Sumit Gohatre

QA Automation Testing Engineer

3 Years | (+91) 9604747696 | sumitght25@gmail.com

Key skills

- Playwright
- Javascript
- TypeScript
- Selenium
- Java
- Rest Assured
- Appium
- Github
- Github Actions
- Jenkins
- Azure DevOps
- Saucelabs
- Lambda Test
- JIRA
- Web Automation Testing
- API Automation
- Mobile Automation
- Postman
- MySQL
- Database Testing
- Linux
- Testng Framework
- Maven
- Agile Methodology
- Fintech
- JMeter
- Automation Testing
- Functional Testing
- Page Object Model

Profile Summary

QA Automation Engineer with **3 years** of experience in **Manual** and **Automation** Testing across **Web, Mobile,** and **API** platforms in the **Fintech** domain. Contributing to MobiFin Digital E-Wallet and Digital Banking projects, automating **1000+ test cases** across payment, Accounts, recharge, wallet, and transaction modules. Hands-on experience in **Web Automation** using **Selenium WebDriver** with **Java** and **Playwright** with **JavaScript**, **Mobile Automation** using **Appium**, and **API Automation** using **REST Assured** and **Postman**. Designed and maintained scalable automation frameworks integrated with **Jenkins**, **GitHub Actions**, and **Azure DevOps CI/CD** pipelines, reducing manual **regression** effort by approximately **50%.** Experienced in **MySQL database** validation, **Redis** cache verification, **Linux log** analysis, **functional**, **regression**, **SIT**, **UAT**, **Agile Scrum**, and **Jira defect** tracking.

Education

B.Tech / B.E., 2020

College of Engineering and Technology, Akola

Work Experience

Dec 2023 - Present

QA Automation Testing Engineer

Bankai Infotech

Projects: Digital Banking & MobiFin Digital E-Wallet

Worked on FinTech-based **Digital Banking** and **MobiFin E-Wallet** applications supporting secure financial transactions including user authentication, wallet management, fund transfers, bill payments, merchant payments, recharge, and transaction processing.

Roles & Responsibilities:

- Analyzed business and functional requirements, identified test scenarios, and designed, reviewed, and executed test cases covering **positive, negative, boundary, regression, and end-to-end scenarios**.
- Designed and maintained a **Hybrid Automation Framework using Java, Selenium WebDriver, TestNG, Maven, REST Assured, Appium, and Page Object Model (POM)**, supporting **Web, API, Android, and iOS automation**.
- Developed and maintained **Selenium WebDriver automation using Java for approximately 3 years**, covering critical e-wallet and financial workflows.
- Developed **web and api automation using Playwright with JavaScript/TypeScript for approximately 2 years**, covering critical Digital Banking workflows.

Social links

https://github.com/sumit-qa-automation

- Automated critical workflows including **user authentication, fund transfers, payments, wallet management, KYC, recharge, merchant payments, and transaction validation**.
- Developed and executed **API automation using REST Assured** and performed API testing using **Postman**, validating status codes, authentication, JSON responses, schemas, and business rules.
- Automated **Android and iOS mobile applications using Appium** and executed tests on **Sauce Labs and Lambda Test** for cross-device and platform coverage.
- Developed **data-driven automation scripts and reusable test components** to improve automation coverage, maintainability, and execution efficiency.
- Performed **functional, regression, SIT, UAT, smoke, sanity, and end-to-end testing** across product releases.
- Performed **database testing using SQL/MySQL** to validate transactions, account/wallet balances, payment status, and backend data integrity.
- Integrated automation suites with **Jenkins, GitHub Actions, and Azure DevOps CI/CD pipelines** for automated test execution and regression validation.
- Analyzed **Linux server logs and Redis cache data** for backend verification, troubleshooting, and root-cause analysis.
- Managed defects using **Jira** and collaborated with developers and business teams for defect resolution, retesting, and release validation.
- Actively participated in **Agile Scrum ceremonies**, including Sprint Planning, Backlog Refinement, Daily Stand-ups, Sprint Reviews, and Retrospectives.

Projects

22 Months

Digital Banking Application

Domain: FinTech- Digital Banking

Web & API Automation | Playwright | JavaScript/TypeScript

Project Overview:-
A secure Digital Banking platform supporting core banking functionalities such as customer onboarding, account management, fund transfers, beneficiary management, bill payments, transaction history, and role-based access control. The application emphasizes data security, regulatory compliance.

32 Months

MobiFin- Fintech E-Wallet Application

Domain: FinTech — Digital Payments & E-Wallet

Web, API & Mobile Automation | Selenium | Java | REST Assured | Appium

Project Overview:
A secure E-Wallet platform enabling peer-to-peer transfers, merchant payments, bill settlements, and transaction history management.

KEY ACHIEVEMENTS

MobiFintastic Award

Mobifintastic Award — Awarded by Bankai Infotech for outstanding performance and contribution to the MobiFin Digital E-Wallet project automation. (2024).
