Rohit Gaware

rohitgaware15@gmail.com | +91 9145552998 | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Motivated and detail-oriented Software Engineer with hands-on experience in SQL, C# .NET, and cloud technologies. Proficient in designing efficient database queries, building robust backend systems, and collaborating with cross-functional teams in Agile environments. Adept at implementing secure, scalable solutions and resolving complex technical challenges. Eager to contribute to Icertis's mission of intelligent contract management by delivering high-quality platform development.

TECHNICAL SKILLS

Languages	C#, SQL, Java, JavaScript
Frameworks	.NET Framework / .NET Core, ASP.NET MVC, Entity Framework
Databases	Microsoft SQL Server, MySQL — query optimization, stored procedures, indexing, referential integrity
Cloud & DevOps	AWS (EC2, S3, RDS), Docker, Git, GitHub
Methodology	Agile / Scrum, Code Reviews, Technical Documentation
Concepts	OOP, Design Patterns (Repository, Factory, Singleton), REST APIs, Data Security & RBAC

INTERNSHIP EXPERIENCE

Software Engineer Intern | **Right Click Solutions** *Oct 2023 – Sep 2024 • Pune, India*

- Designed and optimized complex **SQL queries and stored procedures**, reducing average data retrieval time by 30% for a core reporting module.
- Developed and maintained backend features in **C# .NET** for an internal platform, adhering to OOP principles and MVC design patterns.
- Collaborated closely with **DBAs** to analyze execution plans and refine indexing strategies, improving database performance under high-load scenarios.
- Implemented **role-based access control (RBAC)** in .NET to safeguard data confidentiality and enforce security policies across modules.
- Participated in **Agile sprints**, daily stand-ups, and code reviews; documented technical specifications for all assigned features.
- Engaged with support teams to diagnose and resolve platform issues within SLA timelines, improving ticket resolution rate by 20%.

PROJECTS

Contract Data Management System | •
Tech: C# .NET, SQL Server, ASP.NET MVC, Git

- Built a contract lifecycle management web application with **C# .NET MVC**, enabling CRUD operations on contract records with full audit logging.
- Authored 15+ optimized **stored procedures** in SQL Server to handle complex joins, aggregations, and

batch updates for contract data sets.

- Implemented end-to-end data validation and **parameterized queries** to prevent SQL injection and ensure data integrity across all transactions.
- Deployed the application on **AWS EC2 with RDS-backed SQL Server**; containerized using Docker for consistent dev/prod parity.

Employee Leave Management Portal | •
Tech: C# .NET Core, MySQL, REST API, Docker, Git

- Developed a **RESTful API** in ASP.NET Core for managing employee leave requests and approvals with JWT-based authentication.
- Designed normalized **MySQL database schema** with foreign key constraints to maintain referential integrity across employee and leave entities.
- Integrated **GitFlow** branching workflow and conducted peer code reviews to maintain code quality across a 4-member developer team.

Inventory Tracking System | •
Tech: Java, SQL, Agile

- Created a **Java-based** inventory management system with SQL backend to track stock, automate reorder alerts, and generate summary reports.
- Developed in **Agile sprints** with iterative releases, applying OOP design patterns (Factory, Singleton) for a scalable, maintainable codebase.

EDUCATION

Bachelor of Engineering — Computer Engineering | **Marathwada Mitra Mandal's College of Engineering** *Jun 2019 – Jul 2023 • Pune, India*

- **Relevant Coursework:** Database Management Systems, Object-Oriented Programming, Data Structures & Algorithms, Software Engineering, Cloud Computing.
- **CGPA:** 8.69 / 10 | Graduated with First Class Distinction

Master of Technology — Computer Engineering | **COEP Technological University** *Jun 2024 – Jul 2026 • Pune, India*

- **Relevant Coursework:** Algorithm and Complexity Theory, Advancement in Networking, Computer Systems Security, Information Theory and Coding, Principles of Cryptography, Probability, Statistics and Queuing Theory, Cloud Computing and Security, Web Security, Digital Forensics and Data Recovery, Wireless and Mobile Security.

CERTIFICATIONS

- **5 Days Cybersecurity Bootcamp focused on Essentials & Real-World Case Studies** — Ministry of Electronics and Information Technology (2025)
- **Certified Red Team Operations Management (CRTOM)** — Red Team Leaders (2025)
- **SQL for Data Science** — Coursera (2024)
- **C# Fundamentals** — Microsoft Learn (2024)
