MySQL** query verification, ensuring **data integrity** across referral transactions.
- **Performed SQL database validation** for key referral workflows, identifying and resolving **data mismatches** before release.
- **Integrated** the test suite into a **Jenkins CI/CD pipeline** for automated nightly runs, enabling **early defect detection**.
- Collaborated in **Agile ceremonies** including sprint planning, backlog refinement, and retrospectives, contributing to improved sprint execution and early identification of testing risks.

Project: Consentapatient — Digital Patient Consent Management

- **Automated** 50+ **consent workflow** scenarios (positive, negative, edge cases), reducing **QA cycle time** and improving **release confidence**.
- **Built reusable Page Object Model (POM)** components and utility methods, cutting **script development time** by ~30%.
- **Identified and tracked** 60+ **defects** across multiple release cycles using **Jira**, helping reduce **defect leakage** to production.
- Executed JMeter load testing for 300 concurrent consent submissions, uncovering performance bottlenecks.

Software QA Engineer **Sep 2021 — Feb 2025**
Coreobject Soft System and Services *Bangalore, Karnataka*
Project: CureNexus — Hospital Management System

- **Built and maintained** 100+ **Selenium automation scripts** across 4 modules (patient, appointment, billing, reporting), ensuring **end-to-end regression coverage**.
- **Executed smoke, sanity, regression, and integration testing** across release cycles to guarantee **stable production deployments**.
- **Validated** end-to-end hospital management workflows via **API and database testing**, catching **data inconsistencies pre-release**.

Project: Stellar — Insurance Policy Management System

- Created and executed **120+ test cases** for policy lifecycle, renewal, and claims modules shortly after joining the project, ensuring successful release delivery.
- Identified **20+ functional defects** through comprehensive **functional and regression** testing of insurance policy workflows.
- Automated regression scenarios using **Selenium WebDriver + TestNG**, reducing manual testing time per release cycle.
- Performed **SQL database validation** and **API testing** of **15+ policy and claims endpoints**, uncovering premium calculation and validation issues before client UAT.

Achievements

- ISTQB Certified Tester — Foundation Level(CTFL).
- Playwright JS/TS Automation Testing And Framework.

Education

Bachelor of Engineering (B.E.) in Computer Science and Engineering **2019**
Savitribai Phule Pune University, Pune
