Professional Summary

Experienced D365 Finance & Operations Managing Consultant and Solution Architect specializing in Microsoft Dynamics 365 F&O and CE. Delivered comprehensive solution architecture and technical design, leveraging expertise in customization, data migration, and Dual Write integration. Led cross-functional teams to establish best practices for scalable ERP solutions aligned with global business objectives.

Core Competencies

- Microsoft Dynamics 365 Finance and Operations (X++) Development
- Dual-write functionality
- Dynamics 365 Project Operations
- Dataverse integration
- Power Apps solutions
- Power Automate processes
- Azure DevOps methodologies
- Data management framework (DMF) tools
- SQL Server Management Studio (SSMS) skills
- Lifecycle services (LCS) knowledge
- CE plugin development
- Integration services proficiency
- Copilot for agent development

Experience

MANAGING CONSULTANT D365 F&O / D365 CE (PROJOPS) | 09/2021 - Current

HSO India Pvt ltd - Bengaluru, India

- Team size: Development & Support- 3, Data migration-3, Deployment-4
- Solution Architecture & Development Leadership
- Acted as Lead/Solution Architect/Technical Lead in 5 + D365 FO and CE (Project Operations) integration implementations.
- Designed and estimated technical solutions based on Functional Design Documents (FDDs).
- Led requirement discussions, solution design workshops, and technical planning with clients.
- Managed development teams, ensuring timely and quality delivery.
- Extensive X++ development including Chain of Command (CoC), event handlers, customizations, AOT and HSO IP enhancements.
- Customized HSO IP solutions and implemented client-specific extensions.
- Managed CI/CD pipelines, code branching, and deployments using Azure DevOps.
- Provided go-live and hyper care support, resolving critical production issues.
- Conducted code reviews and performance tuning, reducing batch job execution time
- Conducted sessions to client on various requirement development demo
- Conducted internal training and mentoring resources on X++, dual write, power platform.
- Power Platform & Integration Expertise
- Designed and implemented Dual-write integrations between D365 FO and Dataverse.
- Developed service-based integrations between FO and Power Platform.
- Built Power Apps and automated business processes using Power Automate.
- Developed Copilot Agents for internal business applications (e.g., HSO Timesheet app).

- Led D365 CE (Project Operations) implementation engagements.

Data Migration Leadership (7+ projects)

- Led complex data migration projects from D365 FO to Dataverse (Project Operations) as the Technical Lead.
- Designed migration strategies using HSO's internal migration tools.
- Performed detailed data analysis, mapping, and ETL planning.
- Executed migrations using Dual-write, DMF, SSMS, and Dataverse tools.
- Specialized in Project Management & Accounting data migrations.
- Handled Dataverse-to-Dataverse migrations for CE-based implementations.

Deployment and Environment Management (15+ clients)

- Led end-to-end D365 FO environment setup and One Version updates using LCS.
- Managed Project Operations installations and HSO IP deployments via Power Platform Admin Center.
- Designed and governed environment architecture (DEV, Migration, UAT, Staging, Production).
- Oversaw cloud-hosted, UAT, and Production release management activities.

Core Technical Skills: D365 Finance & Operations (X++), Dual-write, D365 Project Operations, Dataverse, Power Apps, Power Automate, Azure DevOps, DMF, SSMS/SQL, LCS, CE Plugins, Integration Services, Copilot (Agent Development)

SENIOR TECHNICAL CONSULTANT - MICROSOFT DYNAMICS D365 FO AND DYNAMICS GP | 07/2010 - 09/2021

Systems advisers software services pvt ltd - Bangaluru, India

- Worked on 8+ implementation projects on Microsoft Dynamics AX, D365 Finance & Operations, Dynamics GP, and .NET technologies.
- Delivered end-to-end ERP implementations, customizations, upgrades, and production support for global clients.
- Strong hands-on expertise in D365 F&O development including Extensions, CoC, Event Handlers, Delegates, SysOperation Framework, Data Entities, XDS, and AOT objects.
- Led and contributed to AX 2012 (R2/R3) to D365 F&O upgrade projects, including code refactoring and overlayering remediation.
- Designed and developed SSRS and Excel-based reports across Finance, AR, AP, Inventory, Production, Retail, and GST modules.
- Developed integrations using Web Services, OData, CDS, and Power Platform (Power Apps, Power Automate, Power BI).
- Managed LCS deployments, deployable package creation, environment servicing, code merges, and Azure DevOps (TFS) version control.
- Contributed to Microsoft Dynamics GP core product development, localization projects, performance optimization, and critical support cases.
- Implemented VAT (Indonesia) and Indian GST customizations in D365 F&O.
- Developed internal automation tools, including a D365 code upgrade utility for extension generation.
- Actively involved in requirement analysis, FDD estimation, technical design documentation, code reviews, unit testing, and client demonstrations.
- Conducted technical training and mentoring sessions to enhance team capability and knowledge sharing.
