Summary

Python Backend Developer with 3+ years of experience building scalable backend applications using Python, Django and Flask. Experienced in REST APIs, Microservices, PostgreSQL, MySQL, Redis, Docker, Jenkins, Git, AWS, JWT, OAuth2 and CI/CD. Strong background in backend architecture, API integration, performance optimization, distributed systems and production support.

Experience

- **Gavkari Agro Producer Company Limited** — Remote
  Python Backend Developer — *Jan 2023 – Present*
  - Built and maintained 10+ microservices using Python, Django and Flask supporting 5K+ daily transactions.
  - Developed 30+ REST APIs improving response time by 30% using Redis caching and ORM optimization.
  - Optimized MySQL and PostgreSQL queries reducing execution time by 40%.
  - Implemented JWT and OAuth2 authentication for secure APIs.
  - Containerized applications with Docker and automated deployments using Jenkins CI/CD.
  - Worked with Angular and React teams to deliver end-to-end features.
  - Reduced production issues by 35% through monitoring, debugging and logging.
  - Participated in Agile ceremonies, code reviews and sprint planning.

Projects

- **Distributed Loan Processing System**
  Python — Django — Flask — PostgreSQL — Redis — Docker
  - Developed distributed microservices handling 1000+ loan applications daily.
  - Built REST APIs for onboarding, KYC, loan processing and tracking.
  - Integrated third-party KYC and credit scoring APIs.
  - Implemented asynchronous processing, Redis caching and CI/CD deployment.
- **Ride Payment Integration System**
  Python — Django — PostgreSQL — REST APIs — Redis
  - Developed backend services processing thousands of payment transactions daily.
  - Integrated multiple payment gateways with retry mechanisms and secure validation.
  - Implemented logging, monitoring and transaction reconciliation.

Skills

- **Languages:** Python, SQL, JavaScript, HTML, CSS
- **Frameworks:** Django, Flask, Django ORM, REST APIs, Microservices
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Cloud & DevOps:** Docker, Jenkins, Git, GitHub, Linux, AWS
- **Security:** JWT, OAuth2
- **Tools:** Postman, Swagger/OpenAPI
- **Concepts:** Distributed Systems, Caching, API Design, SOLID Principles, Agile

Education

- **Pune Vidyarthi Griha's College of Engineering** — Nashik
  B.E. Computer Science — *2021–2025*
- **Maharashtra State Board**
  HSC – 82% — *2021*
- **Maharashtra State Board**
  SSC – 67% — *2019*
