Aniket Sawant

PYTHON DEVELOPER

Contact: +91-9767021683

Email: adsawant298@gmail.com

PROFESSIONAL SUMMARY

Python Developer with over **3+ years** of hands-on experience in developing dynamic and responsive web applications using **Django and Django REST Framework and Flask**. Proficient in core Python concepts, including **data structures, algorithms,** and **design patterns**. Experienced in application and production support for **Oracle** and **SQL Server** databases. Skilled in front-end technologies such as **JavaScript, HTML** and **CSS** with practical exposure to essential libraries like **Celery, Beautiful Soup, NumPy** and **Pandas**. Well-versed in API development and **testing using Postman**, as well as unit testing for robust code quality. Experience with cloud platforms including **Azure** Familiar **Google Cloud Platform (GCP)**. Adept at leveraging **Agile** methodologies and collaborating efficiently with teams using **JIRA** and **Git version control**.

SKILLS

- **Programming Languages:** Python
- **Frontend Technologies:** HTML5, CSS3, JavaScript, Bootstrap, React.js
- **Web Frameworks:** Django, Flask, FastAPI
- **API Development:** RESTful APIs, JSON, Postman
- **Databases:** MySQL, PostgreSQL, MongoDB
- **ETL Pipelines:** Custom scripts, Pandas, Celery
- **Data Analysis & Integration:** Pandas, NumPy, CSV, Excel
- **Testing & Debugging:** Unit Testing (unit test, pytest), Debugging tools.
- **Security:** JWT Authentication, OAuth2, Role-Based Access Control (RBAC), Permissions
- **Task Queues & Caching:** Redis, Celery
- **Version Control:** Git, GitHub
- **Development Practices:** OOP, TDD, PEP8 Compliance
- **Cloud Platforms:** AWS
- **Operating Systems:** Windows, Linux
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Team Collaboration

EDUCATION

Bachelor of Science: Fergusson College, Pune **MH (2022)**

PROFESSIONAL EXPERIENCE

YoungElement India Pvt. Ltd.

Python Developer | **Jan 2023 – Present**

- Developed backend services using **Python, Flask** and **Django** with clean, modular architecture.
- Built **ETL pipelines**, reducing manual processing by.
- Analyzed sales and user data using **Pandas** and **NumPy** for actionable insights.
- Optimized **SQL/PostgreSQL** databases, improving query performance by.
- Created secure, scalable **REST APIs** for frontend-backend integration.
- Collaborated with frontend teams to deliver efficient API responses and improve overall application performance.
- Deployed production-ready applications on **AWS/Linux**, ensuring high availability and smooth CI/CD workflows.

PROJECT DETAILS

Project 1: Smart Inventory Tracking System

Developed a Smart Inventory Tracking System to manage products, suppliers, and stock levels with real-time updates and automated workflows. Built using Python, Django, and RESTful APIs with secure RBAC authentication, optimized database performance, and deployed on AWS EC2 for scalable operations.

Responsibilities:

- Designed and developed a **Smart Inventory Tracking System** using Python and Django for real-time product and stock management.
- Built and maintained **RESTful APIs** for inventory operations such as product creation, stock updates, supplier management, and transaction tracking.
- Designed optimized **MySQL database schemas**, improving query performance and data consistency.
- Automated stock quantity updates and implemented business logic for inventory workflows.
- Integrated frontend components using **HTML, CSS, and JavaScript** to provide a responsive user interface.
- Tested APIs using **Postman** and ensured proper validation, error handling, and performance optimization.
- Managed version control and collaboration using **Git**.
- Deployed and configured the application on **AWS EC2**, handling server setup, deployment, and monitoring.

Tech Stack: Python, Django, Django REST Framework (DRF), RESTful APIs, MySQL, HTML, CSS, JavaScript, Git, AWS EC2, Postman.

Project 2: End-to-End Supply Chain Operations Platform

Built an End-to-End Supply Chain Operations Platform to streamline procurement, inventory, order processing, and logistics with real-time tracking and automation. Developed scalable backend services using Python, Django, and RESTful APIs with secure RBAC authentication and deployed on AWS for reliable, high-performance operations.

Responsibilities:

- Designed and developed scalable backend modules using **Python, Django, and RESTful APIs** for procurement, inventory, and logistics workflows.
- Implemented **secure authentication and Role-Based Access Control (RBAC)** to manage users and permissions.
- Designed optimized **database schemas** and improved query performance for high-volume supply chain transactions.
- Built and maintained API integrations with third-party services and internal systems.
- Automated business workflows including order lifecycle, stock updates, and shipment tracking.
- Collaborated with frontend and product teams to deliver seamless end-to-end features.
- Performed testing, debugging, and performance tuning to ensure system reliability and scalability.
- Managed deployment and monitoring on **AWS**, ensuring high availability and secure configurations.

Tech Stack: Python, Django REST Framework (DRF), RESTful APIs, MySQL/PostgreSQL, JWT Authentication, AWS EC2, Linux, Git, Postman

PERSONAL DETAILS

- **Marital Status:** Unmarried
- **Languages:** English, Hindi, Marathi
- **Current Address:** Pune
- **Date of Birth:** 29/08/2000

DECLARATION

I hereby declare that the above information is true and complete to the best of my knowledge and belief.

Place: Pune
Date: / / 2025
