PROFILE

Python Full Stack Developer with 2.1+ years of experience building scalable web applications using Django. Specialized in backend development, REST API design, and database optimization for e-commerce and financial systems. Delivered 30% efficiency gains through payment integrations and performance tuning.

TECHNICAL SKILLS

Languages : Python (3.10–3.12) | JavaScript | HTML | CSS | Reactjs
Frameworks : Django (4.2, 5.0) | Flask | Bootstrap
Database : MySQL
Libraries : NumPy | Pandas
Tools : Git | GitHub | VS Code
Concepts : REST APIs | RBAC | MVC Architecture | Payment Gateway Integration

PROFESSIONAL EXPERIENCE

Python Full Stack Developer 03/2024 – Present | Pune
Microdynamic Software Private Limited

- Architected and deployed **3+ Django-based modules** for order management, payments, and financial systems reducing manual effort by **30%**
- Implemented role-based dashboards Integrated **Razorpay payment gateway**, enabling secure transactions for **200+ daily active users**
- Used **NumPy & Pandas** to automate financial data validation, cutting calculation errors by **20%**
- Optimized SQL queries, improving API response time by **25%** and reducing database load
- Implemented **RBAC** for admin, vendor, and client dashboards

PROJECTS

1] MEDISOLVE – MEDICAL E-COMMERCE PLATFORM 04/2025 – Current

- Summary : Developed a medical e-commerce platform similar to Flipkart, enabling users to search and order medicines based on type, brand, and requirements.
- Role : Designed and implemented backend services using **Django**, including product management, order lifecycle, and role-based dashboards (Admin, Manager, Vendor, Client).
- Worked on payment gateway integration using **Razorpay API v2** to ensure secure transactions and handled order confirmation workflow from client to admin.
- Improved application performance by **25%** through query optimization and efficient database handling.
- Built and optimized **order management and financial modules**, improving operational efficiency by **30%**.

2] Microfinance Management System 06/2024 – 04/2025

- Developed a **financial system** managing savings, collections, and loan tracking for **500+ simulated users**
- Implemented **4 savings schemes** (daily, weekly, monthly, yearly) with automated interest calculations
- Built admin dashboard for real-time financial reporting — reduced report generation time by **40%**
- Used **Pandas & NumPy** to validate financial data, achieving **99.5% accuracy** in interest calculations

EDUCATION

Bachelor of Technology in Information Technology 2022 – 2025 | Pune, India
Government College of Engineering, Karad
