# GANESH BOBADE

Software Engineer | Full Stack Developer

Pune, India | +91 7588329633 | ganeshbobade0312@gmail.com | linkedin.com/in/ganeshbobade03 | github.com/Ganesh0312

## PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with over 3.2 years of experience building scalable web applications using React.js, Node.js, Express.js, MongoDB, and AWS. Skilled in designing secure REST APIs, debugging production issues, responsive UIs, and production-ready features. Familiar with Generative AI, LLMs, and RAG workflows and deploying applications.

## TECHNICAL SKILLS

**Languages:** JavaScript, Python, TypeScript, HTML, CSS, SQL
**Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS
**Backend:** Node.js, Express.js, REST APIs, WebSockets
**Database:** MongoDB, PostgreSQL
**Other:** AWS, Git, Postman, UV, REST APIs, Gen AI, LLM

## EXPERIENCE

**WayBeyond.tech Software** Jan 2025 – Apr 2026
*Software Engineer* *Pune, India*

- Debugged and resolved production issues across multiple applications, improving platform stability and reducing recurring system failures.
- Built scalable end-to-end full-stack AI-powered Web applications using React.js, Next.js, Express.js, Node.js, Fast API, MongoDB, OpenAI, and AWS
- Developed responsive and reusable frontend components with a strong focus on UI/UX, performance, and maintainability.
- Designed and Developed REST APIs, database schemas, and backend logic for financial and workflow-driven applications.
- Integrated Zoho Books APIs for financial data synchronization, invoice generation, and dynamic accounting dashboard development.
- Built OCR and document-processing pipelines using AWS Lambda and OpenAI APIs to extract structured data from PDFs and automate form population
- Implemented real-time communication and notification systems using WebSockets, Web Push (VAPID), WhatsApp APIs, webhooks, cron jobs, and schedulers for read/unread tracking and task-based notifications
- Developed secure multi-role authentication and authorization workflows with JWT, biometric login, and RBAC-based access control.
- Developed an automated Excel-to-PDF pipeline generating 25–30-page compliance reports, replacing manual reporting workflows and improving operational efficiency.
- Worked with the cross-functional team to build an AI-powered platform using Fast API, RAG, LangChain, Milvus, PostgreSQL, and React, supporting chat-based interaction and draft workflow generation
- Collaborated with DevOps teams on application deployment, production debugging, and environment configuration to maintain system reliability.

**Tech Mahajan** Feb 2023 – Jan 2025
*Software Developer* *Pune, India*

- Built and maintained a CRM and intranet management system using React.js, Node.js, Express.js, and PostgreSQL
- Collaborated with clients and stakeholders to analyze business requirements, define technical solutions, and contribute to application development strategies.
- Developed reusable React.js components and dynamic form modules with client-side and server-side validation.
- Designed and developed scalable REST APIs using Node.js and Express.js with proper error handling, middleware integration, status code management, and optimized database queries for improved backend performance.
- Managed complex application state using React Redux to ensure efficient data flow and maintainable frontend architecture.
- Implemented secure authentication and authorization using JWT and bcrypt-based password encryption.
- Maintained API documentation and Postman collections to streamline backend testing and team collaboration.
- Tested and optimized application functionality across multiple devices and environments, improving overall performance, stability, and reliability.

## PROJECTS

**OneConnect Accounting Platform** | *Next.js, Node.js, Express, MongoDB, Redux Toolkit, AWS Lambda, S3*

- Developed an enterprise platform for managing accounting documents, corporate tax, VAT, and transfer pricing compliance.
- Enabled end-to-end financial workflows including document management, reporting, and compliance tracking.
- Integrated external financial (Zoho Book) and communication (WhatsApp) services to streamline accounting operations and user interactions.

**Athlete Monitoring System (AMS)** | *Next.js, Node.js, Express, MongoDB, PWA, Redux Toolkit, S3*

- Developed a full-stack PWA application for Athlete Monitoring System to manage training sessions, wellness tracking, and injury management for athletes.
- Designed a multi role-based system supporting athletes, coaches, physiotherapists, and psychologists, etc. for collaborative athlete performance management.
- Implemented training workflows where coaches assign physical and skill-based sessions, with progress tracking and assessment features.

**RayIB – AI-Powered Investment Diligence Platform** | *Fast API, MongoDB, AWS S3, RAG, LLM, Perplexity AI, LangChain, Next.js*

- Built a SaaS based AI-powered investment diligence platform to automate pitch deck evaluation, transaction readiness scoring, and secure document management workflows.
- Built a RAG based document AI system supporting hybrid semantic and keyword retrieval for natural language querying across large-scale corporate documents.
- Designed a secure virtual data room integrating AWS S3 and role-based access control (RBAC) with watermark-protected document streaming.

## EDUCATION

**Bachelor of Engineering (Information Technology)** 2020 – 2023
*Savitribai Phule Pune University (SPPU)* *8.18 CGPA*
**Diploma in Information Technology** 2018 – 2020
*Maharashtra State Board of Technical Education (MSBTE)* *86.19%*

## PROFESSIONAL HIGHLIGHTS

- Fast learning & adaptability
- Collaboration in cross-functional teams
- Ownership mindset
- Problem Solving
