Yuvraj Dilip Patil

Python Developer | DevOps Enthusiast | AWS | Docker | CI/CD | REST APIs | Git

+91-9892417046 | yuvrajpatil9851@gmail.com | LinkedIn | GitHub | Mumbai,India

PROFESSIONAL SUMMARY

Python Developer with 2+ Year of experience in backend development, REST APIs, and scalable application design using Python, Flask, FastAPI, and SQL. Hands-on experience with Git, Docker, AWS services, CI/CD workflows, and DevOps practices for application deployment and automation. Strong understanding of OOP, Data Structures, Algorithms, and Agile methodologies. Skilled in debugging, performance optimization, and collaborating with cross-functional teams to build scalable and reliable software solutions

EXPERIENCE

Full Stack Python Developer

Future Mind Infotech Solutions

June 2024 – Present

- Worked with Git for source code management and collaborative development workflows.
- Participated in deployment and release activities for backend applications.
- Assisted in containerizing applications using Docker for consistent deployment environments.
- Contributed to CI/CD workflows and automated build processes.
- Worked with cloud-hosted environments and monitored application performance.
- Implemented logging and troubleshooting mechanisms to improve system reliability.
- Collaborated with development and operations teams to streamline deployments.
- Optimized application performance and improved maintainability through clean coding practices.
- Ensured code quality and maintainability by following best practices, performing code reviews
- Worked on integrating AI services into backend systems for enhanced user experience

Java Developer (Intern)

Discover Technologies

July 2021 – March 2022
Remote

- Contributed to the design and integration of web dashboard modules such as Internship, Assessment, and Project pages using HTML, CSS, and JavaScript.
- Worked on MVC architecture using JSP, Servlets, and Spring framework.
- Assisted in deployment and testing of applications on application servers
- Analyzed software requirements and implemented optimized solutions following object-oriented programming principles and design best practices.
- Technologies Used: Java, Spring-Boot, RESTful APIs, Microservices, Maven, JSON, HTML, CSS.

TECHNICAL SKILLS

Programming Languages

Python, Java, JavaScript (ES6), SQL

DevOps & Cloud

Docker, CI/CD, Git, GitHub, AWS (EC2, S3, IAM), Linux

Frameworks

Flask, FastAPI, Django, Spring Boot, React.js

Software Engineering

OOP, SDLC, Agile, REST APIs, Debugging, Unit Testing

Databases

Oracle, MySQL, PL/SQL

PROJECTS

Enterprise Knowledge Assistant (RAG-Based AI Solution)

- Developed a Retrieval-Augmented Generation (RAG) application using Python, LangChain, and OpenAI APIs for intelligent querying of enterprise documents.
- Implemented document ingestion, text chunking, embeddings generation, and semantic search pipelines for efficient knowledge retrieval.
- Built RESTful APIs for document upload, indexing, retrieval, and AI-powered question-answering workflows.
- Optimized prompt engineering techniques and context management to improve response relevance and accuracy.
- Integrated vector database storage for scalable document search and retrieval operations.

AI-Powered Document Intelligence Platform

- Developed a Python-based document processing platform using LLMs for automated classification, information extraction, and summarization of business documents.
- Built scalable REST APIs for document upload, processing, and AI-generated insights integration.
- Implemented data preprocessing and prompt-engineering workflows to improve document analysis accuracy and response quality.

EDUCATION

B.Tech (CSE) — 8.1 CGPA

DY Patil College of Engineering Kolhapur — **2022–2025**

Diploma — 89%

Shivajirao S. Jondhle College of Engineering — **2019–2022**
