Professional Summary

Aspiring AI and Software Engineer pursuing a Bachelor of Engineering in Artificial Intelligence and Data Science (2026). Hands-on experience in Python, SQL, APIs, machine learning, and data processing through internships and academic projects. Strong foundation in software development, REST APIs, object-oriented programming, data pipelines, and AI application development with a keen interest in Generative AI, RAG systems, and modern cloud-based architectures.

Technical Skills

- **Programming**: Python,PL/SQL,SQL,HTML,CSS
- **AI & Machine Learning:** Machine Learning, Deep Learning, Time-Series Forecasting, Data Processing, Exploratory Data Analysis
- **Software Engineering:** Object-Oriented Programming (OOP), Data Structures & Algorithms, REST APIs, Database Design, System Integration, Software Development Lifecycle (SDLC), Testing & Debugging, Documentation
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Scikit-learn, Django, PyTorch/TensorFlow.
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, Power BI, Tableau
- **Concepts:** APIs, Data Pipelines, Workflow Automation, System Integration, Database Design, Problem Solving,LLM,Langchain,AWS

Projects

- **Cryptocurrency Prediction Web Application**
  - Developed a Python-based application for cryptocurrency analysis and time-series forecasting using LSTM and GRU models.
  - Designed data processing pipelines and feature engineering workflows for predictive analytics.
  - Implemented data visualization and reporting components to communicate insights..
- **Disaster Prediction System**
  - Built a machine learning-based system integrating real-time weather APIs and structured datasets.
  - Developed data ingestion and processing workflows to generate probability-based risk predictions.
  - Applied modular design, testing, and documentation practices during development.
- **Brain Tumor Segmentation**
  - Developed a Python-based deep learning application using a 3D U-Net architecture for brain tumor segmentation from 3D MRI scans.
  - Implemented data preprocessing pipelines, including MRI image loading, normalization, and preparation for model training.
  - Performed model training and performance evaluation to generate accurate tumor segmentation masks for medical image analysis.

Internship

Data Analyst Intern – QSpiders, Navi Mumbai

- Developed Python and SQL solutions for data extraction, transformation, and reporting requirements.
- Performed data preprocessing, analysis, testing, and validation on structured datasets.
- Worked with databases and automated workflows to improve reporting efficiency.
- Collaborated on documentation, issue resolution, and analytical problem-solving tasks.

Education

Bachelor of Engineering – Artificial Intelligence and Data Science
University of Mumbai – Thane, Maharashtra
(Graduated : 2026 | CGPA: 8.00)

Certifications

- Data Science Professional Certificate by KNIME (LinkedIn)
- 100 Days of Code: The Complete Python Pro-Bootcamp (Udemy)
