NITIN PARASHAR

Dynamics 365 Finance & Operations | Technical Lead

Faridabad, Haryana, India | +91-9818637653 | np.nitkkr@gmail.com

PROFESSIONAL SUMMARY

Microsoft-certified D365 Finance & Operations professional with 12+ years in enterprise industry, including 10+ years specializing in Dynamics 365 F&O and AX 2012. Contributed to and, at times, led end-to-end technical delivery across global implementations spanning Australia, Switzerland, UAE, Denmark, and India, covering X++ development, system integrations, data migration, and Application Lifecycle Management (ALM). MB-700 (Solutions Architect Expert) and MB-500 (Developer Associate) certified, with a track record of building automated pipelines, real-time integrations, and scalable customizations that reduce manual effort and improve operational reliability.

CORE SKILLS & TECHNICAL PROFICIENCIES

- Enterprise Architecture & Solution Design, Application Lifecycle Management (ALM), Lifecycle Services (LCS)
- X++ Development: Classes, Tables, Forms, EDTs, Enums, Batch Processing, SysOperation Framework, Number Sequences, Workflows, Security Framework
- Integrations & Automation: OData, Power Automate, Azure Logic Apps, Custom Services
- Data Management: Data Entities, Data Management Framework (DMF), Excel Add-ins
- Reporting: SSRS Reports, Docentric AX
- Performance Engineering: Query & Index Optimization, Trace Parser Analysis, Code Review
- Languages & Tools: X++, SQL, Azure DevOps, Visual Studio, SSMS, RSAT (hands-on)
- Methodologies & Source Control: Sure Step, TFS, GIT (basic knowledge)

PROFESSIONAL EXPERIENCE

Technical Architect – D365 Finance & Operations **Jan 2026 – Present**

Nagarro | Client engagement based in Sydney, Australia

- Led integration workstream for an Australia-based D365 F&O program, designing and delivering end-to-end automated import pipelines for Serial Numbers and Purchase Orders using Azure Logic Apps, replacing manual data entry and reducing processing errors.
- Built Logic Apps workflows to pull Serial Number and Purchase Order data from external systems, transform payloads, and push records into D365 F&O via DMF recurring data import and custom data entities, with real-time alert notifications to business owners on import success, failure, and exception events.
- Designed retry and error-handling logic to gracefully manage failed import attempts, logging failures and automatically requeuing records for reprocessing without manual intervention.
- Collaborated with the client's procurement and warehouse teams to map Serial Number and PO data structures, ensuring accurate field mapping between source systems and D365 F&O entities.
- Exploring D365 F&O Copilot capabilities to identify practical AI-assisted use cases.

Technical Architect – D365 Finance & Operations **May 2025 – Dec 2025**

Nagarro | Client engagement based in Dubai, UAE

- Engineered and deployed custom SSRS reports and extended standard financial/operational reports, expanding reporting coverage for finance and operations stakeholders.
- Automated month-end reporting by building a calendar-driven X++ job that generates reports and securely delivers them via SFTP on the 5th working day of every month, removing manual effort.

Technical Lead – D365 Finance & Operations **Oct 2021 – May 2025**

Nagarro | Client engagement based in Zurich, Switzerland

- Owned end-to-end delivery for a global D365 F&O program, covering requirement gathering, solution design, development, and customization, and managed the full environment lifecycle across code migrations, platform updates, and sandbox refreshes.

- Delivered proactive production support, resolving performance bottlenecks and reducing recurring incident volume by 20-30% through root-cause troubleshooting.
- Built and maintained the Expensify integration using the Expensify ISV to streamline expense processing, and exposed D365 F&O entities via OData REST APIs for consumption by the Data Warehouse team.
- Built Power Automate flows to send automated email notifications leveraging standard Business Events for key Sales Order process steps, improving visibility for order status changes.
- Developed X++ solutions across classes, tables, forms, batch jobs, workflows, and security roles to support evolving business requirements.
- Performed minor customizations to Docentric AX templates for Sales Order confirmations and customer invoices, including adding new fields, developing custom placeholders, changing templates, without custom SSRS development
- Executed large-scale data migrations and bulk updates using the Data Management Framework (DMF), custom data entities, and Excel Add-ins, ensuring data integrity across cutover.

Technical Consultant – D365 Finance & Operations **Aug 2020 – Sep 2021**

Nagarro | Client engagement based in Copenhagen, Denmark

- Integrated a Shopify e-commerce Customer Portal with D365 F&O by consuming external web services to automate real-time Sales Order creation, removing manual order entry.
- Built error-handling, response validation, and logging mechanisms for failed transactions, enabling reliable reprocessing and reducing transaction failures.
- Delivered X++ customizations across core modules — forms, classes, and batch jobs — tuned for performance under high transaction volume.

Associate Technical Consultant – Dynamics AX 2012 **Aug 2017 – Jul 2020**

Nagarro | Client engagement based in Jaipur, India

- Delivered a full-lifecycle AX 2012 implementation using the Sure Step methodology, from requirements gathering through post-go-live support.
- Developed Tables, Forms, Classes, Queries, Views, SysOperation batch jobs, SSRS reports, and security permissions.
- Designed custom workflows and number sequences to automate AR and AP processes, reducing manual effort.
- Integrated the Microsoft Shop Floor app via AIF services, enabling real-time tracking of labour time, attendance, job registrations, and production orders on the shop floor.
- Improved system performance through index tuning, query optimization, and Trace Parser analysis.
- Standardized code deployment via model store export/import, reducing deployment errors.

Senior Developer – AX 2012 **Dec 2015 – Jun 2017**

Samsung Data Systems, Gurugram

- Contributed to the implementation and rollout of a Distribution Management System.
- Developed X++ tables, forms, classes, and SSRS reports, and migrated legacy data using DIXF.
- Provided post-go-live support, debugging AX 2012 code and resolving technical support tickets.

Developer – .NET & SQL **Aug 2013 – Nov 2015**

Samsung Data Systems, Gurugram

- Developed and supported .NET/SQL-based applications, building foundational experience later applied to AX 2012 and D365 F&O development.

CERTIFICATIONS

- Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Expert (MB-700)
- Microsoft Dynamics 365: Finance and Operations Apps Developer Associate (MB-500)

EDUCATION

- B. Tech, Information Technology — National Institute of Technology (NIT), Kurukshetra (2009 - 2013)
- PGDM, IT & Operations Management — IMT Ghaziabad, India (2016 - 2018)
