Technical Project Manager with strong delivery ownership, stakeholder management, and cross-functional leadership experience.

Technical Project Manager | Technical Program Manager | Agile Delivery | Cloud & Modernization Programs

PROFESSIONAL SUMMARY

- Results-driven **Technical Project Manager** with **13.6 years of experience** delivering enterprise-scale **modernization, cloud, and digital transformation programs across Insurance, Semiconductor, Business Operations, and Automotive domains**.
- Proven expertise in **end-to-end project ownership**, stakeholder governance, release planning, risk mitigation, and KPI-driven delivery execution. Successfully led distributed cross-functional teams (15+ members) across Development, QA, DevOps, Architecture, and Product Management in global environments (US, UK, Israel, Malaysia, UAE, India).
- PSM II Certified Scrum Master with **6.6 years at Intel Technology India Pvt. Ltd**, experienced in driving Agile maturity, sprint predictability, and program-level coordination across multiple teams.
- Facilitated Servant Leadership workshop to collect project requirements and user feedback.
- Successfully led modernization initiatives including CRM transformation, cloud migration, real-time analytics dashboards, and enterprise validation platforms - achieving 95%+ on-time delivery and measurable improvements in sprint predictability and productivity.

CORE COMPETENCIES

  - End-to-End Project & Program Management
  - Agile / Scrum Delivery (PSM II Certified)
  - Release & Sprint Planning, SDLC Governance
  - Risk, Issue & Dependency Management
  - Budget Tracking, Forecast Validation & Resource Planning
  - Stakeholder & Executive Communication
  - SOW, RFP (Request for Proposal) & Client Engagement Management
  - Microservices & API-driven Architecture Collaboration (REST API Integrations)
  - Cloud Migration & Modernization (Azure / GCP / CI-CD)
  - KPI & Metrics Tracking (Velocity, Defect Density, Cycle Time, Burndown)
  - Cross-Functional & Distributed Team Leadership
  - DevOps & CI/CD Coordination

- As a Technical Project Manager I have driven team coordination, task planning and allocation, code reviews, mentoring, and close collaboration with backend teams for UI integration, GitHub

CI/CD pipelines, and cloud deployments.

- UX/UI for web-based applications and dashboards with data representation through charts and data tables.
- Optimize applications for maximum performance and analyze compatibility issues across browsers (IE, Chrome, Firefox, and Safari) and mobile devices (Android and iOS).
- Experienced in UI creation for Windows Desktop Gadget Development and Chrome extensions.
- Experienced in facilitating Sprint ceremonies (Sprint Planning, Daily Stand-ups, Sprint Review, Retrospectives) for multiple Agile teams, Sprint estimation, Requirement Analysis, SAFe ceremonies for cross-functional teams, PI (Program Increment) Planning.
- Experience on UI design collaboration with different browsers, including IE, Chrome, Firefox, and Safari, as well as various Android and iOS devices.
- Familiar with Chrome Developer Tool, Mozilla Firebug, IE Developer Tools, Google Chrome Extensions, and mobile/responsive web design emulators.
- Worked on email campaign production process from intake to development.
- Familiarity using GenAI (generative AI) for email marketing content, design & development logics, production and optimization.
- Good Communication and inter-personal skills.
- Good Working knowledge in using Open-Source frameworks.

TECHNICAL SKILLS

➢ **Skillset**	Project & Technical/Program Management, Agile / Scrum / SAFe, Stakeholder & Client Management, Delivery Planning & Roadmaps, Risk, Issue & Dependency Management, Budget & Resource Management, Scrum Team Leadership, SharePoint, Project Planning, Agile Quality control, Email Campaign, Microsoft Office.
➢ **Technical Skills**	HTML5, CSS3, SCSS, Twitter Bootstrap 3.x and 4.0, Basics of JavaScript, Web APIs, Angular (versions 7, 11, and 16) Component Based Design, Angular Material Design, REST APIs, GitHub, CI/CD Pipelines, Cloud: Azure / AWS (basic to intermediate), React basics, KENDO UI and Charts, EPICOR Components, WordPress, Font awesome, flaticons 1 & 2, AmCharts V4 & V5, HighChart, Google Chart.
➢ **Tools**	Visual Studio Code, GitHub, Visual Studio, SVN, JIRA, Azure DevOps, Adobe Dreamweaver, Notepad ++, Microsoft SQL Server, Mongo DB Server connectivity, M S Office, Adobe Photoshop.
➢ **Project Tracking**	JIRA, Microsoft Project
➢ **Repository**	GitHub and SVN
➢ **SDLC methodologies**	Agile and Waterfall

- **Server Deployment** Intel Cloud Foundry, GitHub CI/CD, FileZilla and Core FTP.
- **Domain Worked On** Insurance, Semi-Conductor, Automotive and Business Operation

---

Project Management:

- Oversaw end-to-end project management for diverse projects, coordinating resources and timelines to meet client expectations.
- Developed comprehensive project plans, risk management strategies, and communication frameworks using Jira for documentation and tracking.
- Successfully led projects with larger budgets, consistently delivering within budget constraints.
- Created ADHOC reports for billing and validated financial forecasts to track expenses and resource allocation.
- Created quality standards, checklists, report templates, and processes.
- Acted as the single point of contact for clients, ensuring clear communication and expectation management.
- Coordinated **cloud deployments** and CI/CD pipelines using GitHub
- Managed enterprise programs involving Angular, .NET, Java, REST APIs, data analytics, and cloud platforms (Azure/GCP)
- Knowledge of **GitHub**, and Azure Repos for source control and release governance
- Experience in **cloud migration and modernization** of legacy applications to Microsoft Azure
- Reduced delivery risks by proactive dependency tracking and mitigation planning.
- Coordinated with stakeholders across US/UK/Mexico/Malaysia (Penang)/ UAE/Germany geographies for **delivery, risk management, and governance**
- Facilitated Servant Leadership workshop to collect project requirements and user feedback.

Technical Scrum Master:

- **PSM II-certified professionals Scrum master.**
- Led Agile teams and facilitated Sprint ceremonies (Sprint Planning, Daily Stand-ups, Sprint Review, Retrospectives), managed Sprint metrics, estimation, DOD (Definition of Done), DOR (Definition of Ready), and SAFe ceremonies for cross-functional teams such as Scrum of Scrum Master (SoSM), aligning deliverables to enhance performance and delivery.
- Experience in handling 4 different teams (Power and Performance, Execution, Validation & Debug) at Intel, coordinating multiple teams and facilitating cross-team or program-level Agile practices.
- Coaching the Product Management team and Product Owners to improve their alignment with strategic goals and enhance their decision-making effectiveness.
- Collaborated with the Product Manager, Product Owner, and Service Delivery Managers to maintain visibility on the Total Cost of Ownership and to balance the prioritization between technical debt and task fixes.

- Scrum Master for end-to-end (E2E) projects, overseeing the SDLC, including data analytics, .NET, MySQL, MongoDB, and Angular (versions 7, 11, and 16). Responsible for Planning, development, testing, deployment (both cloud and physical servers), as well as delivery and ongoing maintenance.
- Managed project scope, timelines, and budgets for complex projects, ensuring a thorough understanding of project functions and taking ownership of follow-ups, achieving an average on-time delivery rate of 95%.
- Learn all about the project's functions and take charge of follow-ups to make sure everything stays on track.
- Collaborated with Product Owners to prioritize and refine the product backlog using Jira, ensuring alignment with business objectives.
- Utilized Jira to track team progress, manage sprint burndown charts, and report on project metrics, resulting in a 40% increase in team productivity.
- Acted as a mentor to team members, fostering a culture of accountability and self-organization.
- Engaged with stakeholders to ensure their needs and expectations are met.
- Worked closely with front-end and back-end developers, as well as designers, to improve usability and meet project goals.
- Improved sprint predictability and velocity by **20%** through better backlog grooming and estimation.

TECHNICAL & PLATFORM EXPOSURE (Leadership Level):

- Frontend includes Angular, JavaScript/TypeScript, HTML, CSS, Kendo UI, Bootstrap, charting libraries (AmChart, Highchart and Google Chart), REST API integration, and basic React.
- Backend Ecosystem: .NET / .NET Core, Java, and Web APIs
- Cloud & DevOps: Azure, GCP (exposure), GitHub CI/CD, Intel Cloud Foundry
- User interfaces development for web-based applications, corporate websites and RWD Designs for devices.
- Databases: MySQL, MongoDB, SQL Server
- Tools: JIRA, Azure DevOps, Microsoft Project, GitHub
- Optimization of UI/UX designs to enhance user engagement and satisfaction.
- Prepared Technical Checklist for Preventing Component Logic, CSS, and Integration/Environment Issues.
- Creation of dashboards, such as
  a) “Business Indicators” and “Score Cards”,
  b) “Automation Report Representation Dashboard”,
  c) “Execution Work done LIVE DASHBOARD”,
  d) “Dashboard with Input modules and User Management Modules”.
  e) “Dashboards to generate reports on validation work done using Excel, PowerPoint, and emailer”.

d) “Developed an interactive roadmap providing detailed and real-time information”.

- User Interface Development for a hardware handling application.
- Chart creations for Data representation within applications and customization of KENDO Charts, AmCharts, HighChart and Google Charts.
- Translating business needs into a design solution that is visually intuitive, maintains brand value & integrity, and provides good overall experience to the end user.
- Ensured compliance with W3C standards and maintained cross-browser and device compatibility in design.
- Led the **modernization** of an existing web application by upgrading it to the latest Angular framework and KENDO UI.
- Lead and Guided team end-to-end UI/UX design process, from concept to delivery, ensuring high-quality and user-centric designs.

Content Management Systems (CMS):

- WordPress, Surreal CMS.

Google Analytics & Webmaster Tools:

- Knowledge on Google Analytics and Google Webmaster Tools.

Other Skills:

- Debugging, Analyzing and Fixing of Error/Error Code on Development stage and Installation Running an Application/Web page/Extensions across browser.
- Handling of Installations different Operating System and Various Applications.
- Proficient in MS Office (Excel, PowerPoint, and Word).
- **Cloud & Server level Deployment.**
- **Familiar with using AI tools like ChatGPT, Gemini and GitHub Copilot**

EDUCATION

- I graduated in the year 2012 from Kalpataru Institute of Technology.
- Master of Business Administration 4th Semester (Data Science) at Amity University.

Other Vocational Courses & Certification:

- Proud to add my name to the list of **PSM II-certified professionals**! (scrum.org)
- Completed Java & J2EE training in Cluster Software solutions (2012).
- Completed Testing Course at QSpider Bangalore (2015).

PROFESSIONAL EXPERIENCE

Current Employer:

Sonata Software | (https://www.sonata-software.com/)

Client: EPICOR (https://www.epicor.com/en/)

Project: EPICOR SERVICE-CRM MODERNIZATION

- **Experience:** Form December 13th, 2024, to Till Date
- **Role:** Technical Project Management.
- **Domain:** Business Operations.

Sonata Software Limited is a leading Modernization engineering company, headquartered in Bangalore. Sonata provides modernization services using its proprietary Platformation™ approach. It specializes in cloud and data modernization, Microsoft Dynamics Modernization, Digital contact center setup and management, managed cloud services and digital transformation services.

Job Description:

- Led the **end-to-end modernization of EPICOR Service-CRM**, upgrading the frontend to **Angular 16** and driving adoption of a **scalable, modular, cloud-ready architecture** while modernizing legacy systems.
- Owned **project planning, execution, and delivery** using **Agile/Scrum**, tracking KPIs in **JIRA**, facilitating stand-ups, sprint planning, reviews, retrospectives, and removing delivery blockers across teams.
- Communicate project progress to leadership and stakeholders.
- Development Workflow & Code Quality Governance, Daily Activity Management.
- GIT & Version control Responsibilities.
- UAT, QA & Testing Support, Internal updates and reporting.
- Deployment, Environment and Security Checks.
- Client Communication & Follow-ups
- Technical Designs, Optimization and Production Quality Improvement.
- Built and maintained strong relationships with clients resulting in a repeat business.
- Agile & Scrum Facilitation - Facilitate Daily Standups, Sprint Planning, Retrospectives, Reviews, Task creations, Remove blockers for the development team. Foster collaboration between DevOps, Security, and Backend Development team.
- Prioritize cloud migration, ensure development teams follow Agile best practices in a cloud-native environment, and encourage a culture of continuous integration and deployment using GitHub CI/CD.
- Team Coordination, Motivation & Guidance.
- Code deployment management.
- Prepared Technical Guidelines for Preventing Component Logic, CSS, and Integration/Environment Issues.
- Legacy System Modernization, Cloud-Native Transformation, API & Integration

Modernization and DevOps & Automation for Continuous Modernization.

- Received **client appreciation** for timely delivery and high-quality project execution.

Technology Used: .NET Core, HTML, CSS, Bootstrap 4, JavaScript, Angular 16, Epicor Components, Kendo UI, SVG, Font Awesome and Flaticons for icons, Flexbox and Kendo charts for Chart representation.

Previous Employer:

UST Global | (https://www.ust.com/)

Client: https://www.intel.com/content/www/us/en/homepage.html

- **Experience:** Form March 14th, 2018, to December 12th, 2024
- **Designation:** Project Lead.
- **Domain:** Semi-Conductor.

Job Description:

- Project Management related to Data analytics, Dot Net, My SQL, Mongo DB, Angular 11 and Testing.
- Built and maintained strong relationships with clients **resulting in a repeat business.**
- Led cross-functional teams of up to 15 people to ensure project success
- Implemented Agile Application for Development and Project management methodologies, Continuous Integration (CI), Sprint Planning, and Conflict Resolution.
- Created and managed User Stories using Jira, and GitHub for version control.
- Involved in creating and optimizing UI/UX designs to enhance user engagement and satisfaction. Using HTML5, CSS3, Bootstrap, Angular 7, 11 & 16, Angular Material Designs, Responsive Web Design (RWD), SVG, and AmChart 4 for chart representation.
- Google Chrome extensions and Windows desktop gadgets designs using HTML, CSS.
- Tested for cross browser compatibility, API request and response Testing with Postman.
- Handled team of Architects, leads, developers and testers.
- Involved in Requirement Reviews, Test Case Reviews of new functionalities with Clients, Project Managers, and entire team. **Intel Cloud Deployment**.
- Prepared Test Plan to execute the Test Scenarios (Regression and Functional).
- Handled clients with **different Geo's of USA, Israel, Penang (Malaysia) and India**.
- Responsible for preparation of **SOW & RFPs** within the group.
- Ensured timely delivery of high-quality services to customers by developing processes, methods, relationships and competencies.
- Created ADHOC reports for billing and validated financial forecasts to track expenses and resource allocation.
- Worked on email campaign production process from intake to development.

Technology Used: .NET Core, HTML, CSS, Bootstrap 4, JavaScript, Angular 7, 11 & 16, Angular Materials Designs, SVG, Font Awesome and Flaticons for icons, Flexbox and AmChart 4 & 5, Google Chart for Chart representation.

Projects:

ITVG Test Chip Roadmap - Successfully released in Feb 2024 Phase 1 and Phase 2 in Sep 2024.

- Developed an interactive roadmap providing detailed, real-time information on test chips, including PLC phases, process nodes, lead IPs, SOCs, and tape-in dates.
- Implemented real-time updates allowing roadmap owners to modify data for up-to-date insights.
- Designed a user-friendly interface with filtering and navigation features to enhance data visualization and stakeholder productivity.

Planned additional interactive features for future phases to further improve usability.

CPPR (Client Power and Performance Repository) - Successfully released in July 2022

- Developed a global web app for Intel's Power and Performance team to track motherboard performance across various configurations. The app captures data on power, performance, and responsiveness, compares results to targets, and generates deviation and analytics. It includes user roles with permission controls and a feedback system.
- Built a centralized repository for power data across platforms and versions.
- Automated data processing and report generation for dashboards and insights.

Program Cockpit - Successfully released in July 2023

- Developed a live dashboard for client platform validation, offering real-time insights into validation activities (Functional, Power and Performance, and Validation) across project phases. Along with a **windows gadget** which shows live handy data on desktop.
- Domain Tracking: Focus on domain-specific health and resolve blockers.
- Test Trends: Analyze historical validation execution results.
- BKC Kit Details: View component versions and status.
- QRC Reports: Auto-grade results against Platform Quality Release Criteria.
- Demo videos available in the help section.

Bug Assist - Successfully released in May 2020

- Facilitated bug management by improving data accuracy and streamlining information flow.
- Supported the full lifecycle of bug tracking, from logging new sightings to triage and resolution.
- Integrated tools like New Sighting, Watcher, Mapper, and Dashboard to enhance bug tracking and decision-making.

CQI (Client Quality Indicator): Chrome JIRA Data Charts & Reports

- Developed charts to track Created vs. Resolved Bugs and cumulative bug data.
- Created visualizations for open bugs by component, exposure, and aging days using pie and bar charts.
- Designed a reports page with bug summaries, program-specific open bugs, and various metrics.

- Added an email feature for users to send selected charts via a drop-down menu.

Intel Smart Assistant (ISA)

- Developed a smart tool for system integration and validation.
- Automates weekly test execution plans and platform configuration for optimal validation coverage.
- Analyzes software changes to assess impact on test coverage.
- Plan's resources efficiently and estimates costs for integration and validation activities.
- Maintains historical test cases to create IP baseline test plans.
- Analyzes defects to identify root causes and supports decision-making for product shipments.

Jarvis Defect Trends

- Built an IoT solution to automate 24/7 monitoring of testing boards using cameras and Lora devices. It captures data, displays it with charts, and logs errors automatically, minimizing manual effort.

Additional Projects: CCG Dashboard, QMS Indicator, Kings River, NIC, iScreen, WPV Dashboard, and WBI (Business Indicator)

- **Webcetera Software solution | EZLynx** (http://www.ezlynx.com/)

  Experience: Jan 2014 to Jan 2018.
  Designation: Senior Web Developer/Scrum Master.
  Domain: Business **Insurance**.

  EZLynx (http://www.ezlynx.com/) is basically product-based company located in USA and same branch located in Bangalore.
  This is insurance comparison rater it is also known as No.1 Insurance comparison rater in USA.
  Proficient in facilitating Scrum ceremonies (Daily scrum, Sprint Planning, Sprint Review and Sprint retrospectives) and leading agile projects.

  Designed and developed responsive SEO friendly cross-browser, along with the Various Android and IOS devices compatible websites using HTML5, CSS3, LESS, JavaScript, Bootstrap 3.0.

  Worked on EZLynx Corporate Website and Agent Lynx by EZLynx (Includes Mobile App UI) https://www.ezlynx.com

  Hosted and maintained websites and analyzed website performance using Google Analytics.
  Assessed each scrum team member's responsibilities and delegated tasks.

Content management systems, WordPress, DotnetNuke, Website development, User Interface designing, Bootstrap, Website traffic growth, Website UI, Bootstrap, Responsive Web Designing, leading a team of web developers.

- **E Baraha | (**www.ebaraha.com)
  Experience: Oct 2013 to Dec 2013.
  Designation: Web Designer and Developer.
  Domain: Ecommerce.
  E BARAHA is a web design and development company in Bangalore that offers high-quality designs for businesses, featuring unique layouts and comprehensive eCommerce solutions and services. I worked as a creative and detail-oriented web designer with experience in designing and developing user-friendly eCommerce websites. I have a proven track record in enhancing user experience, optimizing conversion rates, maintaining high-performance online stores, and implementing social media optimization (SMO).

- **Amity InfoTech | (https://www.reliconstech.com/)**
  Experience: Oct 2012 to Oct 2013.
  Designation: Web Designer and Developer.
  Domain: Agency Website.
  Relicons Technologies (formerly Amity Infotech) have been providing Reliable, Consistent and Affordable Website Design, E-Commerce, Cloud Hosting, Corporate email & Web Security solutions to customers across the globe.
  Worked on web design and development, implementation of small-scale eCommerce websites, and maintenance of mission-critical enterprise resource planning (ERP) projects along with WordPress as a content management system (CMS).

Involved in

- Shared Perspectives on **Blogging at "PERSONAL BRANDING WORKSHOP" held at "SAP labs"** on **24/07/2013.**
- **Facilitated Servant Leadership workshop to collect project requirements and user feedback.**
- **Part of "Upcoming Adobe XD Meet Up" Bangalore** held at **ITC Gardenia** on **18/Jul/2017.**
- **Also, a part of an "IISC Chemical Engineering Dept." Project (http://chemeng.iisc.ac.in/chemeweb/index.htm).**
- **Maintenance of Server** and Website like **GK-Vale.com**.

- Developed many interactive websites for clients in India and Abroad.
- Part of Mobile App and Corporate Website development for "**Agent Lynx by EZLynx**" (https://agentlynx.ezlynx.com/) at EZLynx.
- **Jarvis Program Cockpit** has been awarded as one among Intel's top 10 applications in the year 2019 and proud to be part of that event.
- **Created blogs using Bootstrap Templates with WordPress framework using Bootstrap Plugins for Insurance Agents."**
- **Client Power and Performance Repository and ITVG Test Chip Roadmap (INTEL Roadmap Application)** has been awarded globally as one of the best User interfaces with all provided option application appreciation at **Intel**.
