Pranit Kamble

Data Engineer

+919370930979 | pranitkamble2004@gmail.com | Pune, Maharashtra, India | LinkedIn | Github

SUMMARY

Data Engineer with 3 years of experience across the data lifecycle, transitioning from Data Analytics. Skilled in Python, SQL, and cloud infrastructure to architect scalable data warehouses and ensure high-performance data availability for analytics in fast-paced environments.

SKILLS

Programming & Scripting SQL, Python, Shell Scripting
Cloud Infrastructure (AWS) S3, Lambda, Glue (ETL), Athena, IAM, CloudWatch, EMR
Data Orchestration & Pipelines Apache Airflow (MWAA), Azure Data Factory(ADF), Databricks
Data Visualization Tools MS Excel, Power BI, Tableau
Data Governance & Analytics Data Profiling, Exploratory Data Analysis (EDA), Data Cataloging, Power BI/Tableau integration

EXPERIENCE

Data Engineer Present
AditiTechPro Pune, Maharashtra

- Build and maintain ETL pipelines into ADLS Gen2 and Azure SQL using Python and SQL.
- Implement error handling and monitoring to protect data quality and prevent data loss.
- Develop scalable ETL workflows with AWS Glue and Apache Airflow (MWAA), cutting manual processing by 40% across 50+ data sources.
- Migrate on-prem data to an S3 Data Lake with Delta Lake and Medallion Architecture for ACID and reliability.
- Optimize BI queries and enforce data governance with Unity Catalog for fine-grained access control.

Junior Data Engineer Sep '22 — Sep '24
FIS Global(Hybrid) Pune, Maharashtra

- Built automated data pipelines with AWS Glue to clean and move data into a central Data Lake.
- Managed AWS EMR clusters running Apache Spark to accelerate large-scale data transformations.
- Designed and deployed scalable Python/PySpark ETL jobs using AWS Glue with G.1X/G.2X workers.
- Maintained unified metadata using Glue Data Catalog and Crawlers and converted raw JSON/CSV into partitioned Parquet.
- Reduced AWS Athena scan volume by 85% and improved query response time; configured Cloud Watch alarms and logs to monitor ETL health.

PROJECTS

Cloud-Based Retail Analytics Pipeline Jan '26 — Mar '26

- Built a serverless AWS pipeline to process 50,000+ retail transaction rows in S3. . Used AWS Glue Crawlers and Amazon Athena to discover schemas and clean/transform data.
- Partitioned S3 data to cut scan costs and speed up SQL queries by 30%.
- Created a Tableau dashboard from AWS data to visualize inventory turnover and a 12% overstock trend.

Spotify ETL Project Present

- Used Spark and Athena for transformations and SQL reporting; produced dashboards for listener trends.
- Built ETL pipeline to ingest Spotify streaming and metadata into S3 using AWS Glue and PySpark.
- Converted raw JSON to partitioned Parquet for analytics and reduced query volume.

EDUCATION

Bachelors in Computer Science Engineering, Modern Education Society's College of Engineering (GPA: GPA: 7 / 10) Jun '17 — Jun '21 Pune

- **Coursework**: Advanced Data Structures, Cloud Computing, and Machine Learning.
