Vivek Shrikant Gadre

Presales Consultant

vivekgadre@hotmail.com • +91 9762135441 / 8788715847 • Pimple Gurav, Pune

Versatile Presales, Cloud, and Customer Success professional with 9+ years of experience delivering multi-cloud (AWS, Azure, GCP), SaaS, and enterprise IT solutions. Skilled in end-to-end bid management, RFPs, SOWs, and translating complex business needs into scalable architectures—spanning hybrid cloud migration, microservices, containerization (Kubernetes/Docker), and CI/CD pipelines. Proficient in integrating enterprise cybersecurity frameworks (Zero Trust, IAM, data encryption) and compliance standards (SOC 2, ISO 27001, GDPR) to ensure robust technical governance. Leading high-impact solution demos, technical proof-of-concepts (POCs), and architecture reviews to validate feasibility and accelerate sales cycles. Optimizing cloud economics through FinOps, capacity planning, and TCO analyses to ensure cost efficiency alongside technical performance. Proven track record across EMEA, APAC, and North America driving discovery, executive stakeholder alignment, and post-sales adoption to maximize CLV and account growth. Adept at cross-functional collaboration with DevSecOps, engineering, sales, and executive leaders to ensure seamless execution.

Areas of Expertise

- Proposal Development
- RFP/RFQ/RFI Management
- Presales Strategy & Solution Design
- Technical & Functional Documentation
- API Integration (Conceptual)
- Data & Analytics Solution Awareness
- Client Requirement Analysis
- Solution Alignment
- CRM & Pipeline Management
- SaaS & Cloud Solutions
- System Workflows (Conceptual)
- Customer Success Strategy
- Stakeholder Management
- Zoho & HubSpot CRM
- Pricing Strategy
- Value Proposition Development
- Escalation Handling & Risk Mitigation
- Competitive & Market Research

Career Experience

People Prime Worldwide Pvt. Ltd.
Senior SCM (Service Contract Management) Consultant

Jun 2025 – Jun 2026

Client: Hitachi Vantara

Hitachi Vantara is an enterprise data infrastructure company specializing in storage, hybrid cloud, data protection, cyber resilience, and managed services, with strong presence across BFSI, telecommunications, and other enterprise sectors. Its portfolio includes Hitachi VSP, EverFlex, SAM4H, and IOportal, supporting infrastructure modernization, storage and asset management, capacity optimization, and operational visibility. Company supports mission-critical enterprise environments across India, EMEA, and APAC, particularly within banking and financial services.

Job Duty

Developed end-to-end SOWs, technical proposals, pricing models, and BOMs by translating enterprise requirements into storage, data center, hybrid cloud, and infrastructure modernization solutions. Supported BFSI clients across India, EMEA, and APAC, conducting technical discovery around legacy modernization, storage consolidation, capacity, performance, security, and availability. Managed RFP, RFQ, and RFI lifecycles in collaboration with Solution Architects, infrastructure, finance, security, legal, and delivery teams. Supported SAN/NAS, block/file storage, virtualization, backup, replication, high availability, and BCDR solutioning, including RPO/RTO requirements. Applied FinOps and cloud cost-optimization practices, including workload rightsizing, capacity and consumption forecasting, TCO/ROI analysis, and CapEx-versus-OpEx modelling. Engaged CIO/CTO, infrastructure, procurement, and technical.

Talent Inc, Baner, Pune
Presales Consultant

Mar 2024 – May 2025

About company:

Talent Inc is global digital product engineering and technology company specializing in AI, custom software development, cloud modernization, data engineering, and dedicated engineering teams. Company supports clients across APAC and global markets, including Financial Services, Telecom, and Healthcare, delivering scalable digital products and enterprise technology solutions.

Job Duty

Managed end-to-end RFP, RFQ, and RFI lifecycles, translating requirements into SOWs, technical proposals, solution architectures, and commercials for Product Engineering, SaaS, Cloud, DevOps, and Cybersecurity engagements. Conducted technical discovery covering application modernization, microservices, APIs, databases, integrations, cloud migration, scalability, security, and compliance. Supported cloud-native architectures across AWS/Azure/GCP incorporating Docker, Kubernetes, serverless, REST/GraphQL APIs, event-driven services, and data pipelines. Positioned DevOps/DevSecOps solutions covering Git, CI/CD, Jenkins/GitHub Actions, Terraform/IaC, automation, monitoring, logging, and release management. Incorporated cybersecurity controls including IAM, OAuth2/OIDC, Zero Trust, encryption, vulnerability management, SIEM/SOC integration, and security considerations aligned with ISO 27001, SOC 2, and GDPR. Collaborated with Product, UX/UI, Cloud, DevOps, Security, QA, and Engineering teams to validate feasibility, estimate effort, define product roadmaps, and develop commercially viable solutions.

Iauro Systems Pvt Ltd, S. B. Road, Pune
Presales Engineer

Apr 2020 — Jun 2023

About company:

Iauro Systems is digital engineering and technology services company specializing in custom software and end-to-end product development. Its capabilities include cloud-native application development, application modernization, data engineering, AI/GenAI, DevOps, microservices, APIs, and UI/UX. Company delivers scalable digital solutions across industries such as BFSI, healthcare, manufacturing, telecom, and travel.

Job Duty

Managed end-to-end RFP, RFI, RFQ, and SOW responses for US clients across BFSI, Healthcare, Manufacturing, Telecom, and Technology sectors. Developed technical proposals for custom web/mobile applications, SaaS products, and application modernization using React, Angular, Node.js, Java/Spring Boot, REST APIs, microservices, and SQL/NoSQL databases. Collaborated with engineering, QA, DevOps, and solution architecture teams on AWS/Azure, CI/CD, Docker, Kubernetes, API integrations, database design, functional/API/performance testing, security, and deployment. Prepared Fixed-Price, T&M, Dedicated Team, and Staff Augmentation commercials covering scope, effort estimation, timelines, resource planning, and SLAs.

ZDSB, Yerwada, Pune
Research Analyst

Mar 2017 – Apr 2019

Supported presales and customer success for IT services clients by capturing Ideal Customer Profiles (ICPs), target segments, and campaign goals, translating into SOWs with clear scope, SLAs, and deliverables. Conducted discovery with marketing and sales leaders to map buyer personas, lead handoff workflows, and pipeline metrics across inbound, outbound, and Account-Based Marketing (ABM) campaigns. Partnered with Account and Channel Managers to align multi-channel outreach strategies with client expectations. Implemented lead qualification frameworks using BANT and ANUM criteria to streamline MQL-to-SQL conversions. Managed ongoing client communication to address lead quality, refine targeting, and review campaign performance. Utilized Salesforce and HubSpot to track pipeline data, log activities, and maintain operational reporting.
