KAUMUDI KALIKAR

Software Developer

+91 97665 16480 Pune kaumudikalikar6@gmail.com kaumudi-kalikar-6704a2197/

CARRER PROFILE

Results-driven **Software Developer with 2+ years of hands-on experience** in building scalable web applications and automation solutions using **Python, Django, Next.js,** and modern frontend technologies. Proficient in **web scraping (BeautifulSoup, Selenium),** REST API integration, and **PostgreSQL** database design. Demonstrates a strong understanding of full-stack development and agile methodologies. Eager to contribute to innovative projects and drive value for fast-paced, growth-oriented organizations. Committed to continuous learning and technical excellence.

EDUCATION QUALIFICATION

Master of Computer Application (M.C.A.) Aug 2019 – Oct 2022
D.R. D Y Patil School of MCA, Pune. **CGPA: 8.93**

SKILLS PROFILE

- **Programming Languages:** Python, C, C++
- **Web Technologies:** Django, Next.js, HTML, CSS, Bootstrap, Tailwind CSS
- **Database:** PostgreSQL, MySQL, MongoDB
- **Web Scraping & Automation:** Selenium, Beautiful Soup, Pandas, NumPy
- **Version Control:** Git,
- **Development Tools:** PyCharm, Visual Studio, Windsurf
- **Other Tools:** MS Excel, Jira, Postman, Docker

PROFESSIONAL EXPERIENCE

Software Developer

Appx Technology | Nov 2023 – Present

I am working as a Full Stack Developer with experience in building scalable applications using Python, Django, Node.js, and REST APIs. I contributed to the VBS Tracking App (ERP system) and Rippl (community-based social platform) by developing backend services, secure APIs, and content workflows. I built responsive user interfaces using Next.js, React, JavaScript, and Tailwind CSS and managed application data using MongoDB with optimized queries. I developed Python-based services for news chatbot functionality, automation, and AI-assisted content moderation. I implemented authentication, authorization, RBAC, and integrated third-party APIs while working in an Agile environment using Git and clean code practices.

CURRENT PROJECT

1.Project Name: Rippl Hyperlocal Family-Friendly Social Network
https://app.rippl.space
Project Overview: Rippl is a community-first, hyper-local social networking platform designed to foster safe and meaningful local connections. It focuses on a "**family-friendly**" environment, using **AI-driven moderation** to filter noise and ensure high-value community interactions.

Roles & Responsibilities:

- Full-Stack Development: Built the core social engine using Node.js and Next.js, delivering real-time feeds, comments, and a responsive UI with Tailwind CSS.
- Database Design: Architected optimized PostgreSQL schemas to handle high-volume user data and moderation workflows.
- Security & Access: Implemented RBAC and secure authentication to maintain platform integrity and user privacy.
- AI Integration: Developed Python-based services for automated content moderation and a news chatbot to enhance user safety and engagement.
- Agile Collaboration: Managed features through the full SDLC using Git and Agile methodologies to ensure scalable, policy-compliant releases.

2.Project Name: VBS Tracking App
https://www.virtualbuildingstudio.com
Project Overview: Developed the **VBS Tracking App**, a robust ERP solution tailored for managing vendor interactions, service requests, and internal workflows. The system streamlines business operations by offering real-time tracking, automated reporting, and seamless third-party integrations. Built using a microservices architecture, the platform ensures high scalability, modularity, and easy maintenance. It features an intuitive dashboard with advanced search and filtering, enabling efficient resource allocation and performance monitoring.

Roles & Responsibilities:

- Developed full-stack features using **Next.js, JavaScript, and Tailwind CSS** to deliver responsive and user-friendly interfaces.
- Built **microservices and REST APIs** to handle core business logic with secure and scalable service communication.
- Designed and managed **MongoDB** databases for vendors, workflows, and audit logs with optimized indexing and queries.
- Integrated **Zoho CRM and Zoho Books APIs** to automate vendor data, invoices, and workflow synchronization.
- Containerized applications using **Docker** and supported **cloud deployment** for consistent and highly available environments.
- Implemented **authentication, authorization, and role-based access control (RBAC)** for secure access management.
- Collaborated with **product, QA, and stakeholders** in an **Agile environment** to deliver continuous feature enhancements.

ACHIEVEMENTS AND PARTICIPATIONS

- Secured **2nd Prize in Nirbhaya Drama Competition at MIT ADT University, Pune.**
- Awarded **2nd Prize in Solo Music Competition at Dr. D.Y. Patil School of MCA, Pune.**
- Represented institute in State-Level Ekankika Competition organized in memory of Late Balasaheb Thackeray in Mumbai.
- Participated in "Ready, Set, Agile" Methodology Workshop organized by Cognizant, gaining practical exposure to agile project execution.
- Completed hands-on project on **"Build a Face Recognition Application using Python"** as part of the AI-India initiative (AICTE).
